Handbook to Life in Prehistoric Europe Jane McIntosh, 2009 For most of Europe s long past we have no writing no named individuals no recorded deeds This means that its history is almost entirely that of the ordinary individual the hunter gatherer farmer or metallurgist rather than the king Evidence of privileged elites and material splendor is not lacking however The skills and expertise of prehistoric Europeans were often employed in the production of exquisite jewelry elaborately woven cloth beautifully made tools and finely wrought weapons Though the palaces that have attracted excavators in other lands are absent there are few monuments elsewhere in the world to rival Europe s massive megalithic tombs or great stone circles And though individuals preserve their anonymity and many of their secrets modern technology has made it possible to reveal parts of their life history in astonishing detail Handbook to Life in Prehistoric Europe gathers the results of recent archaeological discoveries and scholarly research into a single accessible volume Organized thematically the handbook covers all aspects of life in prehistoric Europe including the geography of the continent settlement trade and transport industry and crafts religion death and burial warfare language the arts and more Complemented with more than 75 illustrations and maps the result is a fascinating introduction to the 7 000 year period that immediately preceded the Roman Empire *Archaeology and Language* Colin Renfrew, 1990-01-26 In this book Colin Renfrew directs remarkable new light on

the links between archaeology and language looking specifically at the puzzling similarities that are apparent across the Indo European family of ancient languages from Anatolia and Ancient Persia across Europe and the Indian subcontinent to regions as remote as Sinkiang in China Professor Renfrew initiates an original synthesis between modern historical linguistics and the new archaeology of cultural process boldly proclaiming that it is time to reconsider questions of language origins and what they imply about ethnic affiliation issues seriously discredited by the racial theorists of the 1920s and 1930s and as a result largely neglected since Challenging many familiar beliefs he comes to a new and persuasive conclusion that primitive forms of the Indo European language were spoken across Europe some thousands of years earlier than has previously been assumed

Koch,Mikael Fauvelle,Barry Cunliffe,Johan Ling,2025-05-31 Challenges the terrestrial focus of European prehistory emphasizing the significance of seascapes maritime networks and coastal societies in shaping prehistoric Europe For many years now the main thrust of European prehistory has followed a fundamentally terrestrial plot line This terrestrial paradigm has undervalued the story of Europe as a peninsula between the Baltic Mediterranean and Atlantic and likewise downplayed that of many navigable rivers that reach deeply inland and the large lakes important for travel and subsistence In vast areas of Europe the survival of incoming groups depended on coping and interacting with a

seascape as much as a landscape From the late Mesolithic onwards in regions such as Scandinavia the British Isles and the Mediterranean most occupation was coastal seas or rivers provided the most important infrastructure for transport exchange and communication Know how about seascapes boatbuilding navigation and maritime networks had a profound impact on social organisation ritual monuments and iconography and the spread of materials and ideas enabled by the adaptation of languages to these new environments Given these facts the time is long overdue to critique the dominant terrestrial paradigm of European prehistory This book is the first in the multi author series Maritime Encounters outputs of the major six year 2022 2028 international research initiative funded by Sweden s central bank Our programme is based on a maritime perspective a counterpoint to prevailing land based vantages on Europe s prehistory In the Maritime Encounters project a highly international cross disciplinary team has embarked on a diverse range of research goals to provide a more detailed and nuanced story of how prehistoric societies realised major and minor sea crossings organised long distance exchange and adapted to ways of life by the sea in prehistory
