

The background of the cover is a detailed illustration of a geological fault line. A large, jagged crack runs diagonally across the upper half of the image, separating a brown, rocky terrain from a lower, more developed area. Below the fault, a city is visible, with several multi-story buildings and a curved road or bridge structure. The overall color palette is muted, consisting of browns, tans, and greys, giving it a historical or scientific feel.

Fault Lines In Chinas Economic Terrain:

Fault Lines in China's Economic Terrain, 2003 The focus of this research is the potential adversities or fault lines the terms are used synonymously facing China's economy and affecting its prospects for sustaining high growth through the coming decade Thus we deliberately concentrate on what might go seriously awry in the economy and in the process slow or even reverse China's double digit growth rates in the 1980s and high single digit growth in the 1990s and the early part of the 21st century This book is the product of a project jointly sponsored by the Office of Net Assessment in the Department of Defense and the Smith Richardson Foundation Their sponsorship was based on a mutual understanding that their joint support would enable the work to be expanded beyond what would have been possible if funding were confined to one sponsor alone The project was implemented through RAND's National Defense Research Institute NDRI a federally funded research and development center sponsored by the Office of the Secretary of Defense the Joint Staff the unified commands and the defense agencies The book should be of interest and use to those in the policy community and the academic community concerned with China and with the economic and security environment in the Asia Pacific region Fault Lines

in China's Economic Terrain Charles Jr. Wolf, K. C. Yeh, Benjamin Zycher, Nicholas Eberstadt, Sungho Lee, 2003-06-24 The authors consider how and by how much China's stellar economic performance might be impaired by eight potential adversities that China may face in the next decade unemployment poverty and social unrest corruption HIV AIDS and epidemic diseases water resource problems and pollution energy consumption and prices the fragile financial system and state owned enterprises curtailed foreign direct investment and serious military conflicts **Fault Lines In China's**

Economic Terrain Tora K. Bikson, Sally Ann Law, Bridger M. Mitchell, 2003 What are the major challenges fault lines and potential adversities these terms are used synonymously that China's economic development will encounter over the next decade How severely will China's overall economic performance be affected if these adversities occur separately or in clusters This book addresses these key questions China has confronted in the past two decades five of the eight fault lines that the authors consider unemployment corruption water resources HIV AIDS and financial fragility and nonetheless it has sustained high rates of economic growth Therefore in assessing the potential effects of these fault lines on China's future economic performance the authors focus on whether why and by how much their intensities may increase that is on changes rather than on the prevailing levels of each fault line For the other three fault lines examined which have not previously occurred or recurred oil price shocks foreign direct investment shrinkage and serious military conflicts the authors consider the circumstances under which they might arise and their resulting economic effects **Historical Dictionary of the**

People's Republic of China Lawrence R. Sullivan, 2016-08-03 When the Chinese Communist Party CCP assumed power in October 1949 China was one of the poorest nations in the world and so weak it had been conquered in the late 1930s and early 1940s by its neighbor Japan a country one 10th its size More than five decades later the People's Republic of China PRC

is an emerging economic political and major military power with the world's fastest growing economy and largest population 1.35 billion in 2015. A member of the United Nations Security Council since the early 1970s and a nuclear power, China wields enormous influence in the world community while at home what was once a nation of largely poverty stricken peasants and urban areas with little to no industry has been transformed into an increasingly urbanized society with a growing middle class and an industrial and service sector that leads the world in such industries as steel and textiles while becoming a major player in computers and telecommunications. All the while the country has remained under the tight political control of a one party system dominated by the Chinese Communist Party that despite periods of intense political conflict and turmoil governs China with a membership in 2014 of 88 million people the largest single organization on earth. This third edition of *Historical Dictionary of the People's Republic of China* contains a chronology, an introduction, appendixes and an extensive bibliography. The dictionary section has over 700 cross referenced entries on important personalities, politics, economy, foreign relations, religion and culture. This book is an excellent access point for students, researchers and anyone wanting to know more about China.

Historical Dictionary of the Chinese Economy Lawrence R. Sullivan, 2017-11-08. The *Historical Dictionary of the Chinese Economy* covers the world's second largest macro economy. Extensive attention throughout the volume is given to the historical development of the Chinese economy since the establishment of the People's Republic of China (PRC) in 1949. Included is a review of developments during the period of central economic planning adopted from the Soviet Union 1953-1978 and in depth information and analysis on the various policies and fundamental changes brought about in China by the inauguration of economic reforms from 1978-1979 through 2016. This book contains a chronology, an introduction and an extensive bibliography. The dictionary section has over 400 cross referenced entries on critical sectors of the economy including automobiles, banking and finance, national currency, economic regulation, trade and investment and important industries such as agriculture, computers and electronics, iron and steel, real estate and shipping. This book is an excellent resource for students, researchers and anyone wanting to know more about China's economy.

