Language Communication And The Economy Discourse Approaches To Politics Society And Culture:

Language, Communication and the Economy Guido Erreygers, Geert Jacobs, 2005-11-24 This volume brings together a number of wide ranging transdisciplinary research articles on the interface between discourse studies and economics It explores in what way economics can contribute to the analysis of discursive practices in various institutional settings as well as investigating what role discourse studies can play in economic research The contributors are linguists communication scholars economists and other social scientists drawing on various traditions including Critical Discourse Analysis Cognitive Linguistics ethnography and the literature on the rhetoric of economics and on economic storytelling All articles are essentially empirical focusing on the details of actual language use The type of data analysed ranges from the minutes of university policy meetings and large scale corpora of newspaper language over books of economic theory from both well respected economists and monetary cranks to cartoons from The Economist

The Spiral of [Anti-Other Rhetoric] Elisabeth Le, 2006-08-22 How do media inform our representations of the Other and how does this influence intercultural international relations While officially dialogues between different national societies are conducted by diplomats in bilateral and multilateral settings in practice journalists also participate every day in such dialogues through the phenomenon of the international media echo in which they report on each others societies Until now media have only been investigated for their potential role in the foreign policy of specific states In a case study involving media in three national cultures and languages French American and Russian this book presents an interdisciplinary framework that combines quantitative and qualitative analyses for the study of the international media echo in an intercultural international relations perspective In particular the fundamental functioning of spirals of anti Other rhetoric i e media wars is examined in a Critical Discourse Analysis approach completed with Social Identity Theory and International Relations theories

Manipulation and Ideologies in the Twentieth Century Louis de Saussure, Peter Schulz, 2005-01-01 This book is a collection of 12 papers dealing with manipulation and ideology in the 20th century mostly with reference to political speeches by the leaders of major totalitarian regimes but also addressing propaganda within contemporary right wing populism and western ideological rhetoric This book aims at bringing together researchers in the field of ideology reproduction in order to better understand the underlying mechanisms of speaker favourable belief inculcation through language use The book covers a wide range of theoretical perspectives from psychosocial approaches and discourse analysis to semantics and cognitive linguistics and pragmatics The book s central concern is to provide not only a reference work with up to date information on the analysis of manipulation in discourse but also a number of tools for the scholar some of them being developed within theories originally not designed to address belief change through language interpretation Foreword by Frans van Eemeren

Language, Religion and National Identity in Europe and the Middle East John

Myhill,2006-01-01 This book discusses the historical record of the idea that language is associated with national identity demonstrating that different applications of this idea have consistently produced certain types of results Nationalist movements aimed at unification based upon languages which vary greatly at the spoken level e g German Italian Pan Turkish and Arabic have been associated with aggression fascism and genocide while those based upon relatively homogeneous spoken languages e g Czech Norwegian and Ukrainian have resulted in national liberation and international stability It is also shown that religion can be more important to national identity than language but only for religious groups which were understood in premodern times to be national rather than universal or doctrinal e g Jews Armenians Maronites Serbs Dutch and English this is demonstrated with discussions of the Holocaust the Armenian Genocide the civil war in Lebanon and the breakup of Yugoslavia the United Netherlands and the United Kingdom

Representations and Othering in Discourse

Beyza Ç Tekin,2010 This volume examines the construction of Turkey s possible European Union accession in French political discourse In today s France heated debates regarding Turkey s EU membership are turning into an essential part of European identity formation Once again the Turkish Other functions as a mirror for defining not only the European Self but also European values By providing a genuine and multi disciplinary approach for studying the Otherness attributed to Turkey this book contributes to our understanding of the Self Other nexus in International Relations Within a Critical Discourse Analysis framework this study explores the socio historical basis of the construction of Turkey s Otherness in an attempt to identify the processes through which past memories representations images and fantasies regarding Turkey are inserted into the French social imaginary Focusing on these significations which are re produced and become manifest through language this book strives to uncover the link between discourse and political action Beyza Tekin s book helps us make sense of the complexities in an unusually detailed and explicit way by deploying the sophisticated techniques we now have for the analysis of discourse This is a book with historical depth It is also a book that offers precise analysis Historians sociologists policymakers as well as discourse analysts all have much to learn from this book Paul Chilton University of Lancaster This is an original and insightful study of the construction of Turkey in French political discourse and offers a valuable analysis of the formation of European identity Gerard Delanty University of Sussex From the Saracen slayer to the ally of renaissance Kings to civilisation s apprentice to hotly contested EU applicant here the changing social fact of Turkey in French discourse is given its fullest treatment to date Iver B Neumann author of Uses of the Other the East in European Identity Formation

