Language vs. Reality N.J. Enfield, 2022-03-29 A

fascinating examination of how we are both played by language and made by language the science underlying the bugs and features of humankind s greatest invention Language is said to be humankind s greatest accomplishment But what is language actually good for It performs poorly at representing reality It is a constant source of distraction misdirection and overshadowing In fact N J Enfield notes language is far better at persuasion than it is at objectively capturing the facts of experience Language cannot create or change physical reality but it can do the next best thing reframe and invert our view of the world In *Language vs Reality* Enfield explains why language is bad for scientists who are bound by reality but good for lawyers who want to win their cases why it can be dangerous when it falls into the wrong hands and why it deserves our deepest respect Enfield offers a lively exploration of the science underlying the bugs and features of language He examines the tenuous relationship between language and reality details the array of effects language has on our memory attention and reasoning and describes how these varied effects power narratives and storytelling as well as political spin and conspiracy theories Why should we care what language is good for Enfield who has spent twenty years at the cutting edge of language research argues that understanding how language works is crucial to tackling our most pressing challenges including human cognitive bias media spin the post truth problem persuasion the role of words in our thinking and much more *Language, Thought, and Reality* Benjamin Lee Whorf, 1964 Explorations in Linguistic Relativity Martin Pütz, Marjolyn Verspoor, 2000 About a century after the year Benjamin Lee Whorf 1897 1941 was born his theory complex is still the object of keen interest to linguists Recently scholars have argued that it was not his theory complex itself but an over simplified reduced section taken out of context that has become known as the Sapir Whorf hypothesis that has met with so much resistance among linguists over the last few decades Not only did Whorf present his views much more subtly than most people would believe but he also dealt with a great number of other issues in his work Taking Whorf s own notion of linguistic relativity as a starting point this volume explores the relation between language mind and experience through its historical development Whorf s own writing its misinterpretations various theoretical and methodological issues and a closer look at a few specific issues in his work **Ideologies of Linguistic Relativity** Ferruccio Rossi-Landi, 2019-05-20 No detailed description available for *Ideologies of Linguistic Relativity* *A Reinterpretation of Linguistic Relativity* Guohui Jiang, 2020-12-03 As a vital issue not only of linguistics but also of cognitive sciences psychology neurosciences philosophy etc engaging in the study of the relation between language thought and reality the doctrine of linguistic relativity LR went through upsurge downturn renaissance during more than 80 years yet remains still unsolved puzzle for researchers of all these academic areas

Numerous treatises with valued ideas about this issue are continuously contributed to this theme nevertheless the study of LR has been stagnant up to nowadays The reason is that in my opinion the study has deviated from the right direction and this deviation might be boiled down to three basic concepts The expository scope of LR LR cannot and should not concern with a human speech thinking action at the level of human biological physiological traits b human behaviours in all fields of his everyday life and c human spiritual activities in the areas of science literature philosophy art etc LR will explain that constrained by the language ordinary people are not aware that the reality they talk think about does not coincide with the outside world they physically experience The relativity We should ponder the language thought reality relation in line with the original intention of Whorf when he proposed the principle of LR i e the relativity should not be interpreted as the discrepancy between customs modes of thinking and patterns of behavior of different linguistic communities on the basis of comparing peculiarities of their languages The language The doctrine of LR should concern with the human language as a complete and comprehensive system but not with a set of sporadically observed phenomena and certain random interpretation of them The linguistic intermediated world is eventually construed by the entire system of language rather than an assembly of peculiar language items **Language** Benjamin Lee Whorf,1964
