Landscape As Inspiration A Designer Source:

Landscape as Inspiration Hans Dieter Schaal, 1994-03-04 This text explores the elements of landscape design with clear detailed drawings which convey the effect of formal climatic geological textural and architectural botanical elements and their significance for the landscape designer

Nature, Place & People: Forging Connections Through Neighbourhood Landscape Design Puay-yok Tan, Kuei-hsien Liao, Yun Hye Hwang, Vincent Chua, 2018-04-23 Neighbourhood landscapes are the quintessential forms of urban landscapes in most cities worldwide They are pervasive and hence experienced by the large majority of urban dwellers in their everyday life More than parks nature reserves or nature areas which are visited as destinations neighbourhood landscapes provide the most immediate frequent and convenient form of nature experienced by urban dwellers on a daily basis They are also valuable as social spaces to bring residents together foster social ties and strengthen communities Despite their importance surprisingly little has been written to guide the planning and design of neighbourhood landscapes This book is written for a specific purpose to illustrate how the design of neighbourhood landscapes helps to deliver more benefits for urban dwellers and at the same time protect ecosystems that facilitate human well being This is in turn important as the synergistic relationships between human well being quality of biophysical urban environment and health of human environment interactions fundamentally underpin urban sustainability The authors emphasize the role neighbourhood landscapes play in forging connections between people and nature people and people and people and place Most of all the book highlights the role of focusing on people in this endeavour as it is only when landscapes are appropriately designed and when people recognize these benefits that they become valued and protected as a community resource This book is organized into two parts Part 1 focuses on the conceptual foundations that underpin the neighbourhood landscape design guidelines being developed In this section the authors describe the key concepts relating functions of neighbourhood landscapes to the key urban development goals of sustainability liveability and reliance how they can be represented in a framework and how a synthesis of current knowledge of cities as socio ecological systems helps to identify principles that can guide the designing of neighbourhood landscapes Part 2 is more application focused and is centred on neighbourhood landscape design guidelines inspired by the concept of ecosystem services The guidelines consist of design approaches practical strategies design targets and performance monitoring indicators for tracking the performance of neighbourhood landscapes The book is written for readers in academia and design practice and anyone who has a role in shaping neighbourhood landscapes for the benefit of urban dwellers

Conceptualist Landscapes Paul Cooper, 2014-07-07 Conceptual gardens depend on inspiration which is the result of an exhaustive intellectual process The starting point is an IDEA or stimulus that pushes the design along rather than observing more conventional styles whether classical or modernist into which idea or relationships are fitted Horticultural considerations architectural or aesthetic doctrines and practically based problem solving are either abandoned or regarded as a means to an end rather than the end in itself Idea driven

design therefore cannot be taught by a rule of thumb methodology So the way to design a conceptualist garden is not the theme of this book nor does it contain of the peg solutions for garden and landscape designers Rather it encourages student and professional designers to think further towards their designed solutions

Thinking about Landscape Architecture Bruce Sharky, 2016-02-05 What is landscape architecture Is it gardening or science or art In this book Bruce Sharky provides a complete overview of the discipline to provide those that are new to the subject with the foundations for future study and practice The many varieties of landscape practice are discussed with an emphasis on the significant contributions that landscape architects have made across the world in daily practice Written by a leading scholar and practitioner this book outlines the subject and explores how from a basis in garden design it leapt over the garden wall to encapsulate areas such as urban and park design community and regional planning habitat restoration green infrastructure and sustainable design and site engineering and implementation Coverage includes The effects that natural and human factors have upon design and how the discipline is uniquely placed to address these challenges Examples of contemporary landscape architecture work from storm water management and walkable cities to well known projects like the New York High Line and the London Olympic Park Exploration of how art and design science horticulture and construction come together in one subject Thinking about Landscape Architecture is perfect for those wanting to better understand this fascinating subject and those starting out as landscape architecture students

Landscape Perspectives Marc Antrop, Veerle Van Eetvelde, 2017-12-19 Climb a mountain and experience the landscape Try to grasp its holistic nature Do not climb alone but with others and share your experience Be sure the ways of seeing the landscape will be very different We experience the landscape with all senses as a complex dynamic and hierarchically structured whole The landscape is tangible out there and simultaneously a mental reality Several perspectives are obvious because of language culture and background Many disciplines developed to study the landscape focussing on specific interest groups and applications Gradually the holistic way of seeing became lost This book explores the different perspectives on the landscape in relation to its holistic nature We start from its multiple linguistic meanings and a comprehensive overview of the development of landscape research from its geographical origins to the wide variety of today's specialised disciplines and interest groups Understanding the different perspectives on the landscapes and bringing them together is essential in transdisciplinary approaches where the landscape is the integrating concept
