to the emergence of a pattern of land stewardship This has resulted in imbalances between the holdings of resident cultivators and those of absentee landowners Comparative material from neighbouring Mwaakil atoll indicates the same general succession from larger to smaller units of tenure with increasing population While control of land by kin groups is usual in the Pacific other atoll societies show examples of individual tenure which also relate to changes in population densities Bountiful Island will be of interest to all anthropologists studying cross cultural comparisons in the theory of land tenure practices and the ethnology social anthropology and ethnohistory of Micronesia This book is also suitable for senior undergraduate and graduate courses in cultural ecology and area courses on the Pacific [O - Z Xinzhong Yao,2003](#) This

of Moralization Chenhong Ge,2020-04-25 This book summarizes the author s extensive research on Confucian morality

issues and focuses on elaborating the extremely important and unique role of moral thought in Confucian ideology. The book shares the author's own standpoints on a range of issues including where moral thoughts originated, what the major principles are, and what methods were adopted in Confucianism to form a comprehensive and in-depth interpretation and help readers achieve a better understanding. Moreover, the book focuses on the similarities and differences between Chinese and western cultures and presents an in-depth analysis of the differences and roots regarding various aspects including Chinese and western historical development paths, thoughts and cultures, national spirits, national mentalities, and social governance models. The formation of either culture has its own practical reasons and historical roots. The book represents a major contribution helping readers understand the similarities and differences between Chinese and western cultures and social civilizations, enabling them to integrate and learn from Chinese and western cultures and promoting a better development for Chinese society and the international community alike. Combining detailed data and an approachable style, it contributes to the legacy of Confucianism by applying a critical attitude. The author thinks out of the box in terms of theoretical analysis and studies on certain issues. As such, the book will be of great academic value in terms of studying China's ideological culture, especially its morality culture, and will benefit scholars and research institutions alike.

The Viking-age Rune-stones Birgit Sawyer, 2000. There are over 3000 runic inscriptions on stone made in Scandinavia in the late Viking Age. This book is the first attempt by a historian to study the material as a whole. The analysis reveals significant regional variations that reflect different stages in the process of conversion and the growth of royal power. Many monuments were declarations of faith or manifestations of status but virtually all reflect inheritance claims and cast unexpected light on the prehistory of the inheritance customs found in later Scandinavian law codes. The results of this analysis make a significant contribution to understanding developments in other parts of the Germanic world as well as Scandinavia. The inclusion of a digest of the data base on which this book is based will facilitate further study of this rich vein of evidence.

Documenting Transnational Migration Richard T.

Antoun, 2005-07-01. Most studies on transnational migration either stress assimilation, circulatory migration, or the negative impact of migration. This remarkable study, which covers migrants from one Jordanian village to 17 different countries in Europe, Asia, and North America, emphasizes the resiliency of transnational migrants after long periods of absence, social encapsulation, and stress, and their ability to construct social networks and reinterpret traditions in such a way as to mix the old and the new in a scenario that incorporates both worlds. Focusing on the humanistic aspects of the migration experience, this book examines questions such as birth control, women's work, retention of tribal law, and the changing attitudes of migrants towards themselves, their families, their home communities, and their nation. It ends with placing transnational migration from Jordan in a cross-cultural perspective by comparing it with similar processes elsewhere and critically reviews a number of theoretical perspectives that have been used to explain migration.
