Language Structures in Contrast Robert J. Di Pietro, 1971 Language Structures in Contrast Robert J. Di Pietro, 1971 Patterns in Contrast Jarle Ebeling, Signe Oksefjell Ebeling, 2013-09-17 Combining the fields of phraseology and contrastive analysis this book describes how patterns defined as recurrent word combinations with semantic unity behave cross linguistically As the contrastive approach adopted in the book relies on translations and a bidirectional corpus model the first part offers an in depth discussion of contrastive linguistics with special emphasis on using translations as tertium comparationis and a parallel corpus as the main source of material Central to the contrastive analysis is the use of corpus linguistic methods in the identification of patterns while a deeper understanding of the phraseological nature of the patterns is closely related to the concept of extended units of meaning The second part of the book presents five case studies using an easy to follow step by step method to illustrate the phraseological contrastive approach at work The studies show that patterns weave an intricate web of meanings across languages and demonstrate the potential of exploring patterns in contrast **On the Role of Contrast in Information Structure** Jorina Brysbaert, Karen Lahousse, 2024-06-04 In research on Information Structure there is an ongoing discussion about the role of contrast While most linguists consider contrast to be compatible with both focus and topic some argue that it is an autonomous IS category Contrast has been shown to be encoded by different linguistic means such as specific morphemes adverbials clefts prosodic cues Hence this concept is also related to other domains in particular morphosyntax and prosody The precise way in which they interact is however not yet entirely clear Moreover from a methodological point of view the identification and annotation of contrast in corpora is not straightforward This volume provides a selection of articles discussing the definition of contrast the importance of distinguishing different types of contrast the use of several encoding strategies and the annotation of contrast in corpora using the Question Under Discussion Model The contributions offer data on English French French Belgian Sign Language German Hindi Italian and Spanish **Lexis in Contrast** Bengt Altenberg, Sylviane Granger, 2002 This volume takes stock of current research in contrastive lexical studies It reflects the growing interest in corpus based approaches to the study of lexis in particular the use of multilingual corpora shared by researchers working in widely differing fields contrastive linguistics lexicology lexicography terminology computational linguistics and machine translation The articles in the volume which cover a wide diversity of languages are divided into four main sections the exploration of cross linguistic equivalence contrastive lexical semantics corpus based multilingual lexicography and translation and parallel concordancing The volume also contains a lengthy introduction to recent trends in contrastive lexical studies written by the editors of the volume Bengt Altenberg and Sylviane Granger **Deconstructing Language Structure and Meaning** Mihaela Tănase-Dogaru, Alina Tigău, Mihaela Zamfirescu, 2021-07-01 This volume brings together a number of researchers working on generative syntax and semantics
