Grant, 2020-01-10 Every language has been influenced in some way by other languages In many cases this influence is reflected in words which have been absorbed from other languages as the names for newer items or ideas such as perestroika manga or intifada from Russian Japanese and Arabic respectively In other cases the influence of other languages goes deeper and includes the addition of new sounds grammatical forms and idioms to the pre existing language For example English s structure has been shaped in such a way by the effects of Norse French Latin and Celtic though English is not alone in its openness to these influences Any features can potentially be transferred from one language to another if the sociolinguistic and structural circumstances allow for it Further new languages pidgins creoles and mixed languages can come into being as the result of language contact In thirty three chapters *The Oxford Handbook of Language Contact* examines the various forms of contact induced linguistic change and the levels of language which have provided instances of these influences In addition it provides accounts of how language contact has affected some twenty languages spoken and signed from all parts of the world Chapters are written by experts and native speakers from years of research and fieldwork Ultimately this Handbook provides an authoritative account of the possibilities and products of contact induced

The Diachrony of Written Language Contact Nikolaos Lavidas, 2021-12-13 Nobody can deny that an account of grammatical change that takes written contact into consideration is a significant challenge for any theoretical perspective. Written contact of earlier periods or from a diachronic perspective mainly refers to contact through translation. The present book includes a diachronic dimension in the study of written language contact by examining aspects of the history of translation as related to grammatical changes in English and Greek in a contrastive way. In this respect, emphasis is

placed on the analysis of diachronic retranslations the book examines translations from earlier periods of English and Greek in relation to various grammatical characteristics of these languages in different periods and in comparison to non translated texts

Language Contact in Europe Bridget Drinka,2017-02-16 This comprehensive new work provides extensive evidence for the essential role of language contact as a primary trigger for change Unique in breadth it traces the spread of the periphrastic perfect across Europe over the last 2 500 years illustrating at each stage the micro responses of speakers and communities to macro historical pressures Among the key forces claimed to be responsible for normative innovations in both eastern and western Europe is roofing the superstratal influence of Greek and Latin on languages under the influence of Greek Orthodoxy and Roman Catholicism respectively The author provides a new interpretation of the notion of sprachbund presenting the model of a three dimensional stratified convergence zone and applies this model to her analysis of the have and be perfects within the Charlemagne sprachbund The book also tackles broader theoretical issues for example demonstrating that the perfect tense should not be viewed as a universal category

Language Contacts at the Crossroads of Disciplines Lea Meriläinen,Heli Paulasto,Helka Riionheimo,2015-01-12 This volume offers a cross disciplinary insight into language contact research bringing together fresh empirical and theoretical studies from various fields concerning different dimensions of language contact and variation second language acquisition and translation In the present day world of globalization population mobility and information technology the themes of multilingualism and contact induced language change are as topical as ever and research on language contacts and cross linguistic influence has expanded rapidly during the last few decades Along with the increasing specialization of related disciplines their research perspectives methods and terminology have become dispersed although language contact phenomena themselves can rarely be confined within the scope of a single discipline This collection of articles creates dialogue between researchers from

different scientific backgrounds thus viewing language contact phenomena from a broader perspective When language contact is re defined to include the mental or cognitive level of contact between different languages and varieties in the minds of language learners or translators salient links are created between the different disciplines dealing with this subject matter **The Cambridge Handbook of Language Contact** Salikoko Mufwene, Anna Maria Escobar, 2022-06-30

Language Contact and Contact Languages Peter Siemund, Noemi Kintana, 2008-08-21 This new volume on language contact and contact languages presents cutting edge research by distinguished scholars in the field as well as by highly talented newcomers It has two principal aims to analyze language contact from different perspectives notably those of language typology diachronic linguistics language acquisition and translation studies and to describe explain and elaborate on universal constraints on language contact The individual chapters offer systematic comparisons of a wealth of contact situations and the book as a whole makes a valuable contribution to deepening our understanding of contact induced language change With its broad approach this work will be welcomed by scholars of many different persuasions

Language Contact. Volume 2 Jeroen Darquennes, Joseph C. Salmons, Wim Vandenbussche, 2025-04-21 Targeting a full range of students and scholars this volume provides a total of 50 chapters illustrating the linguistic dynamics and the dynamics of inter individual and societal language contact as well as the dynamics of multidisciplinary language contact studies Fueled by a wealth of data from a rich variety of contact situations its geographically balanced case studies are governed by the triangulation between a focus on language structure and change a sincere drive of sociopolitical and academic agency and the confrontation with an everyday reality that can be unkind to and ignorant of those two factors The volume clearly demonstrates the social relevance of our trade in a time burdened with ecolinguistic challenges Shared Grammaticalization Martine Irma Robbeets, Hubert Cuyckens, 2013 This book offers fresh perspectives on shared grammaticalization a state whereby two or more languages have the source and the target of a grammaticalization process in common While contact induced grammaticalization has generated great interest in recent years far less attention has been

