Maclean,2002-10-02 How is it that the modest pace of change which typified the French economy a century ago gave way after 1945 to a new revived capitalism and a superior economic performance Maclean traces the development of French economic and business life in the context of the European and international economy over the past fifty years She examines the main economic trends and events from nationalization to privatization from war with Germany to reconciliation and ever greater union from the franc to the euro and from national champions to mega mergers with foreign companies Maclean argues that the new French capitalism of the twenty first century is the product of an ideological struggle in which the forces of modernization triumphed over the old guard of French nationalism *War Planning 1914* Richard F. Hamilton,Holger H. Herwig,2009-11-30 The major European powers drafted war plans before 1914 and executed them in August 1914 none brought the expected victory by Christmas Why This tightly focused collection of essays by international experts in military history reassesses the war plans of 1914 in a broad diplomatic military and political setting for the first time in three decades The book analyzes the war plans of Austria Hungary France Germany Great Britain Italy and Russia on the basis of the latest research and explores their demise in the opening months of World War I Collectively and comparatively these essays place contingency war planning before 1914 in the different contexts and challenges each state faced as well as into a broad European paradigm This is the first such undertaking since Paul Kennedy s groundbreaking *War Plans of the Great Powers* 1979 and the end result is breathtaking in both scope and depth of analysis **Information Systems for Urban Planning** Robert Laurini,2002-09-11 Urban planners who need to design information systems require an understanding of systems analysis data acquisition and GIS In recent times the need has been to make computer based maps by using a GIS but planners now need tools for co operative work using groupware systems for global visualization and real time monitoring of urban activities and phenomena Planners have moved beyond drawing land use plans to examining the evolution of urban activities to monitor and analyze urban societal and environmental problems Both practitioners and students will find this book useful provided they have an adequate grounding in computing data analysis and GIS and they are looking to use and design computer systems for developing maps and written statements for city planning Therefore novel tools like using multimedia information systems and GIS will become an increasingly important eventually essential part of the job

Planning in Cold War Europe Michel Christian, Sandrine Kott, Ondrej Matejka, 2018-10-08 The idea of planning economy and engineering social life has often been linked with Communist regimes will of control However the persuasion that social and economic processes could and should be regulated was by no means limited to them Intense debates on these issues developed already during the First World War in Europe and became globalized during the World Economic crisis During the Cold War such discussions fuelled competition between two models of economic and social organisation but they also revealed the convergences and complementarities between them This ambiguity so often overlooked in histories of the Cold War represents the central issue of the book organized around three axes First it highlights how know how on planning circulated globally and were exchanged by looking at international platforms and organizations The volume then closely examines specificities of planning ideas and projects in the Communist and Capitalist World Finally it explores East West channels generated by exchanges around issues of planning which functioned irrespective of the Iron Curtain and were exported in developing countries The volume thus contributes to two fields undergoing a process of profound reassessment the history of modernisation and of the Cold War

The Schlieffen Plan Hans Ehlert,Michael Epkenhans,Gerhard P. Gross,David T. Zabecki,2021-05-11 With the creation of the Franco Russian Alliance and the failure of the Reinsurance Treaty in the late nineteenth century Germany needed a strategy for fighting a two front war In response Field Marshal Count Alfred von Schlieffen produced a study that represented the apex of modern military planning His Memorandum for a War against France which incorporated a mechanized cavalry as well as new technologies in weaponry advocated that Germany concentrate its field army to the west and annihilate the French army within a few weeks For generations historians have considered Schlieffen s writings to be the foundation of Germany s military strategy in World War I and have hotly debated the reasons why the plan as executed failed In this important volume international scholars reassess Schlieffen s work for the first time in decades offering new insights into the renowned general s impact not only on World War I but also on nearly a century of military historiography The contributors draw on newly available source materials from European and Russian archives to demonstrate both the significance of the Schlieffen Plan and its deficiencies They examine the operational planning of relevant European states and provide a broad comparative historical context that other studies lack Featuring fold out maps and abstracts of the original German deployment plans as they evolved from 1893 to 1914 this rigorous reassessment vividly illustrates how failures in statecraft
