*Dynamics of Power in Contemporary Iran* Anoushiravan Ehteshami,2010-08-25 Iran s 1979 revolution has stood out as one of the 20th century s most intriguing and unusual social uprisings This revolution defied the socialist radicalism of its day which had been making in roads as the non capitalist path to development in several African and Asian countries and had created social change without reliance on the East or in the name of socialism It had by the same token rejected the Western premises of liberalism and individualism as its guiding principles Its leader an aging cleric even used an apparently alien discourse as he chastised the great Satan United States for its socio cultural sins and for its crimes against humanity In speaking of the plight of the downtrodden and in condemning the alien and morally corrupt values of the uptown living Iranian taghutis he accused the reigning monarch a Western educated urbane man for taking the country down the path of Satan How could an aging mullah with little international experience be challenging the survival of a modern powerful and internationally well connected monarchy How could a cleric whose views of an Islamic state were arguably abstract at best proceed to establish a revolutionary Islamic theocracy where there had previously been apparently entrenched Western style modernity The answers could be sought in a number of places In the deep rooted struggle of the Iranian people for freedom which dated back to before the Bolshevik revolution in Russia the ruling Pahlavi establishment s inability to manage the economic and cultural crisis that engulfed Iran in the 1970s the disenchantment of the monarchy s potential middle class and bourgeois allies the critical role of a radicalized clerical group which emerged to provide a legitimate alternative to the Pahlavi order and finally in the nature of the modern Iranian state itself Prospects for change are historically good but change is likely to take time Nor can the direction of change be easily predicted despite the country s choices increasingly narrowing between that of a naked military regime on the one hand and a pluralistic republic on the other However given the country s vibrant and defiant civil movement and their progressive social democratic program for change Iran again could become a trendsetter for the rest of the region were these forces to return to the corridors of power Having been the first country in the world to have marched political Islam into power in the 20th century Iran s people could again be in the long process of trading political Islam for a truly open and democratic system in the 21st century      The Forbidden Tale kameel ahmady,2021,گفتگو با کامیل احمدی Gender is one of the most important aspects of human life It encompasses sexual identities and roles sexual orientation lust pleasure intimacy and reproduction It can also include people s thoughts dreams desires beliefs views values behaviors practices roles and relationships but these aspects are not always directly experienced or expressed Gender is affected by biological psychological social economic cultural moral legal historical religious and spiritual

interactions There is little in the way of media coverage or reports about the Iranian LGBT community and most of these reports are documentaries about people who have left Iran and live in another country There has been only limited research on the experience of LGB communities in contemporary Iranian society and their views concerning this community The research for Forbidden Tale seeks to fill this knowledge gap and is the first research about the LGB community in Iran and the distinctive contexts in which this community functions The anthropological and fieldwork study of LGB people in Iran by Kameel Ahmady and his team examines the field of gender by looking at the many complex aspects of sexual identity and its intricacies in that community in the context of an increasing recognition of sexual orientation and the challenges that current practices of LGB and gender in Iran present Myths and narratives that have often led to misconceptions about gender and the mistaken policies and practices which ensue from them are examined to provide a more holistic approach This study is complex because it enters the realm of private and public life in today's Iran beyond a simple and general view of sexual orientation and gender related Impressions This research first focused on in depth interviews of over 300 LGB people 60% male and 40% female in the three metropolitan cities of Tehran Mashhad and Isfahan One specific feature of the research is that it focuses solely on LGB and on trans sex people who have both male and female sexes both of which are active at the same time The focus is on challenges arising from present day changes in gender relations and interaction in Iran examining the theoretical and methodological frameworks created by the LGBT community as well as by universities and research centers public and social activists and students outside that community The main goals of this research project are to understand LGB community's feelings and beliefs through a critical analysis of their own perspective and to examine their challenges in living in a religious class based traditional and patriarchal society that rejects LGB as an identity The vulnerability of LGBT people in Iran has been routinely suppressed The aim now is to clarify the situation of those who have been deliberately ignored and marginalized The present study takes advantage of a combination of methods and approaches in order to provide a theoretical method suited for research on LGBT experience and nevertheless to encompass the feelings and perceptions of the researcher as an objectivity in the research confirmation criteria This research was conducted between 2017-2018 and field data were collected in summer and autumn 2017

Labour History and the Economy in Iran Mary Yoshinari, Serhan Afacan, 2025-02-20 Iran underwent major economic changes in the twentieth century but these have to date largely been studied in the context of oil centralization and revolutions This book examines Iran's economic development and the people who made it possible from the late Qajar period to the Revolution of 1979 Containing a wide spectrum of historical viewpoints and methodologies the book uses previously understudied Iranian archives to examine the economic and labour history of Iran together By doing so

the chapters in the book show that Iranian workers had distinct experiences depending on the sector and decade of their employment Other topics covered include the private sector the emergence of social security the effects of economic development on traditional workers and the role of other local economic actors particular to Iran in development family businesses international trade relations worker histories and events in the provinces It will be of appeal to scholars and students of the history economics labour sociology and politics of Iran and the Middle East

