Public Record Office,1899 **England's Northern Frontier** Jackson W. Armstrong,2020-11-12 The three counties of England s northern borderlands have long had a reputation as an exceptional and peripheral region within the medieval kingdom preoccupied with local turbulence as a result of the proximity of a hostile frontier with Scotland Yet in the fifteenth century open war was an infrequent occurrence in a region which is much better understood by historians of fourteenth century Anglo Scottish conflict or of Tudor responses to the so called border reivers This first book length study of England s far north in the fifteenth century addresses conflict kinship lordship law justice and governance in this dynamic region It traces the norms and behaviours by which local society sought to manage conflict arguing that common law and march law were only parts of a mixed framework which included aspects of feud as it is understood in a wider European context Addressing the counties of Northumberland Cumberland and Westmorland together Jackson W Armstrong transcends an east west division in the region s historiography and challenges the prevailing understanding of conflict in late medieval England setting the region within a wider comparative framework **Chase's ... Calendar of Events** ,2005 **Ireland's First Settlers** Peter Woodman,2015-12-31 Ireland s First Settlers tells the story of

the archaeology and history of the first continuous phase of Ireland's human settlement. It combines centuries of search and speculation about human antiquity in Ireland with a review of what is known today about the Irish Mesolithic. This is in part provided in the context of the author's 50 years of personal experience searching to make sense of what initially appeared to be little more than a collection of beach-rolled and battered flint tools. The story is embedded in how the island of Ireland, its position, distinct landscape and ecology impacted on when and how Ireland was colonized. It also explores how these first settlers evolved their technologies and lifeways to suit the narrow range of abundant resources that were available. The volume concludes with discussions on how the landscape should be searched for the often ephemeral traces of these early settlers and how sites should be excavated. It asks what we really know about the thoughts and life of the people themselves and what happened to them as farming began to be introduced. *National Gallery of Ireland Childhood Calendar 2005*

National Gallery of Ireland, 2004 **Edward I's Regent** Michael Ray, 2022-05-05 Born at Christmas 1249 to Richard Edmund of Cornwall was nephew to Henry III and cousin to Edward I. His eventful childhood took him to Germany when his father was elected king there. He was captured at the battle of Lewes and imprisoned for more than a year. Returning from crusade, he witnessed the brutal murder of his half brother which left him as heir to his father, the richest man in the kingdom. Throughout his life, Edmund played a crucial role in medieval England. As Regent of England, Earl of Cornwall and the richest man in the land, he was a leading force of the late thirteenth century. This book considers Edmund's life, his use of his wealth to lend to the king and others and to be a major benefactor of religious houses. His piety saw him found two new religious houses, rebuild another and bring the Holy Blood relic from Germany to Hailes Abbey. His record as Regent of England for three years is assessed. The wide spread of his lands, which included 13 castles and more than 800 places in 27 counties and his tenants are set out, as is his place in the local community. The basis of his wealth and its sources, including money from his lands but also from tin mining and marine dues in Cornwall, is explored, and his knightly affinity and his close associates and officials are considered. On a personal level, the book examines his unsuccessful childless marriage with the sister of the Earl of Gloucester. Edmund was a key figure throughout Edward I's reign and the late thirteenth century. In this insightful account, the man behind England's greatest king is at long last brought to the fore. **Ancestral Journeys** Kevin Terry, 1921-01-01

Ancestral Journeys looks at the migratory paths of people from Europe who settled in Cork and bear the surname Terry. The period covered is from 800 AD to 1800. It looks at the history and historical geography of where they settled at periods along their migratory paths. The book sets down some of the political, social and economic reasons for their rise to prominence in Cork city from the 15th century, their maintenance of this position for 250 years, through to their expulsion with other Catholic families in 1644. This book can be regarded as a companion to two other books on Cork Terrys published in 2005 and 2013.

Hayes, 2023 This book examines the environmental political and economic history of Ireland s marine fisheries from 1400 to 1600 It combines a wide range of historical sources with innovative digital research methods to provide a comprehensive and systematic overview Government letters and court documents highlight the diverse range of fishing fleets from across Europe that visited Irish waters in the early sixteenth century bringing wealth and cultural influence to the native Irish who developed complex systems to protect and tax the visitors Furthermore trade records illustrate that fish was Ireland s premier export in the late fifteenth and early sixteenth centuries However a range of factors led to the industry s collapse by the end of the sixteenth century the Tudor conquest which disrupted fishing operations and fundamentally altered who controlled fishing resources the destabilization of Irish waters resulting from the terrestrial conflict which allowed pirates to thrive an influx of cheap cod from the newly exploited fisheries in Newfoundland which changed consumption patterns in Ireland and across Europe and shifting climatic conditions and decades of over exploitation which meant fewer fish and poorer catches Overall the book reveals that fisheries form a vital part of the broader environmental political and economic history of Ireland
