Fate Logic And Time:

Fate, Logic, and Time Steven M. Cahn, 2004-04-07 This book is the first full length treatment of the philosophical problem of fatalism the thesis that the laws of logic alone suffice to prove that no person ever acts freely After a critical examination of the history of the problem from Aristotle through Stoic and medieval thought Cahn analyzes contemporary discussions of the issue revealing how a belief in free will is logically connected to specific assumptions about the truth value of propositions and the nature of time

Time Matters T.M. Rudavsky, 2012-02-01 Despite the importance of time and cosmology to Western thought surprisingly little attention has been paid to these issues in histories of Jewish philosophy Focusing on how medieval philosophers constructed a philosophical theology that was sensitive to religious constraints and yet also incorporated compelling elements of science and philosophy T M Rudavsky traces the development of the concepts of time cosmology and creation in the writings of Ibn Gabirol Maimonides Gersonides Crescas Spinoza and others

Responsibility Matters Peter A. French, 1992 Most of us spend a fair amount of time trying to avoid responsibility That s not too astounding What is surprising says Peter French is that we tend to dodge the good variety as well as the bad

Time and the Shape of History P. J. Corfield, 2007-01-01 In this lively comedy of love and money in sixteenth century Venice Bassanio wants to impress the wealthy heiress Portia but lacks the necessary funds He turns to his merchant friend Antonio who is forced to borrow from Shylock a Jewish moneylender When Antonio s business falters repayment becomes impossible and by the terms of the loan agreement Shylock is able to demand a pound of Antonio s flesh Portia cleverly intervenes and all ends well except of course for Shylock

Process and Analysis George W. Shields, 2012-02-01 Process and Analysis brings together an unprecedented collection of the world s leading contemporary process and analytic philosophers to explore philosophical topics of common interest The contributors examine a wide variety of explicit and implicit commonalities and differences of approach to such central philosophical issues as the nature and status of events time space relations particulars and God This unique collection demonstrates that both traditions have important things to say to one another In fact a largely ignored conversation between the two traditions has been carried on since at least the days of Whitehead s influence on early Cambridge analytic philosophy This long awaited volume is an invaluable research tool for scholars and students alike working in the areas of analytic and process philosophy

The Arrows of Time Laura Mersini-Houghton, Rudy Vaas, 2012-05-30 The concept of time has fascinated humanity throughout recorded history and it remains one of the biggest mysteries in science and philosophy Time is clearly one of the fundamental building blocks of the universe and thus a deeper understanding of nature at a fundamental level also demands a comprehension of time Furthermore the origins of the universe are closely intertwined with the puzzle of time Did time emerge at the Big Bang Why does the arrow of time conspire with the order of the initial state of the universe This book addresses many of the most important questions about time What is time and is it fundamental or emergent Why is there such an arrow of time closely

related to the initial state of the universe and why do the cosmic thermodynamic and other arrows agree These issues are discussed here by leading experts and each offers a new perspective on the debate Their contributions delve into the most difficult research topic in physics also describing the latest cutting edge research on the subject The book also offers readers a comparison between the different outlooks of philosophy physics and cosmology on the puzzle of time This volume is intended to be useful for research purposes but most chapters are also accessible to a more general audience of scientifically educated readers looking for deeper insights

Freedom, Fatalism, and Foreknowledge John Martin Fischer, Patrick Todd, 2015 The book collects previously published articles on fatalism and the relationship between divine foreknowledge and human freedom and includes a substantial introductory essay and bibliography The introductory essay seeks to provide an analytic framework for the articles and it highlights connections between free will and recent work on metaphysical dependence

