attributes it instead to a much longer evolution **Landscapes of Britain** Roy Millward, Landscapes of Britain Adam Nicolson,Outlet,1987-08-01 *The Landscape of Roman Britain* Ken R. Dark,Petra Dark,1997 The Landscape of Roman Britain is the first book to combine the latest advances in the archaeology of the period with new scientific approaches to environmental reconstruction It brings together information from excavated sites and archaeological survey data with that provided by the study of ancient plant and animal remains in order to produce a fuller picture of the society economy and natural environment of the Romano British countryside than has until recently been possible Throughout recent discoveries and established interpretations are discussed and new analyses and reinterpretations are outlined making this a fascinating and timely book Written in an accessible style and clearly explaining each stage of the arguments employed this book will be essential reading for both amateur and professional archaeologists of Roman and medieval Britain and for students of British archaeology and landscape history Natural Landscapes of Britain from the Air Nicholas Stephens,1990-09-06 **Trees, Forested Landscapes and Grazing Animals** Ian D. Rotherham,2013 In this comprehensive book the critical components of the European landscape forest parkland and other grazed landscapes with trees are addressed The book considers the history of grazed treed landscapes of large grazing herbivores in Europe and the implications of the past in shaping our environment today and in the future Debates on the types of anciently grazed landscapes in Europe and what they tell us about past and present ecology have been especially topical and controversial recently This treatment brings the current discussions and the latest research to a much wider audience The book breaks new ground in broadening the scope of wood pasture and woodland research to address sites and ecologies that have previously been overlooked but which hold potential keys to understanding landscape dynamics Eminent contributors including Oliver Rackham and Frans Vera present a text which addresses the importance of history in understanding the past landscape and the relevance of historical ecology and landscape studies in providing a future vision Britain, a World by Itself ,1984 The Making of the British Landscape Nicholas Crane,2017-10-05 How much do we really know about the place we call home In this sweeping timely book Nicholas Crane tells the story of Britain Over the course of 12 000 years of continuous human occupation the British landscape has been transformed from a European peninsula of glacier and tundra to an island of glittering cities and exquisite countryside In this geographical journey through time we discover the ancient relationship between people and place and the deep rooted tensions between town and countryside From tsunamis to Roman debacles from henge to high rise and hamlet to metropolis this is a book about change and adaptation As Britain lurches towards a more sustainable future it is the story of our age *The Making of the British Landscape* Nicholas Crane,2011-06-01 Nicholas Crane s new book brilliantly describes the evolution of England s countryside and cities It is part journey part history and it concludes with awkward questions about the future of England s landscapes Nick Crane s story begins with the melting tongues of glaciers and the emergence of a gigantic game park tentatively being explored by a vanguard of Mesolithic adventurers who have taken the long

northward hike across the land bridge from the continent The Iron Age develops into a pre Roman Golden Era and Nick Crane looks at what the Romans did and didn't contribute to the British landscape The major landscape events Black Death enclosures urbanisation recreation etc are fully described and he weaves in the major generic drivers behind the British landscape the role played by geology in shaping our cities industry and recreation the effect of climate and the Gulf Stream and of global economics the Lancashire valleys were formed by overseas markets The co presenter of BBC's Coast also covers the extraordinary benefits bestowed by a 6 000 mile coastline The 10 000 year story of the British landscape culminates in the 21st century which is set to be one of the most extreme centuries of change since the Ice Age Nick Crane describes how this island came to be so incredibly diverse in this celebration of our wonderful landscapes **Rewilding**

European Landscapes Henrique M. Pereira, Laetitia M. Navarro, 2015-05-04 Some European lands have been progressively alleviated of human pressures particularly traditional agriculture in remote areas This book proposes that this land abandonment can be seen as an opportunity to restore natural ecosystems via rewilding We define rewilding as the passive management of ecological successions having in mind the long term goal of restoring natural ecosystem processes The book aims at introducing the concept of rewilding to scientists students and practitioners The first part presents the theory of rewilding in the European context The second part of the book directly addresses the link between rewilding biodiversity and habitats The third and last part is dedicated to practical aspects of the implementation of rewilding as a land management option We believe that this book will both set the basis for future research on rewilding and help practitioners think about how rewilding can take place in areas under their management *Encyclopedia of the Romantic Era, 1760-1850*

Christopher John Murray, 2004 Review Written to stress the crosscurrent of ideas this cultural encyclopedia provides clearly written and authoritative articles Thoughts themes people and nations that define the Romantic Era as well as some frequently overlooked topics receive their first encyclopedic treatments in 850 signed articles with bibliographies and coverage of historical antecedents and lingering influences of romanticism Even casual browsers will discover much to enjoy here The Top 20 Reference Titles of the Year American Libraries May 2004
