Language Planning And Social Change:

Language Planning and Social Change Robert L. Cooper, 1989 This book describes the ways in which politicians church leaders generals leaders of national movements and others try to influence our use of language Professor Cooper argues that language planning is never attempted for its own sake Rather it is carried out for the attainment of nonlinguistic ends such as national integration political control economic development the pacification of minority groups and mass mobilization Many examples are discussed including the revival of Hebrew as a spoken language feminist campaigns to eliminate sexist bias in language adult literacy campaigns the plain language movement efforts to distinguish American from British spelling the American bilingual education movement the creation of writing systems for unwritten languages and campaigns to rid languages of foreign terms **Language Planning and Social Change** is the first book to define the field of language planning and relate it to other aspects of social planning and to social change The book is accessible and presupposes no special background in linguistics sociology or political science It will appeal to applied linguists and to those sociologists economists and political scientists with an interest in language

Language Planning and Social Change Robert L. Cooper, 2010 The Oxford Handbook of Language Policy and Planning James W. Tollefson, Miguel Pérez-Milans, 2018-05-07 This Handbook provides a state of the art account of research in language policy and planning LPP Through a critical examination of LPP the Handbook offers new direction for a field in theoretical and methodological turmoil as a result of the socio economic institutional and discursive processes of change taking place under the conditions of Late Modernity Late Modernity refers to the widespread processes of late capitalism leading to the selective privatization of services including education the information revolution associated with rapidly changing statuses and functions of languages the weakening of the institutions of nation states along with the strengthening of non state actors and the fragmentation of overlapping and competing identities associated with new complexities of language identity relations and new forms of multilingual language use As an academic discipline in the social sciences LPP is fraught with tensions between these processes of change and the still powerful ideological framework of modern nationalism It is an exciting and energizing time for LPP research This Handbook propels the field forward offering a dialogue between the two major historical trends in LPP associated with the processes of Modernity and Late Modernity the focus on continuity behind the institutional policies of the modern nation state and the attention to local processes of uncertainty and instability across different settings resulting from processes of change The Handbook takes great strides toward overcoming the long standing division between top down and bottom up analysis in LPP research setting the stage for theoretical and methodological innovation Part I defines alternative theoretical and conceptual frameworks in LPP emphasizing developments since the ethnographic turn including ethnography in LPP historical discursive approaches ethics normative theorizing and transdisciplinary methods and the renewed focus on socio economic class Part II examines LPP against the background of influential ideas about language shaped by the

institutions of the nation state with close attention to the social position of minority languages and specific communities facing profound language policy challenges Part III investigates the turmoil and tensions that currently characterize LPP research under conditions of Late Modernity Finally Part IV presents an integrative summary and directions for future LPP research

Paradigm Shift in Language Planning and Policy Ettien Koffi, 2012-01-27 The book proposes a paradigm shift in language planning and language policy in Africa For the past fifty years the dominant model has been the hegemonic model whereby a language of wider communication LWC is imposed on minority languages It is now time for a paradigm shift in favor of a more egalitarian model in which all the languages spoken in the same country irrespective of their size are planned The paradigm shift concerns four critical areas status planning cost benefit planning acquisition planning and corpus planning Such a shift is justified for the following reasons First the hegemonic model has a dismal track record of success in Africa and elsewhere Second the hegemonic model exacerbates linguistic conflicts in many countries Consequently policy makers shun it for fear of jeopardizing the fragile social fabric in their respective countries Last a shift away from the hegemonic model is recommended because it is too costly to implement The democratic model is undergirded by the Strategic Game Theory proposed by David Laitin It forecasts a 3 1 language outcome for most African countries This outcome supports the three language formula now called for by the United Nations Development Program UNDP *Sociolinguistics / Soziolinguistik.
