Fates Trail:

The Fates James W. Hoddinott, 2014-04-03 The Fates follows society's search for immortality The exploration of what each of us would sacrifice if it meant that we could live forever Changing societal values and reducing the importance of community has resulted in a society that continues to put the needs of the individual first The Fates explores a society made up of those that put their needs ahead of all others versus those that believe the spiritual self is the destiny of all humans The conflict in a society and each individual that devalues the basic human characteristics that make each of us unique manifests itself in some devastating outcomes Each day we are faced with decisions of what each of us value and what each of us will fight for The youth of today are influenced by increasingly uncontrolled and self centered ideas about how they should live The path is being set in our world where through media we are changing culture The Fates at one time may have seemed like science fiction however with our increasing knowledge of genetics and our belief that immortality can only be obtained through science rather than spiritually or through the legacies we create to make our world a better place for future generations

The Fate and Effects of Oil in Freshwater J. Green, M.W. Trett, 2012-12-06 Freshwater is a most precious natural resource. To the developed world, refreshing, untainted water is presumed from the taps of millions of householders. The many rivers, streams, ponds, and lakes are for the pleasure and enjoyment of the leisure hours of urban dweller and rural inhabitant alike. Boating, fishing, sailing, and swimming come readily to mind. To the agriculturalist and industrialist, it is often the cornerstone of their enterprises. To the environmentalist and naturalist, it is the basis of the wetland and open water communities which provide the habitats for a wealth of flora and fauna. In the developing world, the emphasis is very different. A spring, well, river, or swamp is the basis of day-to-day survival for family, livestock, and crops. Subsistence fishing is often the major source of protein. Freshwater may be the unwitting purveyor of disease, but with good management, this can be regulated and monitored. But man, by nature, is a selfish species who tends to have scant regard for the quality of life of future generations. The much publicised destruction of forests is a notorious example. Not so well known is the pressure on one of the world's most fragile ecosystems, the wetlands.

Delver Magic Book III: Balance of Fate Jeff Inlo, 2010-12-04 Ryson Acumen finds that his time of service to the Land of Uton and its people is not yet complete. Together with Holli Brances and Lief Woodson, they must work together once more to end a growing threat and to meet their own undeniable destinies. It is not without loss or sacrifice as they struggle to battle grotesque forces of malevolence. Enemies once forgotten return to hold sway over each ensuing conflict. Under the conniving guidance of the serpent Sazar, legions of dark creatures rise out of Dark Spruce Forest. Allying himself with a sorceress of power in the Lacobian desert, Sazar finds the strength to rule and turns his lustful eyes eastward. Targeting the outposts and farmlands surrounding Connel, the serpent forms a dark army to bring terror to the humans. Even as Ryson and his elf friends struggle against such foes, they look to the powerful wizard Enin for aid, but the spellcaster remains withdrawn from nearly every clash. It is within him to decimate the entire horde, but the consequences of such intended actions trouble his very soul. An understanding of balance has taught the wizard more than caution; it has led him to the presence of a being of equal power, but a creature with intentions of malice. Enin's unwillingness to interfere in the choices of individuals is born of the belief that he must allow all those around him to seek their own path. While these paths may differ, each will lead those that travel them to their ultimate fate.