A Primer on Determinism John Earman, 1986-08-31 The title of this work is to be taken seriously it is a small book for teaching students to read the language of determinism Some prior knowledge of college level mathematics and physics is presupposed but otherwise the book is suitable for use in an advanced undergraduate or beginning graduate course in the philosophy of science While writing I had in mind primarily a philosophical audience but I hope that students and colleagues from the sciences will also find the treatment of scientific issues of interest Though modest in not trying to reach beyond an introductory level of analysis the work is decidedly immodest in trying to change a number of misimpressions that pervade the philosophical literature For example when told that classical physics is not the place to look for clean and unproblematic examples of determinism most philosophers react with a mixture of disbelief and incomprehension The misconceptions on which that reaction is based can and must be changed

Studies and Exercises in Formal Logic John Neville Keynes, 1884

The Dilemma of Freedom and Foreknowledge Linda Trinkaus Zagzebski, 1996-04-25 This original analysis examines the three leading traditional solutions to the dilemma of divine foreknowledge and human free will those arising from Boethius from Ockham and from Molina Though all three solutions are rejected in their best known forms three new solutions are proposed and Zagzebski concludes that divine foreknowledge is compatible with human freedom The discussion includes the relation between the foreknowledge dilemma and problems about the nature of time and the causal relation the logic of counterfactual conditionals and the differences between divine and human knowing states An appendix introduces a new foreknowledge dilemma that purports to show that omniscient foreknowledge conflicts with deep intuitions about temporal asymmetry quite apart from considerations of free will Zagzebski shows that only a narrow range of solutions can handle this new dilemma A compelling contribution to the field

The Dilemma of Freedom and Foreknowledge will appeal to students and scholars of theistic philosophy and the philosophy of religion

Philosophical Debates Steven M. Cahn, 2021-05-04 This volume completes a trilogy of Steven M Cahn's shorter writings that includes *The Road Traveled and Other Essays* 2019 and *A Philosopher's Journey* 2020 Included here are

his contributions to three philosophical debates first whether events are fated to occur second whether God is knowable and third whether morality can conflict with happiness The book contains not only Cahn's essays but also edited versions of the writings to which he is responding thereby putting his remarks into context and rendering them accessible to all These pieces make clear why Professor Cahn is regarded as one of the leading philosophy teachers of his generation

Comparative Encounters Between Artaud, Michaux and the Zhuangzi Xiaofan Amy Li, 2017-12-02 The encounter between different minds and perspectives across time and space has always haunted the literary and philosophical imagination Just such an encounter is staged and played out in this comparative study which connects the twentieth century Francophone writers Antonin Artaud 1896-1948 and Henri Michaux 1899-1984 with the ancient Chinese text Zhuangzi c 4th-3rd century BCE These disparate texts are bridged by questions that draw them into close dialogue how can Artaud and Michaux who read about and admired ancient Chinese literature and culture be rethought through certain philosophical concerns that the Zhuangzi raises If the points of conceptual intersection focus on rationality cosmology and ethics what can they tell us about these important issues By imagining constructing and developing this thought encounter Li re-envisages Artaud Michaux and the Zhuangzi through the kaleidoscope of comparative interpretation juxtaposing and recombining ideas and contexts to form new patterns and meanings Xiaofan Amy Li is Junior Research Fellow in Comparative Literature and Translation at St Anne's College Oxford University

Divine Foreknowledge and Human Freedom William Lane Craig, 1991 The ancient problem of fatalism more particularly theological fatalism has resurfaced with surprising vigour in the second half of the twentieth century Two questions predominate in the debate 1 Is divine foreknowledge compatible with human freedom and 2 How can

God foreknow future free acts Having surveyed the historical background of this debate in *The Problem of Divine Foreknowledge and Future Contingents from Aristotle to Suarez* Brill 1988 William Lane Craig now attempts to address these issues critically His wide ranging discussion brings together a thought provoking array of related topics such as logical fatalism multivalent logic backward causation precognition time travel counterfactual logic temporal necessity Newcomb's Problem middle knowledge and relativity theory The present work serves both as a useful survey of the extensive literature on theological fatalism and related fields and as a stimulating assessment of the possibility of divine foreknowledge of future free acts

