Biller, 1993-01-21 Biller well known for his extensive research into the

impacts of involved fathering or the absence thereof provides a comprehensive straightforward analysis of just how important paternal involvement really is. He describes the great advantages accruing to a child when the father as well as the mother actively participates in the parenting process. Fathers who sustain high interest and a true presence in a child's nurturing significantly influence body image, self-esteem, moral standards, intellectual achievement, and social competency. The benefits Biller shows extend beyond the father-child relationship and include heightened spousal satisfaction and a sense of overall family well-being. The reciprocal influences of father, mother, and child development are considered within a lifespan biopsychosocial perspective. This is an important and compelling treatment of a topic of immense concern not only to individual families but to society as a whole. Biller, by relating specific issues to fathers' roles and influences, offers the first integrated analysis of just how important a father's caring presence and active involvement is to his child's and spouse's psychosocial well-being. This balanced study of paternal factors addresses not only such issues as nurturance, discipline, and the cultivation of self-esteem, intelligence, and creativity but also family problems so evident in current society. There is a thorough analysis concerning complex connections among gender, roles, parenting, and personality development. The work is highly substantive, realistic, and encouraging in its potential for guidance and offers insightful, useful conclusions on paternal behavior and influences.

*Young Disadvantaged Men: Fathers, Families, Poverty, and Policy* Timothy Smeeding, Irwin Garfinkel, Ronald B. Mincy, 2011-06-09. By age 30, between 68 and 75 percent of young men in the United States with only a high school degree or less are fathers. This volume provides practical, policy-driven strategies to address the national epidemic of disadvantaged young fathers and the challenges they face in raising and supporting their children. National experts discuss the issues of immediate concern to those working to reconnect disengaged dads to their children and improve child and family economic and emotional well-being. Each chapter was presented at a working conference organized by the Institute for Research on Poverty, director Tim Smeeding, University of Wisconsin-Madison, in coordination with the Columbia University School of Social Work's Center for Research on Fathers, Children, and Family Well-Being, directed by Ronald Mincy, and the Columbia Population Research Center, directed by Irwin Garfinkel. The conference brought together scholars, many in public policy, to examine strategies for reducing barriers to marriage and fathers' involvement, designing child support and other public policies to encourage the involvement of fathers, and addressing fathers who have multiple child support responsibilities. This volume will appeal to researchers, policy makers, and practitioners dedicated to improving the lives of low-income families and children.

**Gender Development** Susan Golombok, Roby Fivush, 1994-01-28. Gender Development is the first book to examine gender from a truly developmental perspective and fills a real need for a textbook and source book for college and graduate students, parents, teachers, researchers, and counsellors. It examines the processes involved in the development of gender, addressing such sensitive and complex questions as what causes males and females to be different and why they behave in different ways. The authors provide an up-to-date integrative review of theory and

research tracing gender development from the moment of conception through adulthood and emphasising the complex interaction of biology socialisation and cognition The topics covered include hormonal influences moral development play and friendships experiences at school and work and psychopathology      *Generative Fathering* Alan J. Hawkins,David C. Dollahite,1997 Much contemporary scholarship on fathers comes from a deficit model focusing on men s inadequacies as parents This volume goes beyond a deficit model of fatherhood to what the editors term a generative fathering perspective This approach sees the work fathers do for their children in terms of caring for and contributing to the life of the next generation Following a description of generative fathering placing it in contrast to the role inadequacy perspective of fatherhood the contributors elaborate on generative fathering in terms of gender ethnicity and historical perspectives They present research that helps readers to understand generative fathering in challenging life circumstances such as special needs child      Deadbeat Dads Deena Mandell,2002-01-01 And all too often as this study shows in the struggle between the state s protection of its financial interests and the fathers focus on their personal rights the needs of children disappear

Fallon,Andres J. Pumariaga,Salman Akhtar,2024-05-08 Fatherhood Scenarios offers a wide range of perspectives including different cultural and ethnic perspectives and chapters considering the role of the father throughout the lifespan including experiences of gay fathers adoptive fathers and disabled fathers With contributors from around the world representing diverse mental health disciplines these chapters constitute a harmonious gestalt of knowledge information theory and socio clinical dimensions pertaining to fatherhood The emphasis of all these sections is nonetheless the psychosocial tasks of fatherhood as it undergoes subtle and gradual transformation with the offspring s growth through childhood and adolescence to full adulthood including becoming a parent themselves The book also traces the portrayal of fatherhood in popular media including television and movies keeping in mind their evolution and transformation over the past many decades Spanning a vast terrain of psychosocial concern Fatherhood Scenarios will be of great appeal to mental health professionals psychotherapists child psychiatrists and family welfare workers in practice and in training      Throwaway Dads Ross D.
