Historical Sociolinguistics Terttu Nevalainen, Helena Raumolin-Brunberg, 2016-11-10 Historical Sociolinguistics. *Language Change in Tudor and Stuart England* is the seminal text in the field of historical sociolinguistics. Demonstrating the real world application of sociolinguistic research methodologies, this book examines the social factors which promoted linguistic changes in English, laying the foundation for Modern Standard English. This revised edition of Nevalainen and Raumolin-Brunberg's ground breaking work discusses the grammatical developments that shaped English in the early modern period, presents the sociolinguistic factors affecting linguistic change in Tudor and Stuart English, including gender, social status and regional variation, showcases the authors' research into personal letters from the people who were the driving force behind these changes, and demonstrates how historical linguists can make use of social and demographic history to analyse linguistic variation over an extended period of time. With brand new chapters on language change and the individual and on newly developed sociolinguistic research methods, *Historical Sociolinguistics* is essential reading for all students and researchers in this area.

Millennia of Language Change Peter Trudgill, 2020-04-16 Were Stone Age languages really more complex than their modern counterparts? Was Basque actually once spoken over all of Western Europe? Were Welsh speaking slaves truly responsible for the loss of English morphology? This latest collection of Peter Trudgill's most seminal articles explores these questions and more. Focused around the theme of sociolinguistics and language change across deep historical millennia, from the Palaeolithic era to the Early Middle Ages, the essays explore topics in historical linguistics, dialectology, sociolinguistics, language change, linguistic typology, geolinguistics and language contact phenomena. Each paper is fully updated for this volume and includes linking commentaries and summaries for easy cross reference. Ethnicity and Language Change Kevin McCafferty, 2001-03-08 Part sociolinguistic part ethnographic this book takes up

the neglected question of how ethnic division interacts with variation and change in Northern Irish English. It identifies an idealised folk model of harmonious communities in spite of the social divide and open conflict that have long affected the region. This model affects daily life and sociolinguistic studies alike. A reading of sociolinguistic studies from the region reveals ethnolinguistic differentiation. Qualitative analysis of material from London Derry shows people often stressing tolerance in their community while accounts of their activities contain evidence of ethnic division and strife. Quantitative analysis charts six changes in London Derry English. Variation correlates to varying degrees with age, ethnicity, class, sex, and social network. The ethnic dimension, while not the most important parameter in all cases, plays a role in relation to all the changes examined.

The Future in Greek Theodore Markopoulos, 2009. The future has attracted the interest of almost all scholars working on the history of Greek, but no satisfactory set of arguments for the developments prior to the emergence of the modern form has ever been produced. In this book Theodore Markopoulos explores and elucidates the stages that led up to the appearance of the modern future in the sixteenth century. **BOOK JACKET**

Irish English Volume 2: The Republic of Ireland Jeffrey L. Kallen, 2013-11-27. This volume continues the *Dialects of English* series and complements *Irish English* volume 1. Northern Ireland, by Karen Corrigan. Focusing on Irish English in the Republic of Ireland, the book starts by exploring the often oppositional roles of national language development and globalisation in shaping Irish English from the earliest known times to the present. Three chapters on the lexicon and discourse, syntax and phonology focus on traditional dialect but also refer to colloquial and vernacular Irish English, the use of dialect in literature, and the modern standard language especially as found in the International Corpus of English (ICE) Ireland. A separate chapter examines the internal history of Irish English from Irish Middle English to contemporary change in progress. The book includes an extended bibliographical essay and a set of sample literary texts and texts from ICE Ireland. Continuing themes include the impact on Irish English of contact with the Irish language, the position of Irish English in world Englishes, and features which help to distinguish between Irish English in the Republic and in Northern Ireland.

Social Networks and Historical Sociolinguistics Alexander Bergs, 2011-12-07. The book presents an analysis of selected domains of morphosyntactic variation in a 250,000 word collection of the Middle English Paston Letters (1421-1503) from a historical sociolinguistic point of view. In the three case studies, two nominal and one verbal variable are described and discussed in detail: the replacement of Old English *i* *h* *th* *wh* *take* *make* *give* *have* *do* plus deverbal noun. While the study aims at a balanced integration of theories and methods from a number of different approaches in sociolinguistics, cognitive linguistics, typology, and language change, its main focus is social network theory and the role of the linguistic individual in the formation and change of language structures. Questions of individual language use and of deliberate versus unmonitored changes in the individual system take center stage and are discussed in the light of social network analysis. Traditional empirical social network analysis is carefully revised. Despite its many merits in present-day sociolinguistics, it often needs to be supplemented by hermeneutic biographical analyses of the individual speakers' lives.

when applied to historical data With this background common theories and models of language change such as grammaticalization paradigmatic pressure typological alignment and generational shifts are illustrated and evaluated from the point of view of single speakers and social groups and their particular embedding in the speech community through various network structures The book is of interest to advanced students and researchers in English and general linguistics Middle English historical linguistics and language change corpus linguistics as well as sociolinguistics
