Language Of Time:

The Language of Time Inderjeet Mani, James Pustejovsky, Robert Gaizauskas, 2005 Table of contents **The Language of Time** Richard M. Gale, 1968 [The Spatial Language of Time](#) Kevin Ezra Moore, 2014-05-15 The Spatial Language of Time presents a crosslinguistically valid state of the art analysis of space to time metaphors using data mostly from English and Wolof Africa but additionally from Japanese and other languages Metaphors are analyzed in terms of their most direct motivation by basic human experiences Grady 1997a Lakoff Johnson 1980 This motivation explains the crosslinguistic appearance of certain metaphors but does not say anything about temporal metaphor systems that deviate from the types documented here Indeed we observe interesting culture and language specific metaphor phenomena Refining earlier treatments of temporal metaphor and adapting to temporal experience Levinson's 2003 idea of frames of reference the author proposes a contrast between perspective neutral and perspective specific frames of reference in temporal metaphor that has important crosslinguistic ramifications for the temporal semantics of FRONT BEHIND expressions This book refines the cognitive linguistic approach to temporal metaphor by analyzing the extensive temporal structure in what has been considered the source domain of space and showing how temporal metaphors can be better understood by downplaying the space time dichotomy and analyzing metaphor structure in terms of conceptual frames This book is of interest to linguists psychologists anthropologists philosophers and others who may have wondered about relationships between space and time

Language and Time Quentin Smith, 2002-08-01 This book offers a defense of the tensed theory of time a critique of the New Theory of Reference and an argument that simultaneity is absolute Although Smith rejects ordinary language philosophy he shows how it is possible to argue from the nature of language to the nature of reality Specifically he argues that semantic properties of tensed sentences are best explained by the hypothesis that they ascribe to events temporal properties of futurity presentness or pastness and do not merely ascribe relations of earlier than or simultaneity He criticizes the New Theory of Reference which holds that now refers directly to a time and does not ascribe the property of presentness Smith does not adopt the old or Fregean theory of reference but develops a third alternative based on his detailed theory of de re and de dicto propositions and a theory of cognitive significance He concludes the book with a lengthy critique of Einstein's theory of time Smith offers a positive argument for absolute simultaneity based on his theory that all propositions exist in time He shows how Einstein's relativist temporal concepts are reducible to a conjunction of absolutist temporal concepts and relativist nontemporal concepts of the observable behavior of light rays rigid bodies and the like **Time's Language** Margaret Randall, 2018-09-01 Time's Language contains powerful poems of witness as well as personal poems and autobiographical prose pieces that read like prose poems recounting a life of resistance the life of a life long literary and political revolutionary As US Poet Laureate Juan Felipe Herrera writes Here are Margaret Randall's decades of love ink tears contestation and light let us bow in gratitude for this truth telling daring border breaking pioneering long time volume of soul
