## **Landscape In America:**

Common Landscape of America, 1580 to 1845 John R. Stilgoe, 1982-01-01 Looks at the ways Americans have altered the landscape from the arrival of early Spanish settlers to the beginning of the country's rapid urbanization     Landscape in America George F. Thompson, 1995-01-01 The American landscape is astonishing in its diversity from great global cities to sparsely inhabited plains from rich wetlands to huge deserts from mountain peaks to rolling fields of grain from ancient pueblos to suburbia from famous river valleys to old industrial heartlands from backyards to city streets Americans have lived intimately with these landscapes since before recorded history and we continue today to think about and sometimes even struggle over what the land means to whom it belongs and whose hands will shape its appearance in the future In this collection of specially commissioned essays nineteen of America's leading writers artists and scholars come together to ponder the question What is landscape Recognizing that no one person or discipline can possibly provide the whole answer George Thompson has chosen a range of viewpoints that in his words attempts to make links between art and science history and geography photography and literature a land ethic and environmental design management and planning Landscape in America is the first book to explore the idea of landscape and place in such a broad ranging way Designed for the uncommon common reader it offers a distinctively American perspective on what landscape is what it means and what it represents that will be compelling to the widest possible audience     **The Making of the American Landscape** Michael P. Conzen, 2014-06-03 The only compact yet comprehensive survey of environmental and cultural forces that have shaped the visual character and geographical diversity of the settled American landscape The book examines the large scale historical influences that have molded the varied human adaptation of the continent's physical topography to its needs over more than 500 years It presents a synoptic view of myriad historical processes working together or in conflict and illustrates them through their survival in or disappearance from the everyday landscapes of today     **Landscape in Sight** John Brinckerhoff Jackson, 1997-01-01 During a long and distinguished career John Brinckerhoff Jackson 1909 1996 brought about a new understanding and appreciation of the American landscape Hailed in 1995 by New York Times architectural critic Herbert Muschamp as America's greatest living writer on the forces that have shaped the land this nation occupies Jackson founded Landscape Magazine in 1951 taught at Harvard University and the University of California at Berkeley and wrote nearly 200 essays and reviews This appealing anthology of his most important writings on the American landscape illustrated with his own sketches and photographs brings together Jackson's most famous essays significant but less well known writings and articles that were originally published unsigned or under various pseudonyms Jackson also completed a new essay for this volume Places for Fun and Games a few months before his death Focusing not on nature but on landscape land shaped by human presence Jackson insists in his writings that the workaday world gives form to the essential American landscape In the everyday places of the countryside and city he discerns texts capable of revealing important truths about society and

culture present and past For this collection Helen Lefkowitz Horowitz provides an introduction that discusses the larger body of Jackson's writing and locates each of the selected essays within his oeuvre She also includes a complete bibliography of Jackson's writings
