Language An Introduction To The Study Of Speech:

Language Edward Sapir, 1921 Professor Sapir analyzes for student and common reader the elements of language Among these are the units of language grammatical concepts and their origins how languages differ and resemble each other and the history of the growth of representative languages Cover **Language** Edward Sapir, 2024-02-13 **Language An Introduction to the Study of Speech** is a seminal work by the renowned linguist Edward Sapir Published in 1921 this book delves into the intricacies of language and its role in shaping human thought and culture Sapir known for his contributions to the fields of anthropology and linguistics explores how language reflects and influences the way we perceive the world around us In his book Sapir discusses various aspects of language including its structure grammar and the ways in which different languages shape our understanding of reality He also delves into the concept of linguistic relativity which suggests that the structure of a language can affect the way its speakers perceive the world Through insightful analysis and engaging prose Sapir invites readers to delve into the fascinating world of language and its profound impact on human society **Language An Introduction to the Study of Speech** remains a classic text in the field of linguistics offering valuable insights into the nature of language and its significance in human communication **A Comprehensive Summary and Analysis of Language An Introduction to the Study of Speech** Edward Sapir, 2025-02-22 Edward Sapir's seminal work **Language An Introduction to the Study of Speech** is not just a collection of linguistic facts but a quest to understand the very essence of language its evolution and its profound connection to human thought culture and artistic expression Published in 1921 the book transcends its era offering insights that remain relevant and thought provoking even today **Language** Edward Sapir, 1921 Professor Sapir analyzes for student and common reader the elements of language Among these are the units of language grammatical concepts and their origins how languages differ and resemble each other and the history of the growth of representative languages **Language by Edward Sapir** Edward Sapir, 2014-01 This is without doubt the most important book ever written on the subject of Language and Linguistics It is a basic book covering all the then known branches of the large field It is therefore must reading for anybody interested in a deep study of languages This is a book which is basic in its subject and popular enough to be of interest to the general reader The psychological and formal characteristics of speech are carefully established and after studying the historical factors that have molded it the author has devoted his last chapters to the wider bearings of linguistic science and to furnishing a clear understanding as the ever changing instruments of our emotions and mental activity This book of Mr Sapir's distinguishes itself from other general treatment of the problems of linguistics by its power to stimulate thoughts about the subject There is nothing trite or matter of fact between the covers The discussions springing from an unusually wide acquaintance with language in all its varieties and a scholarly understanding of the principles of psychology underlying expression But more than by its learning the book impresses us by its quick insight and acute analysis A capital illustration is the treatment of the problem of classifying

languages There is also a great deal that is suggestive in what the writer has said about the process in phonetic change Especially noteworthy in this connection is the emphasis he places on what he calls patterning Closely related to patterning is the discussion of drift the idea that changes in language are not random but move in a definite direction A gratifying feature not unusual in books of this class is a chapter showing the dependence of literary style on the phonetic and formal characteristics of a language **LANGUAGE, AN INTRODUCTION TO THE STUDY OF SPEECH** EDWARD. SAPIR, 2019

