Feeling And Form In Social Life:

Feeling and Form in Social Life Lloyd E. Sandelands, 1998 Despite the significant contributions of Durkheim Freud Kroeber Mead Asch Giddens and others social science remains uncertain about its founding idea of society There is little certainty about what if anything is created when people come together in a romantic pair a family a club a work team a business corporation or a nation state which only leads to important philosophical problems for social scientists and practitioners *Feeling and Form in Social Life* shows how a vigorous and practical science of society can be built Drawing in part from the philosophy of Susanne Langer Lloyd Sandelands reveals human societies to be forms of life known intuitively as feelings of a whole rather than as observed interactions of persons These feelings which are personal and subjective are made public and objective by the uniquely human capacity for artistic abstraction Through art people turn invisible feelings and forms of society into visible objects and performances that can be shared and studied scientifically The book brings this idea of society to life with diverse examples of social feelings and forms expressed in a stadium chant folk dance gift ritual tree symbols photograph and organization chart Sandelands concludes with a powerful discussion of the implications of this idea for expanding the scope of social science and for resolving its persistent underlying confusions

A General Theory of Emotions and Social Life Warren D. TenHouten, 2006-11-22 Founded upon the psychoevolutionary theories of Darwin Plutchik and Izard a general socioevolutionary theory of the emotions affect spectrum theory classifies a wide spectrum of the emotions and analyzes them on the sociological psychological and neurobiological levels This neurocognitive sociology of the emotions supersedes the major theoretical perspectives developed in the sociology of emotions by showing primary emotions to be adaptive reactions to fundamental problems of life which have evolved into elementary social relationships and which can predict occurrences of the entire spectrum of primary complex secondary and tertiary emotions Written by leading social theorist Warren D TenHouten this book presents an encyclopaedic classification of the emotions describing forty six emotions in detail and presenting a general multilevel theory of emotions and social life The scope of coverage of this key work is highly topical and comprehensive and includes the development of emotions in childhood symbolic elaboration of complex emotions emotions management violence and cultural and gender differences While primary emotions have clearly defined valences this theory shows that complex emotions obey no algebraic law and that all emotions have both creative and destructive potentialities

Cole, 2023-07-28 First published in 1920 *Social Theory* endeavours to put together the social contents of various experiences of the ordinary man and to make them as far as they form one a coherent and consistent whole Social theory is not concerned directly with all the actions of individual men but mainly with their actions taken in concert through some temporary or permanent organized group and with the actions of such groups as they affect and react upon the individual It is not primarily concerned with the State but with the whole problem of human association that is of associative will and action This book will be of interest to students of economics political science and sociology Logic of Feeling Luke Munn, 2020-12-04 From the virulence of fake news to the rise of psychographic profiling emotion has become ascendant The new frontier of capitalization is not outward but inward the inner life of affect and emotion desire and disposition This book lays that new reality out with a series of close case studies A new set of technologies are emerging from facial coding to affective computing that attempt to render the emotional into the machine readable At the same time social media and smart home devices are becoming empathic attempting to draw out our affective participation and elicit our emotional expression In these encounters with the medial and the technical the emotional is remade Combining a close analysis of contemporary technologies such as Affectiva Facebook and Alexa with critical media theory *Logic of Feeling* Technology's Quest to Capitalize Emotion examines how the

quest to operationalize this inner life begins to reconfigure feeling itself **Perezhivanie, Emotions and Subjectivity** Marilyn Flier, Fernando González Rey, Nikolai Veresov, 2017-07-12 This book draws upon Vygotsky's idea of perezhivanie emotions and imagination and introduces the concepts of subjective sense and subjective configuration. These concepts are crucial for explaining and understanding children's development from a cultural-historical perspective. A book which theorises the relations between the social and the individual through a study of a child's perezhivanie which analyses emotions more holistically and advances the concepts of subjective sense and subjective configuration is much needed. This book examines the complexity of human development through a comprehensive elaboration of these concepts allowing for new insights to be put forward. It doesn't always follow the chronological order of Vygotsky's publications as many of his works remained in the family archives until the 1980s when his Selected Works were first published in Russian. There has long been a need for a contemporary book on the scholarly treatment of perezhivanie emotions and subjectivity and as such this book revisits dominant representations of these concepts and then puts forward new ways of conceptualising and using them in empirical research. The chapters cover a broad range of case studies where the concepts of perezhivanie emotions and imagination and subjective sense and subjective configuration are used to give new empirical and theoretical insights into the study of human development.

The Aesthetics of Image and Cultural Form Yi Chen, 2024-04-24 Offering an alternative mode of visual cultural analysis to the prevalent discursive model, this book proposes to situate analysis of Image within formal analyses of culture experience. Specifically, the discussion draws on theories of affective aesthetics with the view of addressing the sensual form of culture, i.e. cultural form. Therefore, the volume puts forward a mode of formalist analysis in visual cultural research which takes purchase on the idea of cultural form. A continuum of formalist attention between Image analysis, visual media, industrial design and probing of cultural forms establishes the theoretical underpinning of the book. These concepts are expounded through a case study which looks at formal experimentations and debates arising from 1960s avant-garde artistic practices in London.

The Victorian Painting of Modern Life Pamela Fletcher, 2024-12-30 This text offers a comprehensive and tightly focused account of the emergence and flourishing of British modern life paintings at mid-century. Contemporary subjects were new and risky in the late 1840s and early 1850s, immensely popular and much debated by 1858 and already falling out of fashion by the mid-1860s. The book follows this story chronologically, moving from the anxious attempts by young artists such as William Powell Frith and William Holman Hunt to capture modern life in a visual language that conveyed both the literal and emotional truths of contemporary experience through the new genre's explosion into popularity in the later 1850s and early 1860s and the critical debates and changing fashions that led to its diminishment by the end of that decade. The book will be of interest to scholars working in art history, British studies, visual culture, exhibition culture, museum studies and the sociology of art.

Cupchik, Janos László, 1992-09-25 *Emerging Visions of the Aesthetic Process* explores the processes underlying aesthetics and play from the perspectives of psychologists philosophers and semiologists It reveals the different ways in which scholars think about the following questions 1 What is the origin of the creative process 2 How do biological social and cognitive processes shape the activities of artists and the responses of viewers 3 How does literary activity draw on our experiences of everyday life and how is it tied to other kinds of media 4 How does play affect the process of growth from childhood to adulthood The contributors consider artistic literary and play activity from its most biological roots through individual cognitive and emotional processing to its expression at the social level *Emerging Visions of the Aesthetic Process* offers a stimulating basis for the discussion of aesthetic processes and will serve as an integrative comprehensive treatise on the topic for researchers and students
