A Primer on Securitization Leon T. Kendall, Michael J. Fishman, 2000 A Primer on Securitization introduces readers to America's newest system of raising capital what it is how it operates and what difference securitization makes Gathering fourteen lectures by the pioneers of securitization and by current practitioners from Freddie Mac Paine Webber JP Morgan Chrysler McKinsey Co and other major players A Primer on Securitization introduces readers to America's newest system of raising capital what it is how it operates and what difference securitization makes The securitization process bypasses financial intermediaries that have historically collected deposits and loaned them to those seeking funds and links borrowers directly to money and capital markets Although little has been written about what is perhaps one of the most important innovations to emerge in financial markets since the 1930s securitization has revolutionized the way that the borrowing needs of consumers and businesses are met Today for example over two thirds of all home loans are being securitized along with substantial percentages of auto loans and credit card receivables and the process continues to expand into new fields including synthetic securities Authoritative and practical these lectures show how securitization was developed to fill a gap in financial markets They discuss the nature and causes of the market imperfections that made securitization a valuable source of funds and describe how securitization has linked local

Enterprises in Europe Mr. Shekhar Aiyar, Mr. Ali J Al-Eyd, Ms. Bergljot B Barkbu, Andreas Jobst, 2015-05-01 Small and medium sized enterprises SMEs account for a disproportionate share of output and employment in Europe but are still highly dependent on bank finance which dried up or became prohibitively expensive during the crisis Broader access to alternative long term finance through securitization would limit their exposure to banking sector difficulties and thus help revive credit The SDN examines the various impediments to the development of a well functioning and liquid securitization market in Europe and proposes a comprehensive multi faceted strategy to support its development through regulatory reforms and infrastructure development together with targeted and time bound official sector support This would require i greater regulatory differentiation between securities of different quality and underlying asset structures ii harmonized national enforcement and insolvency frameworks and standardized reporting requirements and iii greater capacity of EU authorities to support new issuance These measures would be underpinned by a pan European definition of high quality securitization HQS comprising simple transparent and efficient asset structures receiving preferential regulatory treatment
