Language And Woman's Place:

Language and Woman's Place Robin Tolmach Lakoff, 1975 In this original investigation Robin Lakoff uncovers those roots of our language that classify and delineate the sexes Why are parallel words one applying to masculine beings the other to feminine not also parallel in their range of use and connotation Why have bachelor spinster or master mistress come to mean such widely different things Language and woman's place points out this parallelism as symptomatic of the nonparallelism in the roles of the sexes and as further reinforcement of a social disparity Description del editor

subject English Language and Literature Studies Linguistics grade 1 3 Queen s University Belfast School of English course Sociolinguistics 10 entries in the bibliography language English abstract Already in the 1960s and 70s have feminist linguistics started to examine language on the basis of gender questions Numerous works focused on the problem whether women are discriminated through a more powerful male language use and how sexist language might be avoided Within the subject several different theories arose This essay will at first demonstrate the development process of two main theories dealing with gender and language the so called dominance and the difference theory and afterwards assess their adequacy in explaining linguistic behaviour in gender interaction In 1973 Robin LAKOFF a feminist linguist at the University of California laid the foundations for a methodical and academic research on the subject of women s language Her most important works Language and Woman s Place and Women s Language threw light upon the possibility of discrimination through language use A very important example for such a case might be LAKOFF s observation of the way how women see themselves and which role they are holding within the American society Thus LAKOFF does not only examine the specific language used by women but also the language used about women Since language is guided by our thoughts she considers it to be a mirror of the speaker s subconsciousness In order to investigate this phenomenon more closely LAKOFF scrutinized her own expressions as well as expressions of friends and acquaintances Furthermore she analysed conversations in the television programme As the field of this small study was very restricted no universality is claimed for its results but as an outcome several criteria are established that are seen as typical for women s language These standards are as follows

Discourses of Ageing and Gender Clare Anderson, 2018-08-25 This book presents in depth investigation of the language used about women and ageing in public discourse and compares this with the language used by women to express their personal lived experience of ageing It takes a linguistic approach to identify how messages contained in public discourse influence how individual women evaluate their own ageing and particularly their ageing appearance It begins by establishing the wider cultural context that produces prevailing attitudes to women before turning to an analysis of representations of the ageing female body in beauty and cosmetic advertising and the lifestyle media The focus then moves to a detailed investigation of women's own perceptions of the process of ageing and of their ageing appearance as revealed through their personal narratives The final chapters challenge dominant attitudes to women and ageing by presenting two case studies of women who for different reasons and in different ways refuse to conform to cultural expectations This work provides a platform for further academic research in the fields of linguistics gerontology gender and media studies as well as offering meaningful applications in the wider domains of business and advertising
