The SMM7 sections are now divided into four parts: General Guidance, British Standards, Data and Outline Specification. Diagrams, typical drawings and photographs illustrate each section. The useful bibliography has been updated and revised.

**The Art of Landscape Detail** Niall Kirkwood, 1999-09-13

Introducing a revolutionary new approach to detail design in landscape architecture. In this groundbreaking book, Niall Kirkwood of the Harvard Graduate School of Design takes a fresh holistic approach to the theories, approaches and practices of landscape detail. With the support of a wealth of graphic and written material taken from historic and contemporary landscape designwork, he clearly demonstrates the role that landscape detail plays in the design process. Going beyond theoretical considerations, Professor Kirkwood outlines landscape detail as a primary design activity, both pragmatic and poetic, using a range of built landscape design examples. A valuable resource for professionals and students in landscape architecture, urban design and environmental design.

**The Art of Landscape Detail** Provides a practical introduction to the aesthetic concerns, form, language and expression of landscape detail. Explores a wide range of detail issues, including materials, climate, durability, implementation and failure, and their influence on the overall detail design process. Examines detail design processes and research approaches that designers can apply in the analysis and development of their own work. Contains in-depth case studies of eight award-winning landscape architecture design projects, including provocative discussions with the designers on the establishment and evolution of their detail design philosophy. Features more than 150 images illustrating forms and site detail from national and international built landscapes.

**Landscape Detailing: Surfaces** Michael Littlewood, 1993

Covers foundations, paving, vehicular and pedestrian steps and ramps, margins and edges, kerbs and wheelstops and drainage channels. The book is a reference for landscape designers.

**Green Building Handbook: Volume 2** Tom Woolley, Sam Kimmins, 2003-09-02

This new handbook provides a detailed reference for environmentally concerned purchasers of building products. Invaluable for the specifier, this handbook will be useful to all interested in finding greener ways of designing and building.

**Designing Gardens on Slopes** Elizabeth Davies, Ruth Chivers, 2012-10-30

Designing real gardens on slopes for real people forms the central core of this book. It demonstrates that making plans for gardens on slopes of all types really works. Not only that, they are a necessary part of the process of turning challenging sites into attractive gardens. This is a really useful book that shows how good design helps to avoid costly common mistakes. It is a simple and informative guide, detailing from survey to construction and planting. Not many gardens are completely flat. Just one step in a garden makes a big difference, adding more interest to the site. But slopes do present more of a challenge when designing gardens and definitely add to the expense of a building project. A select portfolio of beautifully designed gardens shows projects from start to finish. These are not simply attractive garden plans; they actually work. Not only does this book inspire, it will show how to master hilly sites. There are currently no books that deal

specifically with this common problem in fact in many books designing gardens on slopes is barely mentioned Students of garden design qualified garden and landscape designers landscape builders and architects and owners of sloping gardens will therefore find this book particularly useful
