Indonesian Women in a Changing Society E. Kristi Poerwandari, 2005 **Guatemaltecas** Susan A. Berger, 2021 After thirty years of military rule and state sponsored violence Guatemala reinstated civilian control and began rebuilding democratic institutions in 1986 Responding to these changes Guatemalan women began organizing to gain an active role in the national body politic and restructure traditional relations of power and gender This pioneering study examines the formation and evolution of the Guatemalan women s movement and assesses how it has been affected by and has in turn affected the forces of democratization and globalization that have transformed much of the developing world Susan Berger pursues three hypotheses in her study of the women s movement She argues that neoliberal democratization has led to the institutionalization of the women s movement and has encouraged it to turn from protest politics to policy work and to helping the state impose its neoliberal agenda She also asserts that while the influences of dominant global discourses are apparent local definitions of femininity sexuality and gender equity and rights have been critical to shaping the form content and objectives of the women s movement in Guatemala And she identifies a counter discourse to globalization that is slowly

emerging within the movement Berger's findings vigorously reveal the manifold complexities that have attended the development of the Guatemalan women's movement *Feminist Thought, Student Economy Edition* Rosemarie Tong, 2018-10-03 This book provides a clear comprehensive and incisive introduction to the major traditions of feminist theory from liberal feminism radical feminism and Marxist and socialist feminism to care focused feminism psychoanalytic feminism women of color feminisms and ecofeminism **Women, the Environment and Sustainable Development** Rosi Braidotti, International Research and Training Institute for the Advancement of Women, 1994 There is a widespread perception that the development process is in a state of multiple crisis While the notion of sustainable development is supposed to address adequately its environmental dimensions there is still no agreed framework relating women to this new perspective This book is an attempt to present and disentangle the various positions put forward by major actors and to clarify the political and theoretical issues that are at stake in the debates on women the environment and sustainable development Among the current critiques of the western model of development which the authors review are the feminist analysis of Science itself and the power relations inherent in the production of knowledge Women Environment and Development WED Alternative Development Environmental Reformism and Deep Ecology Social Ecology and Ecofeminism In traversing this important landscape of ideas they show how they criticise the dominant developmental model at the various levels of epistemology theory and policy The authors also go further and put forward their own ideas as to the basic elements they consider necessary in constructing a paradigmatic shift emphasising such values as holism mutuality justice autonomy self reliance sustainability and peace This unique work is a signally useful contribution to clarifying thinking on a topic with immense implications for all women Publisher's description Postsecular Feminisms Nandini Deo, 2018-07-26 Postsecular Feminisms explores the contested relationship between feminism and secularism through a series of case studies featuring perspectives from the global North and South It offers insights beyond those of the Abrahamic traditions and includes multiple examples from South Asia By decentering the European experience Postsecular Feminisms shows how secularism and feminism have been constituted in North America South Asia and Anglophone West Africa The book asks can postsecular feminism offer a way to think about religion and gender so as to support women in all the variety of their lived experiences The contributors show that postsecular feminism is a variety of feminism that is not necessarily either secularist or anti secular Rather it is feminism informed by a history of secularist bias within liberal feminism Postsecular Feminisms explores both the potentials and pitfalls of postsecular feminisms with some authors arguing that a contextually grounded praxis is possible while others make a strong case against postsecular feminism as theory and practice **The Future of Women's Rights** Joanna Kerr, Ellen Sprenger, Alison Symington, 2004-09 The Future of Women's Rights identifies the emergence of various trends threatening the advance of gender equality women's human rights and sustainable human development These phenomena include the impacts of globalization and neoliberal economics developments in biotechnology the neo

Bertucci, 2014-11-24 How to strengthen both academic research and international policies by improving the connections between scholars and policymakers *Scholars Policymakers and International Affairs* shows how to build mutually beneficial connections between the worlds of ideas and action analysis and policy Drawing on contributions from top international scholars with policy experience in the United States Europe Asia Canada and Latin America as well as senior policymakers throughout the Americas Abraham F Lowenthal and Mariano E Bertucci make the case that scholars can both strengthen their research and contribute to improved policies while protecting academia from the risks of active participation in the policy process Many scholars believe that policymakers are more interested in processes and outcomes than in understanding causality Many policymakers believe that scholars are absorbed in abstract and self referential debates and that they are primarily interested in crafting theories and impressing other scholars rather than developing solutions to pressing policy issues The contributors to this book confront this gap head on They do not deny the obstacles to fruitful interaction between scholars and policymakers but drawing on their own experience discuss how these obstacles can be and have been overcome They present case studies that illustrate how scholars have helped reduce income inequality promote democratic governance improve gender equity target international financial sanctions manage the Mexico U S border and enhance inter American cooperation These success stories are balanced by studies on why academic analysts have failed to achieve much positive impact on counternarcotics and citizen security policies The editors astute conclusion identifies best practices and provides concrete recommendations to government agencies international institutions nongovernmental organizations and funding sources as well as to senior university officials academic departments and centers think tanks established scholars junior faculty and graduate students Clearly written and thoughtfully organized this innovative book provides analytic insights and practical wisdom for those who want to understand how to build more effective connections between the worlds of thought and action *Mapping Women, Making Politics* Lynn Staeheli, Eleonore Kofman, Linda Peake, 2013-03-07 *Mapping Women Making Politics* demonstrates the multiple ways in which gender influences political processes and the politics of space The book begins by addressing feminism s theoretical and conceptual challenges to traditional political geography and then applies these perspectives to a range of settings and topics including nationalism migration development international relations elections social movements governance and the environment in the Global North and South *Women, Work, and Gender Relations in Developing Countries* Claire Bélanger, Parvin Ghorayshi, 1996-10-21 The chapters in this collection are based on qualitative fieldwork studies and collectively offer the reader a perspective on women work and gender relations that is at once multidisciplinary and feminist Women s work in the

household agriculture industry and in the so called informal sector is explored with a concern for the ways in which gender class and ethnicity are constructed by the larger socioeconomic structures in which women live By taking concrete analyses of women s lives as their point of departure the contributors to this volume strive to bridge the gap between socio economic structure of the society and the actual circumstances in which women find themselves In this way readers and scholars alike are better able to untangle the complex dynamics of gender relations and to develop strategies for social change
