**Technology Transfer** Sally Rood, 2018-02-06 This title was first published in 2000 Due to budget cuts and competitiveness pressures determining the outcome of technology transfer from government R D laboratories to private industry and entrepreneurial start ups is of increasing interest This book presents a series of case studies of successful technology transfer by examining the same list of topics for each case It presents a format for analyzing the cases topic by topic a methodology that could be used by any R D laboratory The book also goes one step further and compares the cases that took place prior to national technology transfer legislation with those cases that took place after passage of such legislation An additional feature is the summary of existing attempts to measure and evaluate technology transfer This follows a background section on the technology policy context The analysis finds that there is a significant commercial impact from government laboratory transfer using this approach **Technology Transfer Challenges and Partnerships** United

Sternberg, 1992-11-03 A revolutionary technological development of the late twentieth century photonics embraces lasers  
fiber optics imaging devices and optical applications to computing It affects the fortunes of numerous industries and other  
than conventional microelectronics may now be the leading arena for worldwide technological rivalry While Japan has seen  
its photonic industries grow faster than any other high technology sector the United States where much of photonics  
originated has experienced a declining industrial capability in world markets Why is the U S floundering in this critical new  
technology Are market solutions adequate as a national response to such massive technological change After describing the  
history and economic implications of photonics this book places these questions in the context of industrial policy debates  
about the proper role of government in response to strategic industrial sectors The author then assesses the U S public policy  
response by examining various government programs directed at photonics These programs add up to an implicit  
government photonics policy but one that is shortsighted incoherent and unplanned Sternberg concludes that it is this failure  
to plan that explains United States retrogression in a critical technology      **Defense Management Journal** , 1975