paid to other factors that may give rise to shared grammaticalization This book intends to put this situation right by approaching shared grammaticalization from an integrated perspective including areal as well as genealogical and universal motivations and by searching for ways to distinguish between these factors The volume offers a wealth of empirical facts presented by internationally renowned specialists on the Transeurasian languages i e Japonic Koreanic Tungusic Mongolic and Turkic the languages in focus as well as on various other languages Shared Grammaticalization will appeal to scholars and advanced students concerned with linguistic reconstruction language contact and linguistic typology and to anyone interested in grammaticalization theory **Diachronic Slavonic Syntax** Imke Mendoza,Sandra Birzer,2022-03-21 The impact of the ecclesiastical languages Greek Latin and Church Slavonic on the Slavic standard languages still lacks a systematic analysis in the theoretical framework of contact linguistics Based on corpus data this volume offers an account in the light of literacy language contact i e contact between varieties that are used only in a written variant and only in formal registers Latin was used as literary language in medieval Slavia Romana Greek was the source language for Church Slavonic which in turn was the literary language for many Slavonic speaking communities and thus had an enormous impact on the development of the modern Slavonic standard languages The book offers in depth analyses of the impact of Latin on pre Standard Slavonic varieties the influence of Greek on Old Church Slavonic and the role of Church Slavonic as a source language for Old and Modern Russian The contributions discuss morpho syntactic phenomena such as non finite clauses relative clauses word order the use and function of case and tense forms The volume addresses Slavists General linguists and scholars of Classical Philology interested in language contact and syntactic issues The Routledge Handbook of Translation and Cognition Fabio Alves,Arnt Jakobsen,2020-05-31 The Routledge Handbook of Translation and Cognition provides a comprehensive state of the art overview of how translation and cognition relate to each other discussing the most important issues in the fledgling sub discipline of Cognitive Translation Studies CTS from foundational to applied aspects With a strong focus on interdisciplinarity the handbook surveys concepts and methods in neighbouring disciplines that are concerned with cognition and how they relate to translational activity from a cognitive perspective Looking at different types of cognitive processes this volume also ventures into emergent areas such as neuroscience artificial intelligence cognitive ergonomics and human computer interaction With an editors introduction and 30 chapters authored by leading scholars in the field of Cognitive Translation Studies this handbook is the essential reference and resource for students and researchers of translation and cognition and will also be of interest to those working in bilingualism second language acquisition and related areas **Language contact** Rik van Gijn,Hanna Ruch,MAx Wahlström,Anja Hasse,2023-09-28 Contact linguistics is the overarching term for a highly diversified field with branches that connect to such widely divergent areas as historical linguistics typology sociolinguistics psycholinguistics and grammatical theory Because of this diversification there is a risk of fragmentation and lack of interaction between the different subbranches of contact linguistics Nevertheless the different

approaches share the general goal of accounting for the results of interacting linguistic systems This common goal opens up possibilities for active communication cooperation and coordination between the different branches of contact linguistics This book therefore explores the extent to which contact linguistics can be viewed as a coherent field and whether the advances achieved in a particular subfield can be translated to others In this way our aim is to encourage a boundary free discussion between different types of specialists of contact linguistics and to stimulate cross pollination between them

Multilingual Individuals and Multilingual Societies Kurt Braunmüller, Christoph Gabriel, 2012-08-22 The 25 contributions of this volume represent a selection from the more than 120 papers originally presented at the International Conference on Multilingual Individuals and Multilingual Societies MIMS held in Hamburg October 2010 and organized by the Collaborative Research Center Multilingualism after twelve years of successful research It presents a panorama of contemporary research in multilingualism covering three fields of investigation 1 the simultaneous and successive acquisition of more than one language including language attrition in multilingual settings 2 historical aspects of multilingualism and variance and 3 multilingual communication The papers cover a vast variety of linguistic phenomena including morphology syntax segmental and prosodic phonology as well as discourse production and language use taking both individual and societal aspects of multilingualism into account The languages addressed include numerous Romance Slavic and Germanic varieties as well as Welsh Hungarian Turkish and several South African autochthonous languages

Language Contact and Linguistic Aspects of Bilingualism Longxing Wei, 2024-07-24 This book consolidates earlier insights and proposes a model of contact linguistics and an innovative approach to the study of bilingualism It explores the nature of major language contact phenomena especially lexical borrowing mixed languages bilingual lexical and grammatical processing and representations second language acquisition codeswitching and interlanguage It examines the universal principles governing grammatical structures of languages in contact and differentiates the lexical and grammatical features of morphemes as outcomes of language contact The proposed approach describes and explains some outstanding linguistic aspects of bilingualism with a focus on the mechanisms of the bilingual mind during bilingual processing and production at several levels of abstract lexical structure Abundant naturally occurring examples support the claim that the languages in contact are never equally activated and that language specific abstract entries in the bilingual mental lexicon are in contact resulting in mutual influence during codeswitching second language learning and interlanguage development

Slavic on the Language Map of Europe Andrii Danylenko, Motoki Nomachi, 2019-10-08 Conceptually the volume focuses on the relationship of the three key notions that essentially triggered the inception and subsequent realization of this project to wit language contact grammaticalization and areal grouping Fully concentrated on the areal typological and historical dimensions of Slavic the volume offers new insights into a number of theoretical issues including language contact grammaticalization mechanisms of borrowing the relationship between areal genetic and typological sampling conservative features versus innovation and socio linguistic aspects of

linguistic alliances conceived of both synchronically and diachronically The volume integrates new approaches towards the areal typological profiling of Slavic as a member of several linguistic areas within Europe including SAE the Balkan Sprachbund and Central European groupings s like the Danubian or Carpathian areas as well as the Carpathian Balkan linguistic macroarea Some of the chapters focus on structural affinities between Slavic and other European languages that arose as a result of either grammatical replication or borrowing A special emphasis is placed on contact induced grammaticalization in Slavic micro languages
