Fathers Who Fail Melvin R. Lansky,2013-05-13 Despite the burgeoning literature on the role of the father in child development and on fathering as a developmental stage surprisingly little has been written about the psychiatrically impaired father In Fathers Who Fail Melvin Lansky remedies this glaring lacuna in the literature Drawing on contemporary psychoanalysis family systems theory and the sociology of conflict he delineates the spectrum of psychopathological predicaments that undermine the ability of the father to be a father Out of his sensitive integration of the intrapsychic and intrafamilial contexts of paternal failure emerges a richly textured portrait of psychiatrically impaired fathers of fathers who fail Lansky's probing discussion of narcissistic equilibrium in the family system enables him to chart the natural history common to the symptomatic impulsive actions of impaired fathers He then considers specific manifestations of paternal dysfunction within this shared framework of heightened familial conflict and the failure of intrafamilial defenses to common shame Domestic violence suicide the intensification of trauma posttraumatic nightmares catastrophic reactions in organic brain syndrome and the murder of a spouse are among the major symptoms that he explores In each instance Lansky carefully sketches the progression of vulnerability and turbulence from the father's personality to the family system and

thence to the symptomatic eruption in question In his concluding chapter he comments tellingly on the unconscious obstacles on the part of both patients and therapists to treating impaired fathers The obstacles cut across different clinical modalities underscoring the need for multimodal responses to fathers who fail
