Tutorials in Bilingualism Annette M.B. de Groot, Judith F. Kroll, 2014-05-12 The past fifteen years have witnessed an increasing interest in the cognitive study of the bilingual A major reason why psychologists psycholinguists applied linguists neuropsychologists and educators have pursued this topic at an

accelerating pace presumably is the acknowledgment by increasingly large numbers of language researchers that the incidence of monolingualism in individual language users may be lower than that of bilingualism. This alleged numerical imbalance between monolinguals and bilinguals may be expected to become larger due to increasing international travel through for instance tourism and trade to the growing use of international communication networks and to the fact that in some parts of the world i.e. Europe the borders between countries are effectively disappearing. In addition to the growing awareness that bilinguals are very common and may even outnumber monolinguals there is the dawning understanding that the bilingual mind is not simply the sum of the cognitive processes associated with each of the two monolingual modes and that the two languages of bilingual may interact with one another in complicated ways. To gain a genuinely universal account of human cognition will therefore require a detailed understanding of language use by both pure monolinguals as well as bilinguals unbalanced and balanced and of the representations and processes involved. These two insights that bilingualism is a common human condition and that it may influence cognition were presumably instrumental in putting bilingualism on the agendas of many researchers of cognition and language in recent years. But other reasons may have played a role too. The study of bilingualism also provides a unique opportunity to study the relation between language and thought. A final reason for the growing interest in this area of research is the awareness that bilingualism may confer the benefit of broadening one's scope beyond the limits of one's own country and culture. This book serves as an excellent introduction to the important topics in the psycholinguistic study of bilingualism. The chapters represent a comprehensive and interrelated set of topics that form the core of contemporary research on the psycholinguistics of bilingualism. The issues raised within this perspective not only increase our understanding of the nature of language and thought in bilinguals but also of the basic nature of the mental architecture that supports the ability to use more than one language.

Migrant Integration between Homeland and Host Society Volume 2 Anna Di Bartolomeo, Sona Kalantaryan, Justyna Salamońska, Philippe Fargues, 2017-07-10. This book provides solid empirical evidence into the role that countries and communities of origin play in the migrant integration processes at destination. Coverage explores several important questions including: To what extent do policies pursued by receiving countries in Europe and the US complement or contradict each other? What effective contribution do they make to the successful integration of migrants? What obstacles do they put in their way? This title is the second of two complementary volumes each of which is designed to stand alone and provide a different approach to the topic. Here renowned contributors present evidence from the studies of 55 origin countries on five continents and 28 countries of destination in Europe where both quantitative and qualitative research was conducted. In addition the chapters detail results of a unique worldwide survey of 900 organisations working on migrant integration and diaspora engagement. The results draw on an innovative methodology and new approaches to the analysis of large scale survey data. This examination into the tensions between integration policies and diaspora engagement policies will appeal to academics, policymakers, integration practitioners, civil

society organisations as well as students Overall the chapters provide empirical evidence that builds upon a theoretical framework developed in a complementary volume Migrant integration between Homeland and Host society Vol 1 Where does the country of origin fit by A Unterreiner A Weiner and P Fargues

Persuasive Imagery Linda M. Scott, Rajeev Batra, 2003-04-02 This volume synthesizes and advances existing knowledge of consumer response to visuals Representing an interdisciplinary perspective contributors include scholars from the disciplines of communication psychology and marketing The book begins with an overview section intended to situate the reader in the discourse The overview describes the state of knowledge in both academic research and actual practice and provides concrete sources for scholars to pursue Written in a non technical language this volume is divided into four sections Image and Response illustrates the difficulty encountered even in investigating the basic influences processes and effects of mere exposure to imagery Image and Word presents instances in which the line between words and pictures is blurred such as the corporate logo which is often pictorial in nature but communicates on an abstract level usually attributed to words Image and the Ad contributes to our appreciation for the exquisite variations among advertising texts and the resultant variability in response not only to different ads but among different viewers of the same ad Image and Object carries the inquiry of visual response over the bridge toward object interaction Having traveled a path that has gone from the precise working of the brain in processing visual stimuli all the way to the history of classical architecture readers of this volume will have a new respect for the complexity of human visual response and the research that is trying to explain it It will be of interest to those involved in consumer behavior consumer psychology advertising marketing and visual communication

Orthography, Phonology, Morphology and Meaning R. Frost, Marian Katz, 1992-10-20 The area of research on printed word recognition has been one of the most active in the field of experimental psychology for well over a decade However notwithstanding the energetic research effort and despite the fact that there are many points of consensus major controversies still exist This volume is particularly concerned with the putative relationship between language and reading It explores the ways by which orthography phonology morphology and meaning are interrelated in the reading process Included are theoretical discussions

as well as reviews of experimental evidence by leading researchers in the area of experimental reading studies The book takes as its primary issue the question of the degree to which basic processes in reading reflect the structural characteristics of language such as phonology and morphology It discusses how those characteristics can shape a language's orthography and affect the process of reading from word recognition to comprehension Contributed by specialists the broad ranging mix of articles and papers not only gives a picture of current theory and data but a view of the directions in which this research area is vigorously moving