The Chinese Economy and its Challenges Charles C.L. Kwong, 2019-12-09. The remarkable transformation of the Chinese economy in terms of its structure and growth has drawn unprecedented attention from academics, policy makers and businessmen alike. In the past four decades, China swiftly transformed from a centrally planned to a market oriented economy with an economic size just behind the US and ahead of Japan. Amid commendations for China's economic success offering valuable reform and growth lessons to other developing countries, underlying challenges have been emerging which constitute long term risks in shaking China's sustainable success. These challenges encompass a wide range of sectors and issues such as the rural-urban divide, state monopoly, policy loans in the banking sector, lack of skilled and sophisticated workers, environmental degradation etc. This book unveils the risks and challenges embedded in China's spectacular economic success and demonstrates that effective handling of these challenges is vital for China to avoid falling into the middle income trap. It is elucidated that

feasible solutions are available to accommodate these risks and the clue of success lies on the willingness and ability of China's central leaders to implement further reforms This book is a valuable reference for undergraduate and postgraduate students academics and public and business policy makers who are concerned about the current status and future development of the Chinese economy **China's Great Economic Transformation** Loren Brandt, Thomas G.

Rawski, 2008-04-14 This landmark study provides an integrated analysis of China's unexpected economic boom of the past three decades The authors combine deep China expertise with broad disciplinary knowledge to explain China's remarkable combination of high speed growth and deeply flawed institutions Their work exposes the mechanisms underpinning the origin and expansion of China's great boom Penetrating studies track the rise of Chinese capabilities in manufacturing and in research and development The editors probe both achievements and weaknesses across many sectors including China's fiscal legal and financial institutions The book shows how an intricate minuet combining China's political system with sectorial development globalization resource transfers across geographic and economic space and partial system reform delivered an astonishing and unprecedented growth spurt **The Economic Transformation Of China** Dwight Heald

Perkins, 2015-03-27 The Economic Transformation of China is a collection of essays written by an eminent observer of the Chinese economy The book covers the Chinese transformation beginning in the 1950s and continuing through the second decade of the twenty first century It includes an analysis of the forces that held China back before 1949 the nature of the economy as it operated under the Soviet model of development and the transformation since 1978 into a socialist market economy The essays of the post 1978 era reflect the author's view of the state of the reform effort at the time the essay was written and carries the story up to the 2012 2013 slowdown in economic growth Looking Backward and Forward Charles

Wolf Jr., 2013-09-01 This collection of twenty five essays written over the past five years by international economic policy expert Charles Wolf Jr covers a range of worldwide economic political security and diplomatic issues Wolf looks at the challenges facing the United States at home and around the globe including critical issues regarding China Japan Korea Russia Iraq and other key locales Throughout the book the author offers his often controversial viewpoints such as his assertion that unilateralism in U S national security policy may sometimes be preferable to multilateralism or that the erroneous expectation that Iraq possessed nuclear weapons does not imply that the intelligence leading to this expectation was flawed Wolf reexamines each essay in the light of later developments with a postaudit comment to address whether the original argument is still valid and relevant compared with when it was first written The Three Faces of Chinese Power

David M. Lampton, 2008-04-30 By learning more not only about China but from China America is more likely to sustain a constructive relationship with the rising China Lampton insightfully provides us with the much needed guidance Zbigniew Brzezinski Center for Strategic and International Studies Professor Lampton's stimulating and well researched book provides a comprehensive framework for intelligent thinking about the implications for the United States and the world of the rapid

expansion of China's economic and military power. Serious students of world affairs and non-specialists concerned about the outlook for U.S.-China relations will all benefit from the historically based insights and judgments that fill the pages of this thought-provoking volume. J. Stapleton Roy, former United States ambassador to China. China in 2020 Angang Hu, 2012-11-26 Explains how China as the world's largest emerging market will impact global economic growth, FDI flows, energy consumption, climate change, and other arenas with a proposed strategic framework that would guide the country's rise while maximizing positive impacts and minimizing any negative externalities. Provided by publisher. **Competition Laws, Globalization and Legal Pluralism** Qianlan Wu, 2014-07-18 Building upon a theoretical framework and empirical research, this book provides a thought-provoking analysis of the interests, strategies, and challenges that China has faced in developing its Anti-Monopoly Law (AML) in the context of economic globalization. The book comprises three main parts: Part I reviews the directions of convergence of global competition law; Part II provides a contextual analysis of China's market governance and its strategic interests; and Part III examines the latest enforcement of the Anti-Monopoly Law by focusing on the interactions between global actors and China, the relationships between Chinese competition and sectoral regulators, and the enforcement of global competition law norms in the Chinese context. This book is one of the first to provide a critical understanding of China's experience as a new competition regulator set against the background of the plural sources of global competition laws. *The Rise of China* Gary Schmitt, 2009-05-26 Although the United States is rightly preoccupied with the threat of Islamist terrorism and the two conflicts in Iraq and Afghanistan, there is a wide consensus among American strategic thinkers that America's greatest challenge over the next decades will be the rise of China. With its expanding economy and formidable military growth, China is positioning itself to challenge the United States as the greatest international power on the world stage. *The Rise of China* is a collection of essays about the nature of that threat and what the U.S. and its allies might do in the areas of foreign and defense affairs to meet it. Contributing authors: Michael R. Auslin, Dan Blumenthal, Ellen Bork, Nicholas Eberstadt, Robert Kagan, Gary J. Schmitt, and Ashley J. Tellis. They contemplate how these two rising ambitious powers are contesting for leadership in East Asia and ask if the sanguine forecasts for a peaceful century will hold true. Although the Chinese have been very careful to look like a cautious power and in key respects have been, they see the international scene as fundamentally one of antagonism. And this is unlikely to change until and unless the regime changes. It is this China, the authors of *The Rise of China* assert, that we will be dealing with for some time to come. **The New Chinese Leadership** Yun-han Chu, Zhicheng Luo, Ramon H. Myers, 2004-03-18 This volume presents a concise history of how China's Communist Party (CCP) selected a new generation of leaders in late 2002 and why the individuals in their late 40s and 50s were so well qualified to govern China. These leaders are trying to lead China to become a regional and world power in which their people can enjoy a modest living standard and take pride in the nation's achievements. Addressed to the expert or ordinary reader, these essays see China's leaders as challenged by a new trend visible only in the last decade of a

