Guidelines for the Practice of Language-speech Pathology and Audiology Expert Group on Clinical Guidelines in Language-Speech Pathology and Audiology (Canada), Canada. Health Services Directorate, Canada. Health and Welfare Canada, Pressman, D. Elaine, 1982 Rethinking the Education of Deaf Students Sue Livingston, 1997 Here is a compelling and controversial text which asserts that Deaf students should be treated no differently than non Deaf students The author a veteran and practicing teacher rejects the predominant view of Deaf students as special learners in need of language remediation and repair Instead she maintains that for Deaf students as well as their hearing counterparts the primary educational goal is the making and sharing of understandings in various subjects Furthermore she views this as a process that occurs naturally concomitantly and reciprocally with the acquisition of language regardless of one's hearing ability Livingston's assertion clashes with conventional Deaf education which presumes that the wider learning begins after students master a sign system that codifies and reconstructs English With a cumbersome orderly piecemeal and unnatural approach this traditional view frequently forces teachers to water down curriculums in an attempt to make English more readily acquired As a result Deaf students are deprived of rich and challenging content Rethinking the Education of Deaf

Students offers an alternative and demonstrates how American Sign Language ASL and English can coexist in the same classroom embedded in the content of what is being taught Through clear theoretical explanations field tested teaching strategies authentic examples of students work lesson plans and sections on assessment Livingston suggests ways to help students become educated language users Her ideas hold enormous implications for those who teach Deaf students develop school budgets design programs and train future teachers More important they may hold the key that unlocks the potential of Deaf students of all ages to become voracious readers and accomplished writers **The Volta Review** ,1979 *Reading Practices with Deaf Learners* Patricia L. McAnally,Susan Rose,Stephen Patrick Quigley,2007 This book was written specifically for professors and college students in teacher training programs for deaf education and for classroom teachers working with deaf and hard of hearing learners It is one of the very few books on the market that focuses entirely on the hearing impaired It consists of three sections each one providing in depth information on topics critical to the teaching of reading to this specific population Section one Foundations contains chapters dealing with theory and research in such topics as cognition reading language literary development vocabulary and comprehension One chapter on ASL English and Reading looks at the research in the area of second language learners and discusses its application to deaf and hard of hearing students Section two Instructional Management deals with instructional management and describes instructional systems and designs These chapters look at current trends in education and how these trends apply to the education of students who are deaf and hard of hearing Section three Applications focuses on specific instructional models in reading writing and spelling detailing strategies that have been successfully used with deaf and hard of hearing learners The last chapter in this section discusses assessment giving information and examples of both formal and authentic procedures **Reading and Deafness** Cynthia M.
