Strategic Family Therapy Cloé Madanes, 1992-04-16 Madanes lucid coherent and practical guide for familytherapists is a welcome addition to the proliferating literature byfamily therapy theorists and practitioners The book is concise well organized and clearly written Contemporary Psychology A classic work which uses imaginative techniques to help achievebalance within the family It gives attention to specific problems such as violence drug abuse and depression and seeks the hidden meaning in these symptoms which are clues to the underlying familystructure      **Fire, Native Peoples, and the Natural Landscape** Thomas Vale, 2013-04-16 For nearly two centuries the creation myth for the United States imagined European settlers arriving on the shores of a vast uncharted wilderness Over the last two decades however a contrary vision has emerged one which sees the country s roots not in a state of pristine nature but rather in a human modified landscape over which native peoples exerted vast control Fire Native Peoples and the Natural Landscape seeks a middle ground between those conflicting paradigms offering a critical research based assessment of the role of Native Americans in modifying the landscapes of pre European America Contributors focus on the western United States and look at the question of fire regimes the single human impact which could have altered the environment at a broad landscape scale and which could have been important in almost any part of the West Each of the seven chapters is written by a different author about a different subregion of the West evaluating the question of whether the fire regimes extant at the time of European contact were the product of natural factors or whether ignitions by Native Americans fundamentally changed those regimes An introductory essay offers context for the regional chapters and a concluding section compares results from the various regions and highlights patterns both common to the West as a whole and distinctive for various parts of the western states The final section also relates the findings to policy questions concerning the management of natural areas particularly on federal lands and of the naturalness of the pre European western landscape      Disasters, Fires and Rescues Daniel Knowles, 2016-12-16 This Book has stories about Little Bobby and me along with numerous others and some of the calls that we went on during the period of time of about 13 years with the Squad and also away from it I first met the Mascot in June of 1955 to about 1963 when our lives took different paths and we drifted away from each other for the next 47 or so years except for special occasions when we met up at certain functions including many major calls of the later 60s and 70s the riots in 1967 when Martin Luther King was killed the 14th Street Bridge plane crash in the Potomac River      *Technical Paper*

,1929     Feeling the heat: International perspectives on the prevention of wildfire ignition Janet Stanley, Alan March, James Ogloff, Jason Thompson, 2020-09-01 In the context of climate change world population growth and crashing ecological systems wildfire is often a catastrophic and traumatic event Its impact can include loss of life life changing injuries long term psychological stress increases in domestic violence destruction of properties business and livestock long term housing insecurity increased insurance premiums fire fighting legal and health costs as well as significant changes and species losses in the natural environment In Australia an average of 4 500 wildfires occur weekly Yet how to prevent these wildfires 85% of which are caused by human activities has received extraordinarily little attention The current approach to the prevention of arson can be summarised as small in scale uncoordinated and rarely evaluated Feeling the heat International perspectives on the prevention of wildfire ignition is the culmination of over a decade of research into wildfires and arson taking an interdisciplinary approach to comprehensively understand the topic This book reviews current international knowledge and presents new findings on political spatial psychological socio ecological and socio economic risk factors It argues that if we are to reverse the increasing occurrence and severity of wildfires all prevention approaches must be utilised broadening from heavy reliance on environmental modification Such prevention measures range from the critical importance of reducing greenhouse gases to addressing the psychological and socio economic drivers of arson In particular it calls for a coordinated and collaborative approach across sectors including place based state and country coordination as well as an international body It will hold appeal for researchers and students from a range of disciplines and interests government planners and policymakers emergency services counsellors and NGOs and those in agriculture and forestry     Playing With Fire Paul Heiney, 2017-09-07 How to get sparks back in your life and keep them burning The blaze of a log fire on a cold night speaks to the heart in a way no other flame can It has character and ever changing form it has vibrant colour and a balletic movement Indeed it was the flame that transformed the way life was lived on earth but now that primary driver of evolution finds itself being extinguished in a modern world of microwaves induction hobs and central heating Gradually the flames are going out as houses are now built without fireplaces bonfires are banned and schoolchildren are forbidden to use the Bunsen burner But the sight of a flame remains as evocative as ever Playing with Fire wants to inspire and teach looking at the history of fire and showing the wonders that the burning flame can conjure     **Serial Crime** Wayne Petherick, 2009-06-13 Serial Crime Second Edition examines serial predatory behavior and is divided into two main parts Part one deals with behavioral profiling and covers a variety of critical issues from the history of profiling and the theoretical schools of thought to its treatment in the mainstream media This updated edition includes new sections on the problems of induction metacognition in criminal profiling and investigative relevance Part two deals more specifically with a number of types of serial crime including stalking rape murder and arson Chapters on each of these crimes provide definitions and thresholds and discussions of the offenders the crime and its dynamics Considerations for behavioral profiling and investigations and the
