*The Politics of Persuasion* Anthony R. DiMaggio, 2017-02-21 Examines how the US media covers high profile public policy issues in the context of competing claims about media bias Tracking the effects of media content on the public is a difficult endeavor and media effects vary on a subject to subject basis To address this challenge *The Politics of Persuasion* employs a multifaceted mixed method approach to studying mass media and public attitudes Anthony R DiMaggio analyzes more than a dozen case studies covering US domestic economic policy and examines a wide range of theories of how bias operates in mass media with regard to coverage of these issues While some research claims that journalists are overly negative and biased against government officials some reveals that journalists favor citizens groups Still other studies contend there is a liberal bias in the media a progovernment bias or a bias in favor of advertisers and business interests Through his analysis DiMaggio is the first to systematically examine all of these competing interpretations He concludes that reporters tailor stories to corporate and government interests but argues that the ability to manufacture consent from the public in favor of these elite views is far from guaranteed According to DiMaggio citizens often make use of their own personal experiences and prior attitudes to challenge official narratives

**Understanding Political Science Research Methods** Maryann Barakso, Daniel M. Sabet, Brian Schaffner, 2013-12-04 This text starts by explaining the fundamental goal of good political science research the ability to answer interesting and important questions by generating valid inferences about political phenomena Before the text even discusses the process of developing a research question the authors introduce the reader to what it means to make an inference and the different challenges that social scientists face when

confronting this task Only with this ultimate goal in mind will students be able to ask appropriate questions conduct fruitful literature reviews select and execute the proper research design and critically evaluate the work of others The authors primary goal is to teach students to critically evaluate their own research designs and others and analyze the extent to which they overcome the classic challenges to making inference internal and external validity concerns omitted variable bias endogeneity measurement sampling and case selection errors and poor research questions or theory As such students will not only be better able to conduct political science research but they will also be more savvy consumers of the constant flow of causal assertions that they confront in scholarship in the media and in conversations with others Three themes run through Barakso Sabet and Schaffner s text minimizing classic research problems to making valid inferences effective presentation of research results and the nonlinear nature of the research process Throughout their academic years and later in their professional careers students will need to effectively convey various bits of information Presentation skills gleaned from this text will benefit students for a lifetime whether they continue in academia or in a professional career Several distinctive features make this book noteworthy A common set of examples threaded throughout the text give students a common ground across chapters and expose them to a broad range of subfields in the discipline Box features throughout the book illustrate the nonlinear non textbook reality of research demonstrate the often false inferences and poor social science in the way the popular press covers politics and encourage students to think about ethical issues at various stages of the research process

**Campaign Talk** Roderick P. Hart,2009-07-01 Roderick Hart may be among the few Americans who believe that what politicians say in a campaign actually matters He also believes that campaigns work Even as television coverage political ads and opinion polls turn elections into field days for marketing professionals Hart argues convincingly that campaigns do play their role in sustaining democracy mainly because they bring about a dialogue among candidates the press and the people Here he takes a close look at the exchange of ideas through language used in campaign speeches political advertising public debates print and broadcast news and a wide variety of letters to the editor In each case the participants choose their words differently and this according to Hart can be a frustrating challenge to anyone trying to make sense of the issues Yet he finds that the process is good for Americans campaigns inform us about issues sensitize us to the concerns of others and either encourage us to vote or at least heighten our sense of the political world Hart comes to his conclusions by using DICTION a computer program that has enabled him to unearth substantive data such as the many subtle shifts found in political language over the past fifty years This approach yields a rich variety of insights including empirically based explanations of impressions created by political candidates For example in 1996 Bill Clinton successfully connected with voters by using many human interest words you us people family Bob Dole however alienated the public and even undermined his own claims of optimism by using an abundance of denial words can t shouldn t couldn t Hart also tracks issue buzzwords such as Medicare to show how candidates and voters define and readjust their positions throughout the campaign dialogue In the midst of today s increased media hype surrounding elections Americans and the candidates they elect do seem to be listening to each other as much as they did in years gone by Hart s wide ranging objective investigation upends many of our stereotypes about political life and presents a new more bracing understanding of contemporary electoral behavior

*Political Campaign Communication* Judith S. Trent,Robert V. **The Political Psychology of Democratic Citizenship** Eugene Borgida, Christopher M Federico, John L Sullivan, 2009-04-16 While scholars in political science social psychology and mass communications have made notable contributions to understanding democratic citizenship they concentrate on very different dimensions of citizenship The current volume challenges this fragmentary pattern of inquiry and adopts an interdisciplinary approach to the analysis of citizenship that offers new insights and integrates previously disparate research agendas It also suggests the possibility of informed interventions aimed at meeting new challenges faced by citizens in modern democracies The volume is organized around five themes related to democratic citizenship citizen knowledge about politics persuasion processes and intervention processes group identity and perception of individual citizens and social groups hate crimes and intolerance and the challenge of rapid changes in technology and mass media These themes address the key challenges to existing perspectives on citizenship represent themes that are central to the health of democratic societies and reflect ongoing lines of research that offer important contributions to an interdisciplinary political psychology perspective on citizenship In several cases scholars may be unaware of work in other disciplines on the same topic and might well benefit from greater intellectual commerce These themes provide excellent opportunities for the interdisciplinary cross talk that characterizes the contributions to this volume by prominent scholars from psychology political science sociology and mass communications In the final section distinguished commentators reflect on different aspects of the scholarly agenda put forth in this volume including what this body of work suggests about the state of political psychology's contributions to our understanding of these issues Thus this volume aims to provide a multifaceted interdisciplinary look at the political psychology of democratic citizenship The interdisciplinary bent of contemporary work in political psychology may uniquely equip it to create a more nuanced understanding of citizenship issues and of competing democratic theories **The SAGE**

Islam in British media discourses Laurens de Rooij, 2020-05-09 Media reporting on Islam and Muslims commonly relate stories about terrorism, violence or the lack of integration with western values and society. Yet there is little research into how non-Muslims engage with and are affected by these news reports. Inspired by the overtly negative coverage of Islam and Muslims by the mainstream press and the increase in Islamophobia across Europe, this book explores the influence of these depictions on the thoughts and actions of non-Muslims. Building on extensive fieldwork, interviews and focus groups, Laurens de Rooij argues that individuals negotiate media reports to fit their existing outlook on Islam and Muslims. Non-Muslim responses to these reports, de Rooij argues, are not only reproductions of local and personal contextuality but are co-dependent and co-productive to the reports themselves.
