Learning Design Marcelo Maina, Brock Craft, Yishay Mor, 2015-07-21 We live in an era defined by a wealth of open and readily available information and the accelerated evolution of social mobile and creative technologies The provision of knowledge once a primary role of educators is now devolved to an immense web of free and readily accessible sources Consequently educators need to redefine their role not just from sage on the stage to guide on the side but as more and more voices insist as designers for learning The call for such a repositioning of educators is heard from leaders in the field of technology enhanced learning TEL and resonates well with the growing culture of design based research in Education However it is still struggling to find a foothold in educational practice We contend that the root causes of this discrepancy are the lack of articulation of design practices and methods along with a shortage of tools and representations to support such practices a lack of a culture of teacher as designer among practitioners and insufficient theoretical development The Art and Science of Learning Design ASLD explores the frameworks methods and tools available for teachers technologists and researchers interested in designing for learning Learning Design theories arising from findings of research are explored drawing upon research and practitioner experiences It then surveys current trends in the practices methods and methodologies of Learning Design Highlighting the translation of theory into practice this book showcases some of the latest tools that support the learning design process itself *Rethinking Pedagogy for a Digital Age* Helen Beetham, Rhona Sharpe, 2007-04-19 Packed full with case studies from multi disciplines and with a helpful appendix of tools and resources this book is an essential guide to effective design and implementation of sound e learning activities
