Texts and Contexts Kenneth Quinn, 2024-08-30 First published in 1979 Texts and Contexts identifies those classics of Roman literature which deserve to survive because of their intrinsic quality and their lasting significance The most important of these texts are placed in the context of the tradition which each represents and which each group of texts taken together constitutes Four main streams of tradition are identified the poet as storyteller narrative poetry and drama the poet as teacher didactic poetry the poet as himself personal poetry and the poetry of social comment and Roman literary prose Each major text is presented in the form of one or more passages of substantial length for analysis in detail and comparison with related works The translations used include leading literary translations since the sixteenth century The result is a history of Roman literature in which the emphasis is laid on the quality of the text discussed rather than on comprehensiveness of treatment and on organic relationships rather than chronology This book is the result of thirty years of teaching experience by the author and his conviction that existing books on the same subject are inadequate and misleading It will be of particular interest to students taking classical literature and translation courses to students of English literature and anyone who is interested in literature even without a knowledge of Latin

passages Honigmann exposes the extent to which versions of Othello adopted by editors and widely regarded as fundamentally Shakespearean were profoundly influenced by others than Shakespeare himself Questioning time honoured editorial procedures the findings of Texts of Othello have implications for many other of the plays of the Shakespeare canon and more widely for questions of authorship and the doctrine of the better text
