Language, Negotiation and Peace Patricia Friedrich, 2007-07-01 The end of the twentieth and beginning of the twenty first centuries have witnessed a large scale increase in demands for international peace keeping mechanisms Because of a complex history of spread and power English has become the de facto lingua franca of international communication and negotiation and the inevitable accompaniment to this is the growth in hostility against the perceived imperialism of the English language This book argues that the growth of English es as a lingua franca has the potential to foster closer bonds between communities countries and continents Using the background methodology of Peace Studies Patricia Friedrich applies political theory to linguistic evidence to show how English can be instrumental both in the restoration of peace and in the building of social justice In this analysis the language classroom emerges as a central site in conflict prevention A fascinating innovative study of the place of the English language in the modern world this book will be of interest to academics researching applied linguistics or world Englishes

Language and Power. The Implications of Language for Peace and Development Birgit Brock-Utne, Gunnar Garbo, 2009-09-15

Language is a tool used to express thoughts to hide thoughts or to hide lack of thoughts It is often a means of domination The question is who has the power to define the world around us This book demonstrates how language is being manipulated to form the minds of listeners or readers Innocent words may be used to conceal a reality which people would have reacted to had the phenomena been described in a straightforward manner The nice and innocent concept cost sharing which leads our thoughts to communal sharing and solidarity may actually imply privatization The false belief that the best way to learn a foreign language is to have it as a language of instruction actually becomes a strategy for stupidification of African pupils In this book 33 independent experts from 16 countries in the North and the South show how language may be used to legitimize war making promote Northern interests in the field of development and retain colonial speech as languages of instruction languages of the courts and in politics The book has been edited by two Norwegians Birgit Brock Utne is a professor at the University of Oslo and a consultant in education and development From 1987 until 1992 she was a professor at the University of Dar es Salaam Gunnar Garbo author and journalist and former member of the Norwegian Parliament was the Norwegian Ambassador to Tanzania from 1987 to 1992

Paradoxes of Peace in Nineteenth Century Europe Thomas Hippler, Miloš Vec, 2015-02-19. Peace is often simplistically assumed to be war's opposite and as such is not examined closely or critically idealized in the literature of peace studies; its crucial role in the justification of war is often overlooked. Starting from a critical view that the value of restoring peace or keeping peace is and has been regularly used as a pretext for military intervention, this book traces the conceptual history of peace in nineteenth century legal and political practice. It explores the role of the value of peace in shaping the public rhetoric and legitimizing action in general international relations, international law, international trade, colonialism and armed conflict. Departing from the assumption that there is no peace as such nor can there be, it examines the contradictory visions of peace that arise from conflict. These conflicting and antagonistic visions of peace are each linked to a set of motivations and interests as well as to a certain vision of legitimacy within the international realm. Each of them inevitably conveys the image of a specific enemy that has to be crushed in order to peace being installed. This book highlights the contradictions and paradoxes in nineteenth century discourses and practices of peace, particularly in Europe.
