## **Language Options:**

*Language Choices* Martin Pütz, 1997-02-13 This volume is about various aspects of the theory and application of language contact and language conflict phenomena seen from an interdisciplinary perspective The focus is on the linguistic social psychological and educational issues conditions constraints and consequences involved in the status and use of languages in multilingual settings The book is divided into four sections dealing with the following areas Theoretical issues This section addresses key issues such as the nature of the concepts of language maintenance language loyalty and language identity language shift language loss and language death It includes the search for models of the often contradictory theoretical issues involved in language contact Language policy and language planning This section examines the various language policies carried out by official agencies and focuses on the two basic options available to a multilingual nation assimilation or pluralism Attitudes towards languages The section is geared towards research into determinants of language attitudes the methods for the measurements of attitudes as well as the relationship between language policy and attitude change Codeswitching and language choice The linguistic social psychological and anthropological implications of using two different codes will be examined from different perspectives Relevant research topics include the situational uses of code switching linguistic and social constraints on codeswitching and code switching vs borrowing A further research paradigm deals with the search for relativized constraints resulting from the interaction of universal principles and aspects particular to each codeswitching situation

Language Contact Yaron Matras, 2009-09-10 Most societies in today's world are multilingual Language contact occurs when speakers of different languages interact and their languages influence each other This book is an introduction to the subject covering individual and societal multilingualism the acquisition of two or more languages from birth second language acquisition in adulthood language change linguistic typology language processing and the structure of the language faculty It explains the effects of multilingualism on society and language policy as well as the consequences that long term bilingualism within communities can have for the structure of languages Drawing on the author's own first hand observations of child and adult bilingualism the book provides a clear analysis of such phenomena as language convergence grammatical borrowing and mixed languages

*A Tri-Generational Study of Language Choice and Shift in Port Harcourt* Kelechukwu Ihemere, 2007-05 This book is intended as a textbook for advanced undergraduate or graduate students in the field of bilingualism and language choice It reports on a sociolinguistic study of the language choice patterns of the minority Ikwerre ethnic group of Port Harcourt City Nigeria Further it aims primarily to present a systematic and coherent account of the extent and patterning of Ikwerre NPE bilingualism within the Ikwerre community focusing on the means by which people in this community deploy two different codes in their day to day communicative interactions and the social and attitudinal motivations for language choice at both the group and individual level To satisfy these objectives this study has taken into account the pre existing linguistic socio economic and macro sociological distinctiveness of the

Ikwerre community Thus it has investigated prevailing local attitudes towards Ikwerre and NPE by incorporating matched guise tests to deepen our understanding of the processes of language choice and shift operating in the community This was done to demonstrate that contemporary local linguistic attitudes working together with personal network ties would offer fuller and more adequate explanations of why members of the Port Harcourt Ikwerre community select either Ikwerre and or NPE in their normal every day interactions From the observations and findings made in this study I propose an account of the language choice patterns attested in my Port Harcourt Ikwerre community data that is based on establishing a broad typology which can be directly related to the bilingualism continuum This framework should be equally applicable to similar bilingual settings around the world which like Port Harcourt have experienced rapid metropolitan growth as a result of radical socio economic change in their recent history Finally it is my hope that in the course of reading this book the reader can come to a place where their understanding and appreciation of the effects of languages in contact in non Western communities is enriched with the illustrative material in this book