Language Edward Sapir, 1921 Annotation Originally published in 1921 this classic is still regarded as one of the clearest most comprehensive descriptions of language for the general reader Index *Language an Introduction to the Study of Speech* Sapir Edward, 2016-06-21 Unlike some other reproductions of classic texts 1 We have not used OCR Optical Character Recognition as this leads to bad quality books with introduced typos 2 In books where there are images such as portraits maps sketches etc We have endeavoured to keep the quality of these images so they represent accurately the original artefact Although occasionally there may be certain imperfections with these old texts we feel they deserve to be made available for future generations to enjoy *Language* Edward Sapir, 2014-02-26 This is a reproduction of a book published before 1923 This book may have occasional imperfections such as missing or blurred pages poor pictures errant marks etc that were either part of the original artifact or were introduced by the scanning process We believe this work is culturally important and despite the imperfections have elected to bring it back into print as part of our continuing commitment to the preservation of printed works worldwide We appreciate your understanding of the imperfections in the preservation process and hope you enjoy this valuable book *English Language* Edward Sapir, 2023-07-21 This book aims to give a certain perspective on the subject of language rather than to assemble facts about it It has little to say of the ultimate psychological basis of speech and gives only enough of the actual descriptive or historical facts of particular languages to illustrate principles Its main purpose is to show what I conceive language to be what is its variability in place and time and what are its relations to other fundamental human interests the problem of thought the nature of the historical process race culture art The perspective thus gained will be useful I hope both to linguistic students and to the outside public that is half inclined to dismiss linguistic notions as the private pedantries of essentially idle minds Knowledge of the wider relations of their science is essential to professional students of language if they are to be saved from a sterile and purely technical attitude Among contemporary writers of influence on liberal thought Croce is one of the very few who have gained an understanding of the fundamental significance of language He has pointed out its close relation to the problem of art I am deeply indebted to him for this insight Quite aside from their intrinsic interest linguistic forms and historical processes have the greatest possible diagnostic value for the understanding of some of the more difficult and elusive problems in the psychology of thought and in the strange cumulative drift in the life of the human spirit that we call history or progress or evolution This value depends chiefly on the unconscious and unrationalized nature of linguistic structure I have avoided most

of the technical terms and all of the technical symbols of the linguistic academy There is not a single diacritical mark in the book Where possible the discussion is based on English material It was necessary however for the scheme of the book which includes a consideration of the protean forms in which human thought has found expression to quote some exotic instances For these no apology seems necessary Owing to limitations of space I have had to leave out many ideas or principles that I should have liked to touch upon Other points have had to be barely hinted at in a sentence or flying phrase Nevertheless I trust that enough has here been brought together to serve as a stimulus for the more fundamental study of a neglected field

Language an Introduction to the Study of Speech Edward Sapir, 2018-08-06 Language An Introduction to the Study of Speech Large Print By Edward Sapir Speech is so familiar a feature of daily life that we rarely pause to define it It seems as natural to man as walking and only less so than breathing Yet it needs but a moment's reflection to convince us that this naturalness of speech is but an illusory feeling The process of acquiring speech is in sober fact an utterly different sort of thing from the process of learning to walk In the case of the latter function culture in other words the traditional body of social usage is not seriously brought into play The child is individually equipped by the complex set of factors that we term biological heredity to make all the needed muscular and nervous adjustments that result in walking Indeed the very conformation of these muscles and of the appropriate parts of the nervous system may be said to be primarily adapted to the movements made in walking and in similar activities In a very real sense the normal human being is predestined to walk not because his elders will assist him to learn the art but because his organism is prepared from birth or even from the moment of conception to take on all those expenditures of nervous energy and all those muscular adaptations that result in walking To put it concisely walking is an inherent biological function of man We are delighted to publish this classic book as part of our extensive Classic Library collection Many of the books in our collection have been out of print for decades and therefore have not been accessible to the general public The aim of our publishing program is to facilitate rapid access to this vast reservoir of literature and our view is that this is a significant literary work which deserves to be brought back into print after many decades The contents of the vast majority of titles in the Classic Library have been scanned from the original works To ensure a high quality product each title has been meticulously hand curated by our staff Our philosophy has been guided by a desire to provide the reader with a book that is as close as possible to ownership of the original work We hope that you will enjoy this wonderful classic work and that for you it becomes an enriching experience

Language Edward Sapir, 2015-03-23 quite impossible to show nor does it seem intrinsically reasonable to suppose that more than a negligible proportion of the elements of speech or anything at all of its formal apparatus is derivable from an onomatopoetic source However much we may be disposed on general principles to assign a fundamental importance in the languages of primitive peoples to the imitation of natural sounds the actual fact of the matter is that these languages show no particular preference for imitative words Among the most primitive peoples of aboriginal America the Athabaskan tribes of the Mackenzie River
