been found on almost every continent including recent finds in the deserts of Saudi Arabia Afghanistan and northern India as well as hundreds of excavations of giant mummies and skeletons across the United States corresponding directly with Native American accounts of red haired giants He also examines reports from famous explorers such as Magellan Sir Francis Drake and Desoto of their encounters with giants on the North American continent Revealing how giants represent the true earthborn race Chouinard explains how they engaged in open conflict with the extraterrestrial gods who created humanity for forced labor and how they passed their sophisticated culture and civilization on to humanity before being nearly wiped out in the great age of cataclysms

Lies My Teacher Told Me James W. Loewen, 2018-07-17 Every teacher every student of history every citizen should read this book It is both a refreshing antidote to what has passed for history in our educational system and a one volume education in itself Howard Zinn A new edition of the national bestseller and American Book Award winner with a new preface by the author Since its first publication in 1995 Lies My Teacher Told Me has become one of the most important and successful history books of our time Having sold nearly two million copies the book also won an American Book Award and the Oliver Cromwell Cox Award for Distinguished Anti Racist Scholarship and was heralded on the front page of the New York Times For this new edition Loewen has added a new preface that shows how inadequate history courses in high school help produce adult Americans who think Donald Trump can solve their problems and calls out academic historians for abandoning the concept of truth in a misguided effort to be objective What started out as a survey of the twelve leading American history textbooks has ended up being what the San Francisco Chronicle calls an extremely convincing plea for truth in education In Lies My Teacher Told Me James W Loewen brings history alive in all its complexity and ambiguity Beginning with pre Columbian history and ranging over characters and events as diverse as Reconstruction Helen Keller the first Thanksgiving the My Lai massacre 9 11 and the Iraq War Loewen offers an eye opening critique of existing textbooks and a wonderful retelling of American history as it should and could be taught to American students

Aliens and Man Jerome A. Kroth, 2010 When it comes to extraterrestrials UFOs crop circles and ancient astronaut literature most intelligent readers are repulsed by New Age hype turned off by Erik Van Daniken flustered by blatant pseudo science and deeply chagrined at how even the History Channel got dragged into the tabloid and sensational Yet many intelligent open minded readers harbor secret interests in the Great Pyramid and how it was built in mythic tales of sky gods coming and going from Ezekiel to the Rig Veda They are awed by the intricate fractals in crop circles and they more than take notice when a NASA astronaut says he was trailed in space by UFOs That questioning readership however swims in a vast sea of agnosticism curious but not convinced And there just aren't any books for them None they can trust None that reaches them None that transcends tabloid fantasies to authentically treat issues with enough dispassion and scholarly erudition not to insult their intelligence Here Dr Kroth gives the run down on a wide range of evidence and ponders how reliable any of it may be Readers are left with all the elements to form their own equation

Lies My Teacher Told Me

James W. Loewen, 2008 Criticizes the way history is presented in current textbooks and suggests a more accurate approach to teaching American history

Psyche's Exile: an empirical odyssey in search of the soul Jerry Kroth, 2011 Psyche's Exile an empirical odyssey in search of the soul Psyche means soul in Greek and psychology literally means the study of the soul For over a century American psychology has gone in precisely the opposite direction Soul mind and mind brain with no exceptions This reductionist paradigm is challenged in this book as Professor Kroth reviews eight politically incorrect forbidden databases in his empirical pursuit of the immortal soul of the ages near death experiences deathbed visions precognitive dreams premonitions synchronicity telepathy states of possession just to name a few The journey leads to a fascinating rediscovery of the soul Reviews Psyche's Exile is an absolute treasure trove of carefully collected experiential and experimental data spanning the research areas of anthropology sociology religion spirituality psychology and physics Although we are still some human evolutionary time away from experimentally proving the existence of the human soul there is certainly enough good data available at present to make it a viable working hypothesis Dr Kroth is dedicated to his craft as a professional explorer of nature in its many forms For myself I wouldn't hesitate to recommend this book to my scientific colleagues and my friends William A Tiller Ph D professor of physics Stanford University Author of Science and Human Transformation *Time*, 1990

