Being as Symbol Stephen M. Fields,2000-12-13 One of the most important theologians of the modern era Karl Rahner is best known for his efforts to make Christianity credible in light of the intellectual questions of modern culture Stephen M Fields SJ now explains how Rahner developed his metaphysics as a creative synthesis of Thomism and the modern philosophical tradition Focusing on Rahner s core concept of the Realsymbol which posits all beings as symbolic Fields establishes the place of the Realsymbol in philosophical theories of the symbol He particularly concentrates on those key aspects of Rahner s metaphysics his theories of finite realities and language that have received insufficient attention By examining a wide range of Rahner s works in the context of twelve medieval modern and contemporary thinkers Fields locates the origins of this seminal thinker s metaphysics to an extent never before attempted He notes the correlations that exist between the Realsymbol and such work as Aquinas s theory of the sacraments Goethe s and Hegel s dialectics Moehler s view of religious language and Heidegger s aesthetics Through this analysis Fields reveals the structural core of Rahner s metaphysics and shows how art language knowledge religious truth and reality in general are all symbolic Being as Symbol opens new perspectives on this important thinker and positions him in the broader spectrum of philosophical thought

Deconstructionism Hector Davidson, Deconstructionism emerged in the late 20th century as a philosophical and literary movement that fundamentally questioned the nature of meaning language and interpretation It is primarily associated with the work of French philosopher Jacques Derrida who in the 1960s and 1970s began to develop ideas that would challenge long held assumptions in philosophy literary theory and critical thought The movement was a response to structuralism which sought to uncover the underlying structures that govern language and society In contrast deconstruction aimed to show that meaning is inherently unstable and that texts and concepts can never be fully fixed or understood in a singular unchanging way The foundational work of Jacques Derrida is central to deconstructionism His concept of diff rance a term he coined in 1968 highlighted the ways in which meaning is always deferred and never fully attainable Derrida s analysis of language showed that words and concepts derive meaning not from a stable inherent essence but from their relationships with other words In this sense meaning is always in flux and any attempt to pin it down is doomed to fail

Derrida s critique of binary oppositions such as presence absence speech writing and truth falsehood argued that these pairs are not neutral but are hierarchically structured with one term always subordinating the other Through works like De la grammatologie 1967 and La Voie et le Voice 1967 Derrida redefined how we understand texts insisting that they are always open to multiple interpretations **Language of Conflict** Natalia Knoblock,2020-06-11 Exploring the ways in which language and conflict are intertwined and interrelated this volume examines the patterns of public discourse in Ukraine and Russia since the beginning of the Ukrainian Crisis in 2014 It investigates the trends in language aggression evaluation persuasion and other elements of conflict communication related to the situation Through the analysis of the linguistic features of salient discourses and prevalent narratives constructed by different social groups Language of Conflict reflects competing worldviews of various stakeholders in this conflict and presents multiple often contradictory visions of the circumstances Contributors from Ukraine Russia and beyond investigate discursive representations of the most important aspects of the crisis its causes and goals participants and the values and ideologies of the opposing factions They focus on categorization stance framing de legitimation manipulation and coping strategies while analysing the ways in which the stress produced by social discord economic hardship and violence shapes public discourse Primarily focusing on informal communication and material gathered from online sources the collection provides insight into the ways people directly affected by the crisis think about and respond to it The volume acknowledges the communicators active role in constructing the often incompatible discursive images of the conflict and concentrates on the conscious and strategic use of linguistic resources in negative and aggressive communication **Language Machines** Leif Weatherby,2025-06-24 How generative AI systems capture a core function of language Looking at the emergence of generative AI Language Machines presents a new theory of meaning in language and computation arguing that humanistic scholarship misconstrues how large language models LLMs function Seeing LLMs as a convergence of computation and language Leif Weatherby contends that AI does not simulate cognition as widely believed but rather creates culture This evolution in language he finds is one that we are ill prepared to evaluate as what he terms remainder humanism counterproductively divides the human from the machine without drawing on established theories of representation that include both To determine the consequences of using AI for language generation Weatherby reads linguistic theory in conjunction with the algorithmic architecture of LLMs He finds that generative AI captures the ways in which language is at first complex cultural and poetic and only later referential functional and cognitive This process is the semiotic hinge on which an emergent AI culture depends Weatherby calls for a general poetics of computational cultural forms under the formal conditions of the algorithmic reproducibility of language Locating the output of LLMs on a spectrum from poetry to ideology Language Machines concludes that literary theory must be the backbone of a new rhetorical training for our linguistic computational culture **Monsters and Monstrosity in Media: Reflections on Vulnerability** Yeojin Kim,Shane Carreon,2024-04-16 As monstrous bodies on screen signal a wide

range of subversive destabilization of the notions of identity and community this anthology asks what meanings monsters and monstrosity convey in relation to our recent circumstances shaped by neoliberalism and the pandemic that have led to the intensified tightening of border controls by nation states the intensive categorization of un identifiable bodies and subsequent forms of isolations and detachments imposed by social distancing and the rapid transition of sociality from reality to virtual reality Presenting various thinkings along the lines of the body and its representations as cultural text together with popular or recent media productions showing various bodies deemed to be monstrous as they either cross conventionally held borders or stay in liminal spaces such as between human animal human machine virtual bodies corporeal flesh living death and other permeable borders this volume looks into the on screen constructions of the monster and monstrosity not only as they represent notions of difference perceived non belongings and disruptions of traditional identity markers but also as they either conceal various vulnerabilities or implicitly endorse violence towards the labeled Other
