Going the Distance David R. Jarraway, 2003-01-01 This bold new theoretical study explores dissident subjectivity that is the struggle for unique authorial identity in American literary discourse that has existed according to David Jarraway since the Romantics From Emerson s Experience remarking upon the focal distance within the actual horizon of human life to Toni Morrison s Nobel Prize address sanctifying the artist s sophisticated privileged space American literature has continuously recognized a necessary distance the gap between culturally accepted ideas of selfhood and the intractable reality of the self s never completed construction in time Jarraway s fascinating examination of modernist poets shows that engaging with this artistic space or going the distance empowers writers and their readers to create and perceive identities that resist the frozen certainties of conventional gender sexual and social roles Employing this theory with grace and precision Jarraway ranges through the dissident process in Gertrude Stein the cultural criticism of William Carlos Williams the deferred racialism of Langston Hughes the queer perversities of Frank O Hara and the spectral lesbian poetics of Elizabeth Bishop Bolstered further by insights from the pragmatism of William James through the cultural critique of Theodor Adorno to the queer theory of Judith Butler the author challenges his audience with politically engaged insistence on the life affirming potentialities of human subjectivity in literature His passionate conclusion demonstrates the liberating fluidity of self made possible by feminist chartings of modern identity s depths Lucidly composed theoretically sophisticated and up to the minute Going the Distance painstakingly recovers the dissident American subjective in modernist literary discourse within its fullest cultural context Jarraway s readings are a major contribution to poetry scholarship and to cultural studies that will provoke further investigations into the history of subjectivity in American literature as a whole

redefines the importance of late modernism in American literary history The late modernist writers Lowney studies most closely Muriel Rukeyser Elizabeth Bishop Langston Hughes Gwendolyn Brooks Thomas McGrath and George Oppen are not all customarily associated with the 1930s nor are they commonly seen as literary peers By examining these late modernist writers comparatively Lowney foregrounds differences of gender and sexuality race and ethnicity and social class and region while emphasizing how each writer developed poetic forms that responded to the cultural politics and socioaesthetic debates of the 1930s In so doing he calls into question the boundaries that have limited the scholarly dialogue about modern poetry No other study of American poetry has considered the particular gathering of careers that Lowney considers As poets whose collective historical consciousness was profoundly shaped by the turmoil of the Depression and war years and the Cold War s repression or rewriting of history their diverse talents represent a distinct generational impact on U S and international literary history