Analysis of Socio-Economic Conditions Gianni Betti,Achille Lemmi,2021-03-30 Showcasing fuzzy set theory this book highlights the enormous potential of fuzzy logic in helping to analyse the complexity of a wide range of socio economic patterns and behaviour The contributions to this volume explore the most up to date fuzzy set methods for the measurement of socio economic phenomena in a multidimensional and or dynamic perspective Thus far fuzzy set theory has primarily been utilised in the social sciences in the field of poverty measurement These chapters examine the latest work in this area while also exploring further applications including social exclusion the labour market educational mismatch sustainability quality of life and violence against women The authors demonstrate that real world situations are often characterised by imprecision uncertainty and vagueness which cannot be properly described by the classical set theory which uses a simple true false binary logic By contrast fuzzy set theory has been shown to be a powerful tool for describing the multidimensionality and complexity of social phenomena This book will be of significant interest to economists statisticians and sociologists utilising quantitative methods to explore socio economic phenomena

Conflict Resolution in Water Resources and Environmental Management Keith W. Hipel,Liping Fang,Johannes Cullmann,Michele Bristow,2015-04-13 The latest developments regarding the theory and practice of effectively resolving conflict in water resources and environmental management are presented in this book by respected experts from around the globe Water conflicts are particularly complex and challenging to solve because water and environmental issues span both the societal realm in which people and organizations interact and the physical world which sustains all human activities For instance when large scale water diversions take place across political jurisdictions conflicts may ensue among stakeholders within and across regions while the water transfers may cause severe damage to sensitive ecological systems Therefore to arrive at realistic and fair resolutions one must take into account not only the economics and politics of the situation but also the water quantity and quality changes that may occur within the altered hydrological system as well as the ecosystems contained therein When the effects of climate change and the closely connected activities of energy production and usage are also considered the complexity of the problem becomes even greater and messier Accordingly one must adopt an integrative and adaptive approach to water and environmental governance that specifically recognizes the conflicting value systems of stakeholders including nature and future generations even though they are not present at the bargaining table The 16 chapters in this leading edge book are written by authors who presented their original research at the International Conference on Water Resources and Environment Research ICWRER 2013 which

was held in Koblenz Germany from June 3rd to 7th 2013 and subsequently submitted expanded versions of their research for review and publication in this timely book The rich range of contributions are put into perspective in the first chapter and then categorized into four main interconnected parts Part I Management and Evaluation Part II Global Trans boundary and International Dimensions Part III Consensus building Bargaining and Negotiation Part IV Ecological and Socio economic Impacts

*Ancient and Traditional Foods, Plants, Herbs and Spices used in the Middle East* Rajkumar Rajendram, Victor Preedy, Vinood Patel, 2023-08-25 The use of different foods herbs and spices to treat or prevent disease has been recorded for thousands of years Egyptian papyrus hieroglyphics and ancient texts from the Middle East have described the cultivation and preparations of herbs and botanicals to cure the sick There are even older records from China and India Some ancient scripts describe the use of medicinal plants which have never been seen within European cultures Indeed all ancient civilizations have pictorial records of different foods herbs and spices being used for medical purposes However there are fundamental questions and issues pertaining to the scientific evidence for the use of these agents or their extracts in modern medicine These issues are explored in *Ancient and Traditional Foods Plants Herbs and Spices used in the Middle East* Features Describes uses and applications of plant based materials from different countries of the Middle East Each chapter has unique cross references to foods herbs spices and botanicals Bridges molecular biology physiology and medical sciences Coverage includes herbal medicines supplements lifestyle patterns nutrition and plant based diets Each chapter describes usage and applications of traditional foods and botanicals historical background toxicity cautionary notes and summary points There have been considerable advances in scientific techniques over the last few decades These have been used to examine the composition and applications of traditional cures Modern science has also seen the investigation of herbs spices and botanicals beyond their traditional usage Written by international experts this is an essential read for food researchers food scientists and nutritionists researchers and health professionals with an interest in the potential therapeutic value of Middle Eastern food components The book will also be of relevance to physicians and pharmacologists

Town and Country in the Middle East Mohammad A. Chaichian, 2009-01-01 This book examines urbanization in Iran and Egypt related to each nation's unique colonial history based on extraction and production of oil in Iran and cultivation of cotton in Egypt for world markets Using Tehran and Cairo as the two hyper urbanized cities Chaichian documents development of divergent patterns of rural urban migration urban hierarchies and employment structures from the early nineteenth century up to the 1970s when a global economy based on flexible production of consumer goods started to take shape