Discourses on Language and Integration Gabrielle Hogan-Brun,Clare Mar-Molinero,Patrick Stevenson,2009-03-20 One of the most pressing issues in contemporary European societies is the need to promote integration and social inclusion in the context of rapidly increasing migration A particular challenge confronting national governments is how to accommodate speakers of an ever increasing number of languages within what in most cases are still perceived as monolingual indigenous populations This has given rise to public debates in many countries on controversial policies imposing a requirement of

competence in a national language and culture as a condition for acquiring citizenship. However, these debates are frequently conducted almost entirely at a national level within each state with little if any attention paid to the broader European context. At the same time, further EU enlargement and the ongoing rise in the rate of migration into and across Europe suggest that the salience of these issues is likely to continue to grow. This volume offers a critical analysis of these debates and emerging discourses on integration and challenges the assumptions underlying the new language testing regimes.

The SAGE Handbook of Sociolinguistics Ruth Wodak, Barbara Johnstone, Paul E. Kerswill, 2011. This Handbook answers a long standing need for an up to date comprehensive international in depth critical survey of the history trajectory data results and key figures involved in sociolinguistics. The result is a work of unprecedented coverage and insight. It is all here from the foundational contributions to the field to the impact of new media, new technologies of communication, globalization, trans border fluidities and agendas of research.

Perspectives in Politics and Discourse Urszula Okulska, Piotr Cap, 2010. The volume explores the vast and heterogeneous territory of Political Linguistics structuring and developing its concepts, themes and methodologies into combined and coherent Analysis of Political Discourse (APD). Dealing with an extensive and representative variety of topics and domains: political rhetoric, mediated communication, ideology, politics of language choice etc., it offers uniquely systematic, theoretically grounded insights in how language is used to perform power enforcing, imbuing practices in social interaction and how it is deployed for communicating decisions concerning language itself. The twenty chapters in the volume, written by specialists in political linguistics, critical discourse analysis, pragmatics, sociolinguistics and social psychology, address the diversity of political discourse to propose novel perspectives from which common analytic procedures can be drawn and followed. The volume is thus an essential resource for anyone looking for a coherent research agenda in explorations of political discourse as a point of reference for their own academic activities, both scholarly and didactic.

Politics in today's world consists of almost continuous interconnected talking and writing in a constantly expanding media universe. This comprehensive collection of papers, edited by Urszula Okulska and Piotr Cap, helps readers to get a hold on the flow of discourse that constitutes politics today. Indispensable for anyone seeking perspectives for understanding the language of politics and research methods for probing beyond the surface.

The Social Construction of SARS John Henry Powers, Xiaosui Xiao, 2008. When the SARS virus began its spread from southern China around the world in spring 2003, it caught regional and international health officials by surprise. The SARS epidemic itself lasted for only a few months, whereas its treatment in communicative terms keeps providing us with important lessons that can prepare us all for the much larger pandemic that many are predicting will eventually occur. While the medical aspects of SARS are now relatively well understood, the discursive rhetorical dimensions are much less so. As an international epidemic, SARS arrived in a number of distinctive societies with the result that different communities handled the crisis in different ways, some far more effectively than others. Accordingly, the 12 chapters in *The Social Construction of SARS* are studies of how a major health

related crisis was understood and dealt with from a communicative perspective in such diverse places as Hong Kong mainland China Singapore Taiwan Canada and the United States during the SARS outbreak

