Lightening And Rainbows:

Metamorphoses of Light Walter Bühler, 2015-05-25 Goethe called colour the deeds and sufferings of the light victorious deeds when it pierces matter and suffering when it endures the darkness in matter Indeed there is no greater contrast in the whole cosmos than that between matter and light Having spent time in the Arctic Circle in Lapland where with the sky filled in a flood of colour the midnight sun shines for weeks and the long polar night is brightened by the shining northern lights the author was left with unforgettable memories Thinking through these experiences led to this short but penetrating work a study of the pathways and metamorphoses of light from a global perspective The essence of light is to shine it rays out dynamically in all directions at an unimaginable speed never resting The nature of matter in contrast is heavy static and condensed But matter can also let light through as with crystal or in the transparent and flowing element of water evaporation and even air Water and air thus act as mercurial factors allowing the creative potential of light to appear in a diversity of colours The deeds and sufferings of light are further to be found in many phenomena of the inorganic world such as the northern lights By seeing the laws within phenomena Goethe approached an understanding of the etheric formative forces The object of this book is the observation of nature's natural wonders using Goethe's methodical process Apart from the rainbows lightning and northern lights in the title the author discusses the blue of the sky the colours of twilight and the dewdrop and halos and other light phenomena The power of imagination produced by the observer creates depth and inwardness says the author In such a state of consciousness one's inner eye can picture a threefold global union of light which speaks to a threefold organization of the Earth Bühler's concentrated work will inspire readers to make their own observations of the optical phenomena in our atmosphere learning anew to treasure our planet for what it is a human scale home for which we are all responsible

Lightening and Rainbows Michael Carroll, 1997-07 **The Rainbow's Light** Derek Earls, 2016-10-12 Droplets of evil had diluted and eventually dispersed the white power of the sun's special light The special light had a purpose It was created for such a time as this The purpose carried a good intent but some devilry had diluted and dispersed the good intent It was remembered by those occasions when rainbows arched the sky The rainbows appeared less to men and others forgot But most men had forgotten the purpose of the rainbows reminder and most men and others had never known the purpose of the special light It was always known by a few that such a time as this would come The few intent on good feared the coming of such a time Now the greater number who were evil were aware that the time or a time had come They were at first unaware that the special light might reconvene as a whole and that the white power of the whole might thwart their intent These others were not men not human Though they had man's outward appearance most were subhuman some were superhuman Evil intent rested with the superhuman but to them the intent was not evil just inevitable Only those carried upon the waves of the special light had the energy to combat the evil intent and then it was only when they came together

Consciousness and the World Brian O'Shaughnessy,2000-07-13 Brian O Shaughnessy puts forward a bold and original theory of consciousness one of the most fascinating but puzzling aspects of human existence Whatever mystery there may be about the origins of consciousness O Shaughnessy suggests that there is no mystery about what it is He proceeds to give a philosophical elucidation of its nature analysing it into purely psychological constituents It is his contention that consciousness consists in a closely knit complex of occurrent mental phenomena and powers with thinking and self knowledge at the centre and nothing else O Shaughnessy s analysis accords a position of pre eminence to the epistemological properties of consciousness With this in mind he investigates the closely linked concepts of attention and perception alongside that of consciousness He sets out an integrated theory of these three fundamental phenomena demonstrating how close to the heart of consciousness is perception envisaged already in the very concept In effect he advances en passant a variant of empiricism which is based upon the nature of consciousness A considerable part of the book is devoted to providing a theoretical account in these terms of those important senses through which the mind constitutes physical objects in space above all the highly developed sense of sight but also the primordial body senses proprioception and touch which underpin all else in the mind In such ways concrete interaction between consciousness and the world is realized and the epistemological basis of mind established *Consciousness and the World* is a rich and exciting book a major contribution to our understanding of the mind *We Are Becoming* Leah Light,2007-05-11 If you have ever Loved and lost and loved again coped with an impossible family member juggled marriage children career and a mortgage while somehow trying to find time
