**Constructionalization and Constructional Changes** Elizabeth Closs Traugott, Graeme Trousdale, 2013-11-07 Elizabeth Closs Traugott and Graeme Trousdale develop an approach to language change based on construction grammar Construction grammar is a theory of signs construed at the level of the phrase clause and complex sentence Until now it has been mainly synchronic The authors use it to reconceptualize grammaticalization the process by which verbs like to have lose semantic content and gain grammatical functions or word order moves from discourse prominent to syntax prominent and lexicalization in which idioms become fixed and complex words simplified Basing their argument on the notions that language is made up of language specific form meaning pairings and that there is a gradient between lexical and grammatical constructions Professor Traugott and Dr Trousdale suggest that language change proceeds by micro steps that involve closely related changes in syntax morphology phonology semantics pragmatics and discourse functions They illustrate their exposition with numerous English examples drawn from Anglo Saxon times to the present many of which they discuss in depth The book is organized in six chapters The first outlines the approach and the questions to be addressed The second reviews usage based models of language change The third considers the relation between grammatical constructionalization and grammaticalization Chapters 4 and 5 focus respectively on lexical constructionalization and the role of context The final chapter draws the authors arguments together and outlines prospects for further research Constructionalization and Constructional Changes propounds and demonstrates a new and productive approach to historical linguistics *Living Blues*, 1989 [CMJ New Music Report](#), 2002-03-11 CMJ New Music Report is the primary source for exclusive charts of non commercial and college radio airplay and independent and trend forward retail sales CMJ's trade

Pfenninger, 2017-07-20 Bringing together experts from both historical linguistics and psychology this volume addresses core factors in language change from the perspectives of both fields It explores the potential and limitations of such an interdisciplinary approach covering the following factors frequency salience chunking priming analogy ambiguity and acquisition Easily accessible the book features chapters by psycholinguists presenting cutting edge research on core factors and processes and develops a model of how this may be involved in language change Each chapter is complemented with one or several case study in the history of the English language in which the psycholinguistic factor in question may be argued to have played a decisive role Thus for the first time a single volume provides a platform for an integrated exchange between psycholinguistics and historical linguistics on the question of how language changes over time

The Oxford Handbook of the History of English Terttu Nevalainen, Elizabeth Closs Traugott, 2012-10-10 The availability of large electronic corpora has caused major shifts in linguistic research including the ability to analyze much more data than ever before and to perform micro analyses of linguistic structures across languages This has historical linguists to rethink many standard assumptions about language history and methods and approaches that are relevant to the study of it The field is now interested in and attracts specialists whose fields range from statistical modeling to acoustic phonetics These changes have even transformed linguists perceptions of the very processes of language change particularly in English the most studied language in historical linguistics due to the size of available data and its status as a global language The Oxford Handbook of the History of English takes stock of recent advances in the study of the history of English broadening and deepening the understanding of the field It seeks to suggest ways to rethink the relationship of English s past with its present and make transparent the variety of conditions and processes that have been instrumental in shaping that history Setting a new standard of cross theoretical collaboration it covers the field in an innovative way providing diachronic accounts of major influences such as language contact and typological processes that have shaped English and its varieties as well as highlighting recent and ongoing developments of Englishes celebrating the vitality of language change over the centuries and the many contexts and processes through which language change occurs      *Discretization and MCMC Convergence Assessment* Christian P. Robert, 2012-12-06 The exponential increase in the use of MCMC methods and the corresponding applications in domains of even higher complexity have caused a growing concern about the available convergence assessment methods and the realization that some of these methods were not reliable enough for all purpose analyses Some researchers have mainly focussed on the convergence to stationarity and the estimation of rates of convergence in relation

with the eigenvalues of the transition kernel This monograph adopts a different perspective by developing supposedly practical devices to assess the mixing behaviour of the chain under study and more particularly it proposes methods based on finite state space Markov chains which are obtained either through a discretization of the original Markov chain or through a duality principle relating a continuous state space Markov chain to another finite Markov chain as in missing data or latent variable models The motivation for the choice of finite state spaces is that although the resulting control is cruder in the sense that it can often monitor convergence for the discretized version alone it is also much stricter than alternative methods since the tools available for finite Markov chains are universal and the resulting transition matrix can be estimated more accurately Moreover while some setups impose a fixed finite state space other allow for possible refinements in the discretization level and for consecutive improvements in the convergence monitoring