PSA 1970 R.C. Buck, Robert S. Cohen, 2012-12-06 This book contains the papers presented at the second biennial meeting of the Philosophy of Science Association held in Boston in Fall 1970 We have added the paper by Jaakko Hintikka which he was unable to present due to illness and we have unfortunately not received the paper of Michael Scriven Otherwise these proceedings are complete so far as formal presentations The meeting itself was dedicated to the memory of Rudolf Carnap This great man and distinguished philosopher had died shortly before The five talks from the session devoted to recollections of Professor Carnap are printed at the beginning of this book and they are followed by eight other tributes and memories We are particularly grateful to Wolfgang Stegmüller for permitting us to include a translation of his eulogy which was broadcast in Germany The photographs were kindly contributed by Hannah Thost Carnap

George Sher Robert Simon Douglas Stalker Robert B Talisse Christine Vitano **Crime, Punishment and Disease in a Relativistic Universe** Antony Flew, 2018-02-06 In Crime Punishment and Disease Antony Flew makes clear both the meaning and the implications carried by the expression mental disease He aims to discourage its use in conditions that provide the victims of such diseases with an excuse for failing to perform what would have been their imperative duties had they enjoyed good mental health Flew attacks the gross over extensions of the notion of mental disease on both sides of the Atlantic He defends human dignity and responsibility against the suggestion that we are all or most of us sick sick sick In particular he challenges the paternalist pretensions of people who claim a right to control and manipulate others because they are allegedly sick and consequently not responsible for what they do In a typical ordinary disease Flew notes it is the patient who complains of the disease rather than someone else who complains about the patient But those who claim that some crime or all crime is symptomatic of mental disease and those who identify disorders such as attention deficit hyperactivity disorder ADHD as conditions requiring psychiatric attention are taking the disfavored behavior rather than the distress of their patients as the warrant for supposedly medical interventions They should instead first consider how what they propose to call mental disease does and does not resemble syphilis measles and other communicable diseases Flew sees his work as complementary to Thomas Szasz s He applies a philosophical perspective to problems Szasz discusses as a psychiatrist This work will be of particular interest to students of philosophy and politics in that it relates modern discussion of mental illness to the Plato of The Republic Flew also takes note in this context of Samuel Butler s Erewhon This work will be of direct relevance to criminologists as well as those interested in social welfare philosophy of education and new developments in psychiatry **How Free Will Works** Steven M. Duncan, 2011-12-01 In How Free Will Works Steven M Duncan provides not merely discussions of but potential answers to two of the most vexed questions discussed by philosophers concerning free choice First supposing that the mind and the body are separate substances of opposed natures how is it possible for them to interact such that an entirely non physical immanent mental act can give rise to changes in the external world Second supposing that there is free will how is it possible for our acts of volition free choice to be neither causally determined nor merely chance random events This book spells out a new way of envisaging the mind body relation and the nature of mind body causal interaction that avoids the traditional interaction problem It also explains how it is possible for free choice neither to require an efficient cause nor to act as an efficient cause while nevertheless affecting the processes in the physical world through which intentional action is realized in human behavior In the second half of the book the theory developed in the first part of the book is applied to the difficult issues arising from the Christian doctrine of salvation sin grace and redemption *The World Without God* Madhav Desai, 2014-11-28 Sufficient scientific evidence has emerged for the science minded people to accept that our universe was created and is run without God And that life was created and has evolved without external power The concept of God was mans creation and in the dark ages before science it

was inevitable that man should create God But those who accept in the face of the scientific discoveries that God does not have to exist to explain the existence of universe or life on Earth are now faced with an important question Is there a God that plays a role in the personal life of every individual If we delete God from all other explanations is it rational to still believe in an entity that micromanages the lives of all individuals on the Earth Is it possible to visualize how the world and our lives could go on without somebody up there who listens to our prayers intervenes in our lives and rewards or punishes our deeds The World without God is a thought provoking treatise which describes this universe and the human life without depending on concepts like the existence of God the divine mission destiny divine justice soul with existence independent of the body and life after death