Journalism and the Political Felicitas Macgilchrist, 2011 Journalism is often thought of as the fourth estate of democracy This book suggests that journalism plays a more radical role in politics and explores new ways of thinking about news media discourse It develops an approach to investigating both hegemonic discourse and discursive fissures inconsistencies and tensions By analysing international news coverage of post Soviet Russia including the Beslan hostage taking Gazprom Litvinenko and human rights issues it demonstrates the re production of the common sense social order in which one particular area of the world is more developed civilized and democratic than other areas However drawing on Laclau Mouffe and other post foundational thinkers it also suggests that journalism is precisely the site where the instability of this global social order becomes visible The book should be of interest to scholars of discourse analysis journalism and communication studies cultural studies and political science and to anyone interested in positive discourse analysis and practical counter discursive strategies

Arab News and Conflict Samia Bazzi, 2009 The Arab Israeli struggle is not only a struggle over land but a struggle over language representations Arab reporters as well as politicians believe that their political discourses about the Middle East conflict are objective accurate and credible Arab News and Conflict critically examines the role of language in the representations of events and ideologies found in news media Drawing on socio political linguistic approaches combined with real case studies the author offers a unique discourse analysis model for analysing politically sensitive language in the media The focus in this study is on the Arab media discourse in times of conflict with Israel and the US spanning the years 2001 to 2009 Using rich examples from outspoken Arab media outlets the study explores ideological and language facts about the Arab Israeli conflict This book is compelling reading for students and researchers of media and cultural studies discourse analysis and sociolinguistics and translation It is of equal interest to political analysts political speakers journalists and news editors who need to understand more about the ideological function of the language they use or the political journalistic linguistic nexus of power

Cosmopolitan Government in Europe Owen Parker, 2013-04-26 The invocation of the market has been omnipresent in media discussions of crisis Europe On the one hand the market is presented as that to which EU member states must collectively respond It is the very purpose of a post national government and that which dictates individual and collective identities The expansion of market is that which guarantees and constitutes peace in Europe On the other hand the market is that which government must seek to tame It is the servant of government and ought not be permitted to undermine collective identities and solidarities associated with the juridical imaginary of social contract and sovereign nation state It is from this perspective the expansion of the social institutions of nation state into the post national arena that will constitute a lasting peace in Europe Cosmopolitan Government in Europe uses a Foucauldian lens to consider the ethics of the scholarly and institutional discourses associated with these apparently divergent market and legal cosmopolitan visions of Europe It

reflects on attempts to reconcile or move beyond these discourses particularly through the invocation of more pluralist modes of governance but claims that such moves have been largely unsuccessful in both practice and theory It argues that the very ambiguity in the relationship between the ideal subjects that these market and legal visions promote respectively post national entrepreneur and citizen is that which permits a space for resistance and politics Thus the book argues for a pragmatic politics which is cognizant of the violent potential inherent in any cosmopolitan attempt to govern Europe while recognising the contemporary dangers associated with the dominance of a market cosmopolitan Europe This work is an important and timely intervention in contemporary debates about democratic Europe and its shortcomings and will be of great interest to scholars of international political theory European studies and international political economy

The Discourse of Europe Sharon Millar, John Wilson, 2007 In this volume we approach the question of what it is to be European by considering the way in which citizens talk about their everyday lives as they are perceived against the background of Europe and European issues Hence the volume will offer insights into the rarely glimpsed micro political world of ordinary talk and explore the way in which such talk in social interaction and other spheres might help us understand what Europe means to a range of its citizens Using a range of broadly discursive approaches we will touch on inter alia issues of identity youth borders ethnicity local politics and minority languages In the end we suggest it is a common sense view of pragmatic utility that centres what it is to be European and this is something which is continually fluid and shifting within ever changing social historical and political circumstances

Rhetoric in Detail Barbara Johnstone, Christopher Eisenhart, 2008 The eleven studies in this volume illustrate and advance the synthesis of discourse analysis with rhetorical studies *Rhetoric in Detail* shows how a variety of techniques from discourse analysis can be useful in studying such concerns as agency legitimisation controversy and style and how concepts from rhetoric including genre and figuration can enrich the work of discourse analysts The authors research sites range from government commissions political speeches newspaper reports and letters to interviews and conversations in beauty salons and online Methodological overviews interspersed throughout survey critical discourse analysis interactional sociolinguistics grounded theory computer aided corpus analysis narrative analysis and participant observation and provide suggestions for further reading *Rhetoric in Detail* is an invaluable source for rhetoricians looking for systematic grounded ways of approaching new more vernacular sites for rhetorical discourse and for discourse analysts interested in seeing what they can learn from the tradition and practice of rhetorical analysis

