Language Through Literature:

Language Through Literature Paul Simpson, 1997 *Language Through Literature* provides a definitive introduction to the English language through the medium of English literature. Through the use of illustrations from poetry, prose and drama, this book offers a lively guide to important concepts and techniques in English language study. Among the many topics covered in the book are the form and meaning of words, the structure of narrative discourses and the organization of dialogue and conversation. Each chapter explores a specific aspect of the modern English language using a combination of exposition and practical activities. Each chapter also provides points for further discussion and includes project work for use individually or as part of a group. Readers will find the author's selection and presentation of topics helpful as Paul Simpson progressively widens the scope of topics from single words to the structure of whole conversations. *Language Through Literature* is designed for the non-specialist who is new to the study of the English language and will be particularly relevant to anyone interested in the relationship between the English language and English literature.

Studying Language through Literature Emilia Di Martino, Bruna Di Sabato, 2014-11-10 *Studying Language through Literature* invites readers to reconsider the opportunity represented by literary texts for language-related purposes. Despite the close relationship between literature and language in educational contexts, literature is frequently associated with teaching practices which have been judged to be unsuccessful. Subsequently, texts of the non-literary type are preferred on the basis that they are authentic and closer to real language. The everlasting relationship between language and literature is here reassessed starting from two assumptions: literature is the expression of an emphasized perception of reality, be it private, collective or pertaining to a certain temporal/spatial context; and literary language is language in its utmost form. Following an outline of the philosophy that governs the book, each chapter presents specific insights on the use of the various different literary genres, namely fiction, poetry and drama. The opportunities offered by translation in the foreign language classroom constitute a recurrent theme throughout the book, although Chapter 5 is entirely devoted to translation criticism. The closing pages put forward a few reflections on assessment. While offering some food for thought in order to reassess the role of literature in the language class, this book puts together ideas, considerations and suggestions from which the reader is free to pick, mix and adjust, exploiting them to her/his greatest benefit.
