Guidelines for Safe Handling of Powders and Bulk Solids

CCPS (Center for Chemical Process Safety), 2010-08-13 Powders and bulk solids handled widely in the chemical pharmaceutical agriculture smelting and other industries present unique fire explosion and toxicity hazards. Indeed substances which are practically inert in consolidated form may become quite hazardous when converted to powders and granules. The U S Chemical Safety and Hazard Investigation Board is currently investigating dust explosions that occurred in 2003 at WestPharma CTA Acoustics and Hayes Lemmerz and is likely to recommend that companies that handle powders or whose operations produce dust pay more attention to understanding the hazards that may exist at their facility. This new CCPS guidelines book will discuss the types of hazards that can occur in a wide range of process equipment and with a wide range of substances and will present measures to address these hazards.

Process Safety for Engineers CCPS (Center for Chemical Process Safety), 2022-05-03 Process Safety for Engineers Familiarizes an engineer new to process safety with the concept of process safety management.