widening gap between the losers in society and the winners of the recent economic and political reforms The leaders of the largest single ruling party and state authority in the world must somehow reverse that trend if China is to survive as one nation This volume explains they are doing that by reconfiguring their huge command economy promoting a market economy and undertaking gradual political reforms It is unflinching in its discussion of how China's leaders face mounting political corruption spreading unemployment growing disparity of wealth and income and a crisis of belief *Mapping the Global Future* National Intelligence Council (U.S.),2004 Takes a long term view of the future Offers a fresh look at how key global trends might develop over the next decade and a half to influence world events Offers a range of possibilities and potential discontinuities Builds upon methods used to develop two earlier studies *Global Trends 2010* and *Global Trends 2015* Employs a wide variety of innovative methodologies and approaches including extensive consultations with a wide range of governmental and non governmental experts Includes a CD ROM in a pocket which contains the entire text of the report National Intelligence Council 2004 13 *China Rules* I. Alon,J. Chang,M. Fetscherin,C. Lattemann,J. McIntyre,2009-08-12 The development of the Chinese MNC is a new feature of globalization one that will undoubtedly change the world Why Chinese firms internationalize how they do so and what the impact of their internationalization on developed markets will be are the foci of this book *The Culture of Leadership in Contemporary China* Paul Michael Linehan,2017-12-06 The resurgence of Confucianism Daoism and Buddhism in the context of Chinese leadership values has emerged as a foundation for a new generation of leaders The once in a decade transition of China's leadership witnessed the ascendancy of a consensus oriented fifth generation of leaders supporting a central authoritative figure whose priority will likely include the reconciliation of a waning communist ideology juxtaposed with its ostensible embrace of capitalism How will Chinese Communist Party authority ideology and control address the encroachment of Western values that are centered on Roman law Greek philosophy and Christian religion which prioritizes individual freedom and democracy This book examines the role of traditional Chinese values ideology and philosophy as a key determinant in modern China's leadership succession The author asserts that as communist ideology wanes Chinese leaders will turn to their own traditional values found in Confucianism Daoism and Buddhism to establish legitimacy to rule as they seek to promote Chinese prominence and greatness in the world The author's research assesses China's promotion of its own traditional values in rejecting foreign value influence Since the inception of modern China at the beginning of the 20th century China's leadership transition has evolved from an authoritarian cult like dictatorship to a consensus oriented process In researching this metamorphosis this book offers social political cultural and historical perspectives to demonstrate that Chinese human values and character factors have risen in prominence as key elements in the mandate of Chinese governance and leadership The author concludes that Chinese leadership values and its study and diffusion across sectors of Chinese leadership including business organizations and government have become a means to accentuate Chinese values as a viable alternative to Western claims

of absolute and universally accepted values **Globalization in 2020** Janet P. Brown, 2006 This book presents an analysis of globalisation as it is projected to be in 2020 It is based on a Report of the National Intelligence Council's 2020 Project based on consultations with non governmental experts around the world The Coming China Wars Peter Navarro, 2006 China's breakneck industrialization is placing it on a collision course with the entire world Tomorrow's China Wars will be fought over everything from decent jobs livable wages and leading edge technologies to strategic resources such as oil copper and steel even food water and air Economist Navarro previews all these potential conflicts and reveals the urgent radical decisions that must be made to avoid catastrophe China's thirst for oil is driving nuclear proliferation in Iran genocide in the Sudan even Japan's remilitarization Navarro reveals China's shocking role in the drug trade and how its flesh trade may help trigger tomorrow's worst AIDS crisis how China has become the world's most ruthless imperialist how it is promoting global environmental disaster and perhaps most terrifying of all how this nuclear superpower and pirate nation may be spiraling toward internal chaos From publisher description **The Economic and Strategic Rise of China and India** D. Denoon, 2007-09-03 This book demonstrates the connection between economic and strategic developments in Asia with several interrelated arguments The author asserts that there is no single explanation for the 1997 financial crisis in the Pacific Rim states nor for the slow recovery afterwards The author also points out that China is not the only major power rising in Asia India is close behind and warns that while many observers are proceeding as if current U S treaties will continue indefinitely Asia is already preparing for changing patrons