Discourse and Political Culture Michael Kranert, 2019-10-15 This book presents a new approach to comparative politico linguistic discourse analysis It takes a transdisciplinary stance and combines analytical tools from linguistic discourse analysis keywords metaphors argumentation genre and political science political culture comparative politics ideologies It is comprehensive in its introduction of approaches from the German tradition of politico linguistics This tradition has not thus far been accessible to a non German speaking readership and hence the volume adds insights into the mechanics of political

discourse from a diverse set of viewpoints The book analyses the modernisation discourses in social democratic parties in Britain and Germany between 1994 and 2003 a project that was named Third Way It demonstrates how political language and political culture are related and how politicians will adapt a global ideology to local political circumstances in order to convince the electorate At the same time the book presents new insights into the German political culture and the version of Third Way discourses in the Social Democratic Party of Germany SPD under the leadership of Gerhard Schröder which have played a key role in shaping current political discourse in Germany It concludes with a model for the study of political discourse which makes the work relevant to scholars in Social Sciences and beyond **What We Remember** Mariana

Achugar, 2008-10-16 This interdisciplinary monograph explores the discursive manifestations of the conflict over how to remember and interpret the actions of the military during the last dictatorship in Uruguay 1973-1985 Through the exploration of the discursive ways in which this powerful group represents past events and participants we can trace the ideological struggle over how to reconstruct a traumatic past By looking at memory as a social and discursive practice the analysis identifies particular semiotic practices and linguistic patterns deployed in the construction of memory The discursive description of what is remembered how it is remembered and who remembers serves to explain how the institution's

construction of the past is transformed and maintained to respond to outside criticism and create an institutional identity as a lawful state apparatus This book should interest discourse analysts historians sociologists and researchers in the field of transitional justice Reconciliation Discourse Annelies Verdoolaeghe, 2008 This volume is a research monograph analysing the South African Truth and Reconciliation Commission TRC from an ethnographic linguistic point of view The central proposition of this book is that the TRC can be regarded as a mechanism that leads to the hegemony of specific discourses thus exercising power The analysis illustrates how through a certain type of reconciliation discourse constructed at the TRC hearings a reconciliation oriented reality took shape in post TRC South Africa Basically the study points to the long term implications a truth commission can exert on a traumatised post conflict society The book is unique on several levels TRC discourse is explored in depth on the basis of personal stories from TRC testifiers a combination of Poststructuralist and Critical Discourse Analysis approaches form the theoretical foundations and an extensive bibliography provides an

impressive database of TRC publications **Analysing Citizenship Talk** Heiko Hausendorf, Alfons Bora, 2006-02-15 Citizenship talk refers to various types of discourse initiated to make citizens take part in politically and socially contested decision making processes citizen participation Citizenship has accordingly become one of the dazzling key words whenever the democratic deficit of modern societies is moaned about Asking for citizenship to be conceived of as a communicative achievement the present book shows that sociolinguistics and pragmatics can essentially contribute to this interdisciplinary up to date issue of research the volume offers a theoretically innovative concept of communicated citizenship and it presents a set of methodological approaches suited to deal with this concept at an empirical level including contributions from

Conversation Analysis Critical Discourse Analysis Social Positioning Theory Speech Act Theory and Ethnography Furthermore concrete data and empirical analyses are provided which take up the case of decision making processes around the application of modern green biotechnology GMO field trials The volume thus illustrates the kind of findings and results that can be expected from this new and promising approach towards citizenship talk **Editorials and the Power of Media** Elisabeth Le,2010 Editorials define at a given time how media construct their socio cultural environment and where they position themselves in it In this sense they are snapshots of media socio cultural identities whose study is crucial for the understanding of media actions and interactions on the political stage This book contributes to the study of media roles in politics with a methodological discursive communication identity framework and its application to a corpus of editorials This allows for the definition of editorials as a genre and it reveals that thanks to a very adroit interweaving of their socio cultural identities news media can play a much more active role on the political stage than studies on framing and agenda setting have hitherto shown The place of media in political communication models might therefore need to be reviewed This book is intended for all those interested in media and politics whatever their academic specializations
