Language Elites And The State:

Language, Elites, and the State Amílcar A. Barreto, 1998-02-28 For decades the U S territory of Puerto Rico and the Canadian province of Quebec have been riveted by the politics of nationalism the question of their final status and the protection of their local languages In the name of cultural defense the legislatures in San Juan and Quebec City have passed several laws focusing on protecting the vernacular Barreto explores these two cases and challenges some general preconceived notions about nationalist movements A common premise in ethnic conflict studies is that nationalism is caused by cultural traits such as language or religion or is a result of a region s subservient economic role vis vis the country s core However Barreto contends that Puerto Rican and Québécois elites turned to nationalism in reaction to their social marginalization and economic suppression Anglophone elites in the U S and Canada established a hegemonic order making English a requirement for social and economic ascendancy Shunned by the country s dominant group on account of their language elites in Puerto Rico and Quebec took up the banner of nationalism attempting to establish a counter hegemonic order Thus nationalism Barreto contends is an unanticipated reaction to the exclusionary attitudes and policies of one group against another This analysis is important to political scientists social scientists and researchers involved with nationalism ethnic conflict and Puerto Rican and Canadian studies *Elites, Language, and the Politics of Identity* Gregg

Bucken-Knapp, 2012-02-01 Why and when do linguistic cleavages within a nation become politicized Using Norway where language has played a particularly salient role in the nation s history as a case study Gregg Bucken Knapp explores these questions and challenges the notion that the politicization of language conflict is a response to language problems He shows that political elites often view language conflict as a political opportunity placing it on the policy agenda as an effective mobilizing tool to serve their own nonlinguistic political ends Although language oriented interest groups may fight to achieve desired language policies they are generally unsuccessful when their preferences clash with the broader objectives of political elites This book focuses on understanding just how language policies emerge **Language, Ethnic Identity and the State** William Safran, J.A. Lapointe, 2014-02-04 This new study powerfully asserts the pivotal importance of the

interplay between language and ethnicity which is often underestimated as a component for political stability These leading scholars present five key case studies of South Africa Algeria Canada Latvia and Senegal All five countries are multilingual nations where language has been a central political issue that has challenged their unity and stability These studies are underpinned by two general comparative and theoretical discussions which analyse how scholars consider social class and economic factors to be the primary sources for political cohesion or of malcontent with the system and the new avenues opened by a focus on issues of language This book will be of great interest to all students and scholars of linguistics language politics and sociology This is a special issue of the leading journal *Nationalism and Ethnic Politics* *The Polish Elite and Language Sciences* Tomasz Zarycki, 2022-07-14 This book revisits the modern history of Poland from the perspective of its

social sciences The book makes this case study a model for the application of Bourdieu's approach to the historical analysis of non-core Western societies The book is in other words a reflexive study of the application of Bourdieu's social theory At the same time it also critically studies the application of Western social theory in Poland which is largely seen as a peripheral country The study of Polish social sciences with particular emphasis on linguistics and literary studies points to the peculiar dynamics of peripheral intellectual and academic fields and their external dependencies These insights offer a critical extension of Bourdieu's theory of state and social elites beyond the Western core focusing on how the theories can be used in the reinterpretation and expansion of post-colonial theory global history and comparative studies of post-communism The book will be suitable for scholars and students of all those interested in the social theory of Pierre Bourdieu global historical sociology societies in Central and Eastern socio-linguistics literary studies and political sociology

State-Building and Multilingual Education in Africa Ericka A. Albaugh, 2014-04-24 How do governments in Africa make decisions about language What does language have to do with state building and what impact might it have on democracy This manuscript provides a longue dure explanation for policies toward language in Africa taking the reader through colonial independence and contemporary periods It explains the growing trend toward the use of multiple languages in education as a result of new opportunities and incentives The opportunities incorporate ideational relationships with former colonizers as well as the work of language NGOs on the ground The incentives relate to the current requirements of democratic institutions and the strategies leaders devise to win elections within these constraints By contrasting the environment faced by African leaders with that faced by European state builders it explains the weakness of education and limited spread of standard languages on the continent The work combines constructivist understanding about changing preferences with realist insights about the strategies leaders employ to maintain power

Elite Origins of Democracy and Development in the Muslim World Michael T. Rock,Soli Özel,2023-12-01 Using an elite consensus conflict analytical frame this book examines why some majority Muslim countries perform so much better at democracy and or development than others questioning received wisdoms that Islam authoritarianism and underdevelopment go together Identifying four distinct democracy and development outcomes in the Muslim world four case studies are interrogated to show that there is more variability in democracy and development outcomes in Muslim majority countries than macro historical studies and aggregate data have shown By demonstrating that democracy and development outcomes in Muslim countries are the consequence of elite conflict and elite consensus rather than the precepts or institutions of Islam the book places the competition for power among contending elites rather than Islam at the center of the story of democracy and development in the Muslim world This book will be of key interest to scholars and students of political development development studies democratization and autocratization studies democracy promotion and more broadly comparative politics

Politics and the Slavic Languages Tomasz Kamusella, 2021-06-17 During the last two centuries ethnolinguistic nationalism has been the norm of nation building and state building in Central Europe The number of recognized Slavic languages in line with the normative political formula of language nation state gradually tallied with the number of the Slavic nation states especially after the breakups of Czechoslovakia the Soviet Union and Yugoslavia But in the current age of borderless cyberspace regional and minority Slavic languages are freely standardized and used even when state authorities disapprove As a result since the turn of the 19th century the number of Slavic languages has varied widely from a single Slavic language to as many as 40 Through the story of Slavic languages this timely book illustrates that decisions on what counts as a language are neither permanent nor stable arguing that the politics of language is the politics in Central Europe The monograph will prove to be an essential resource for scholars of linguistics and politics in Central Europe

The Politics of Nation-Building Harris Mylonas, 2013-02-18 What drives a state's choice to assimilate accommodate or exclude ethnic groups within its territory In this innovative work on the international politics of nation

building Harris Mylonas argues that a state's nation building policies toward non core groups individuals perceived as an ethnic group by the ruling elite of a state are influenced by both its foreign policy goals and its relations with the external patrons of these groups Through a detailed study of the Balkans Mylonas shows that how a state treats a non core group within its own borders is determined largely by whether the state's foreign policy is revisionist or cleaves to the international status quo and whether it is allied or in rivalry with that group's external patrons Mylonas injects international politics into the study of nation building building a bridge between international relations and the comparative politics of ethnicity and nationalism
