**Words that Tear the Flesh** Stephen Alan Baragona, Elizabeth Louise Rambo, 2018-01-22 The rhetorical trope of irony is well trod territory with books and essays devoted to its use by a wide range of medieval and Renaissance writers from the Beowulf poet and Chaucer to Boccaccio and Shakespeare however the use of sarcasm the flesh tearing form of irony in the same literature has seldom been studied at length or in depth Sarcasm is notoriously difficult to pick out in a written text since it relies so much on tone of voice and context This is the first book length study of medieval and Renaissance sarcasm Its fourteen essays treat instances in a range of genres both sacred and secular and of cultures from Anglo Saxon to Arabic where the combination of circumstance and word choice makes it absolutely clear that the speaker whether a character or a narrator is being sarcastic Essays address among other things the clues writers give that sarcasm is at work how it conforms to or deviates from contemporary rhetorical theories what role it plays in building character or theme and how sarcasm conforms to the Christian milieu of medieval Europe and beyond to medieval Arabic literature The collection thus illuminates a half hidden but surprisingly common early literary technique for modern readers

1300 medieval men and women were beginning to measure multitude counting for example numbers of boys and girls being baptized Their mental capacity to grapple with population to get its measure was developing and this book describes how medieval people thought about population through both the texts which contained their thought and the medieval realities which shaped it They found many topics such as the history of population and variations between polygamy monogamy and virginity through theology Crusade and travel literature supplied the themes of Muslim polygamy military numbers the colonization of the Holy Land and the populations of Mongolia and China Translations of Aristotle provided not only new themes but also a new vocabulary with which to think about population In this innovative new study Peter Biller challenges

the view that medieval thought was fundamentally abstract He investigates medieval thought's capacity to deal with concrete contemporary realities and sets academic discussions of population alongside the medieval facts of birth and copulation and death

*The Destruction of Medieval Manuscripts in England* Krista A. Milne, 2025-03-28 The Dissolution of the Monasteries 1536-40 is widely held as the single most significant event in England's history of the destruction and loss of medieval manuscripts Despite this consensus the ultimate impact of the Dissolution and of medieval manuscript destruction during the centuries that followed remains unclear How did Reformation era losses compare to those which preceded the Reformation and to those that followed it How did the losses caused by sectarian conflicts compare to more quotidian kinds of loss such as improper storage or deliberate de-acquisition Which manuscripts were targeted when were they targeted and how should one account for the inevitably skewed record In *The Destruction of Medieval Manuscripts in England* Krista A Milne asks these questions to better understand literary taste behavioural patterns and the circulation of knowledge throughout the medieval period Milne explores methods drawn from quantitative codicology to explore the most significant moments of manuscript loss in the history of England The evidence suggests that this destruction was much more limited in its targets but far more extensive in scope than is usually acknowledged Overwhelmingly throughout the investigation the manuscripts most at risk were those considered too new to qualify as antique but too old to be au courant

This pattern of destruction which Milne describes as the principle of age without vintage remains apparent in many different domains today
