Likely Stories II Geoffrey Grosshans, 2004-12 This collection contains original fables and parables on psychological social political spiritual and philosophical themes The morals of individual tales are left to the reader to decide **Likely Stories** Geoffrey Grosshans, 2004-12 This collection contains original fables and parables on psychological social political spiritual and philosophical themes The morals of individual tales are left to the reader to decide *Likely Stories V* Geoffrey Grosshans, 2016 *Likely Stories IV* Geoffrey Grosshans, 2007 *Metaphorical Stories in Discourse* L. David Ritchie, 2017-09-14 This book defines and explains in straightforward language metaphorical stories using examples from sources such as conversations speeches and editorial cartoons [A World Scientific Encyclopedia Of Business Storytelling. Set 2: Methodologies And Big Data Analysis Of Business Storytelling \(In 5 Volumes\)](#), 2023-10-13 This set of multi reference works is meant to be read together as the five volumes interlace one another like the laces of a shoe in the famous painting by Vincent van Gogh The question of who will wear the shoes is long debated in art history and philosophy If we take these five volumes from different points of view on the theory and practice of business storytelling then we have a crisscrossing a new and impressive dialogue for the reader This set is presented as a new way to lace up the laces of business storytelling Volume 1 aims to help and inspire leaders business owners and researchers in creating a commitment to ethical and sustainable changes and ideas and live in a world of high complexity without getting stressed but experiencing freedom instead The book combines tools case studies and theories about the ethical change management method of True Storytelling and other perspectives and views on ethics and storytelling It delves into important topics such as true storytelling sustainability and freedom storytelling and start ups in the health industry storytelling and diversity and culture storytelling and teams storytelling sustainability and the UN Goals storytelling and well being storytelling in higher education and storytelling and fundraising Book authors are experienced and successful researchers business owners leaders and consultants from Scandinavia the USA Africa and Europe Volume 2 is an endeavor into the creation of new concepts for engaging with sustainability It maintains that storytelling is important for our emplacement in nature and can be important for enacting another relationship between nature and the cultural artifice our social and material constructions of houses cities villages harbors streets and railways and our use of objects and artifacts to construct our lives Business storytelling communication is that space for social symbolic work that brings the symbolic objects of the organization the human and the natural environment into a dialogical relationship Volume 3 posits that organizations are arranged as social symbols that are arranged in institutions based on the needs of organics for example health food shelter mating leisure and labor Organics as a social symbolic object specifically humans have emotions language and culture to organize their institutions and organizations In this book readers will find that many of the authors attempt to understand the body s exclusion or attempt to bring the body back into the organization Business storytelling communication takes aim at the social symbolic work of

making space to negotiate the social arrangement of organizations with its organic components Volume 4 covers a variety of methodological topics from a storytelling perspective Why a storytelling perspective Consider that a common business research goal is to convince others that what the researcher has to say matters If the researcher is a basic researcher who wishes to promote a theory the goal is to make a convincing case for the value of that theory If the researcher is an applied researcher who wishes to promote a particular application intervention or policy change the goal is likewise to make a convincing case Either way the researcher has a story to tell and the onus is on the researcher to tell the best possible story storytelling failures likely will result in a failure to convince others of the value of one's theory or application Here is where methodological issues come into play Poor methodology whether in the form of less than optimal study designs or invalid statistical analyses harms story quality In contrast high quality methods and statistics enhance story quality Moreover the larger one's methodological and statistical toolbox the greater the opportunities for researchers to tell effective stories The chapters in this book come from a wide variety of perspectives and should enhance researchers storytelling in the following ways By opening many different methodological and statistical perspectives researchers should be more able to think of research stories that otherwise would remain unavailable or inaccessible Secondly the present chapters should aid researchers in better executing their research stories Therefore researchers and graduate students will find this book an invaluable resource Volume 5 opens a window into the world of quantum storytelling as an organizational research methodology providing numerous exemplars of work in this storytelling science that has disrupted qualitative inquiry only with the intention of providing expanded improved and generative ways of understanding and knowing the narratives that emerge from qualitative interviews and observations during organizational research studies **The Knowing is in the**

Writing Jose Y. Dalisay, 2006 Part manual part testament part autobiography this book aims to engage new and young writers of fiction in matters of not only craft but also life and livelihood Philosophy and Fiction Schuy R.

Weishaar, 2022-11-22 Fiction lies in order to tell the truth and seeks reality through shadows Philosophy attempts to dispel false realities it pursues clear understanding of things as they are While the relation of philosophy and fiction is perhaps paradoxical they implicate one another's picture of human experience This book uses fiction to help readers process philosophical themes and the philosophical reflection in turn helps clarify the fiction The study moves through roughly a hundred years of modern fiction from Washington Irving's *The Devil and Tom Walker* 1824 through James M Cain's *Double Indemnity* 1936 Several classic works of literary fiction are examined a few largely forgotten stories and several popular novels Reading fiction through the lens of philosophy helps readers perceive the complexity and richness of fiction reinvigorating the pursuit of wisdom that lies just beneath the surface of the words on the page **Vision**, 1890
