Community Architect Kristin E. Larsen, 2016-08-29 Clarence S Stein

1882-1975 was an architect, housing visionary, regionalist policymaker and colleague of some of the most influential public figures of the early to mid twentieth century including Lewis Mumford and Benton MacKaye. Kristin E. Larsen's biography of Stein comprehensively examines his built and unbuilt projects and his intellectual legacy as a proponent of the garden city for a modern age. This examination of Stein's life and legacy focuses on four critical themes: his collaborative ethic in envisioning policy, design and development solutions; promotion and implementation of investment housing; his revolutionary approach to community design as epitomized in the Radburn Idea; and his advocacy of communitarian regionalism. His cutting edge projects such as Sunnyside Gardens in New York City, Baldwin Hills Village in Los Angeles and Radburn, New Jersey, his town for the motor age, continue to inspire community designers and planners in the United States and around the world.

Stein was among the first architects to integrate new design solutions and support facilities into large scale projects intended primarily to house working class people and he was a cofounder of the Regional Planning Association of America. As a planner, designer and at times financier of new housing developments, Stein wrestled with the challenges of creating what today we would term livable, walkable and green communities during the ascendancy of the automobile. He managed these challenges by partnering private capital with government funding as well as by collaborating with colleagues in planning, architecture, real estate and politics.

Atari Design Raiford Guins, 2020-11-12 Drawing from deep archival research and extensive interviews, Atari Design is a rich historical study of how Atari's industrial and graphic designers contributed to the development of the video game machine. Innovative game design played a key role in the growth of Atari from Pong to Asteroids and beyond, but fun, challenging and exciting game play was not unique to the famous Silicon Valley company. What set it apart from its competitors was innovation in the coin op machine's cabinet. Atari did not just make games; it designed products for environments. With tasteful packaging, Atari exceeded traditional locations like bars, amusement parks and arcades, developing the look and feel of their game cabinets for new locations such as fast food restaurants, department stores, country clubs, university unions and airports, making game play a ubiquitous social and cultural experience. By actively

shaping the interaction between user and machine overcoming styling limitations and generating a distinct corporate identity
Atari designed products that impacted the everyday visual and material culture of the late 20th century Design was never an afterthought at Atari *The Architect and Contract Reporter* ,1914