12,000 BC Jerry Kroth, 2024-10-01 Professor Jerry Kroth's book 12 000 BC Two Extinction Level Events We Know Nothing About explores the often popularized ancient apocalypse narratives so frequently depicted on Netflix and YouTube Kroth's approach however is systematic in that it examines the science behind these controversies without tiptoeing into fringe or conspiracy literature to establish its credentials For example mainstream archeology alleges the ice age came to its conclusion in a gradual manner while the spread of Homo sapiens throughout the world resulted in the extinction of 35 species of megafauna mainly as a result of humans hunting down large animals Woolly Mammoths Mastodons Giant Sloths and others went extinct because of this hunter overkill hypothesis so says the mainstream A counter argument to this view is that two major cosmic cataclysms occurred first a Miyake solar storm that caused radiocarbon levels to rise across the planet This occurred 14 300 years ago It was one of the largest solar storms ever to hit the planet far greater than the Carrington Event of 1859 and it caused massive melting of the ice caps and flooding incineration of vegetation fused rocks etc Dr Kroth

presents a great deal of experimental data to support this theory backed up by interviews with scientists from around the world and not from anthropology or archeology at all but from solar physicists and other physical scientists A rapid increase in global temperatures resulted but as a result of the soot rising from the cataclysm global temperatures again fell precipitously eventually ushering in the Younger Dryas a period of unstable rising and falling global temperatures Then 12 300 years ago a second cataclysmic event happened A giant comet fragmented over the Northern Hemisphere destroying Lake Agassiz and causing massive flooding across America It similarly exacerbated the extinctions that were taking place The physical evidence nanodiamonds fused rocks radiocarbon levels in fossilized tree rings all point to the reality of these planetary shocks In Part II of 12 000 BC Dr Kroth examines the impact these events had on humanity Besides wiping out the Clovis people of North America recent DNA studies show that the human race also experienced a precipitous decline at this time Kroth then takes up issues of antediluvian human societies and looks at the evidence supporting the presence of advanced human societies before these cataclysms happened Gobelki Tepe Atlantis the Yonaguni Monuments Gulang Padang His conclusion from a review of this literature in contradiction to Graham Hancock s position is that advanced human societies did not in fact exist Stone Age peoples yes but some advanced mathematically sophisticated antediluvian culture does not succeed in passing through Kroth s filter The evidence is just not there Perhaps if Atlantis one day is discovered this theory will be revised but as it stands the earliest sophisticated and advanced human culture still remains that of Sumeria of only 6 000 years ago Part III of the text presents a uniquely controversial hypothesis to explain the rapid and exponential rise of human society In a mere 6 000 years human culture and technology developed so rapidly that conventional evolutionary biology and mainstream anthropology have enormous difficulty trying to explain how that all happened Why did it take Homo sapiens 196 500 years to invent a wheel Why was it 194 600 years before he got the idea of cultivating potatoes Kroth provides a provocative explanation for these anomalies and vicissitudes of human cultural advance **New Age Journal**

The Piri Reis Map of 1513 Gregory C. McIntosh, 2000 One of the most beautiful maps to survive the Great Age of Discoveries the 1513 world map drawn by Ottoman admiral Piri Reis is also one of the most mysterious Gregory McIntosh has uncovered new evidence in the map that shows it to be among the most important ever made This detailed study offers new commentary and explication of a major milestone in cartography Correcting earlier work of Paul Kahle and pointing out the traps that have caught subsequent scholars McIntosh disproves the dubious conclusion that the Reis map embodied Columbus's Third Voyage map of 1498 showing that it draws instead on the Second Voyage of 1493 1496 He also refutes the popular misinterpretation that Reis's depictions of Antarctica are evidence of either ancient civilizations or extraterrestrial visitation McIntosh brings together all that has been previously known about the map and also assembles for the first time the translations of all inscriptions on the map and analyzes all place names given for New World and Atlantic islands His work clarifies long standing mysteries and opens up new ways of looking at the history of exploration

Modernities Joseph Masheck, 1993 Joseph Masheck wants to take art historical and modern as a field of lively interrelations as if in random access memory retrieval rather than just second the motion that art history should be nonlinear and he takes the task of art criticism to be theory in practice Thus significant new art is represented in the thirty essays in *Modernities* besides already classic modern architecture sculpture and photography and contemporary painting by artists Alternating between a comprehensive sense of art history and engagement with the new and unplumbed contemporary arts he considers himself a kind of aesthetic double agent Because Masheck is concerned with the concrete standing of artworks he speculates on how works of art including Marcel Duchamp's ready-mades relate to other things More general themes range from the origin of the modern sense of form in prehistoric art to the historical underpinnings of expressionism and on to latter day graffiti culture
