Illicit Antiquities Neil Brodie, Kathryn Walker Tubb, 2003-08-27 The exploitation of archaeological sites for commercial gain is a serious problem worldwide In peace and during wartime archaeological sites and cultural institutions both on land and underwater are attacked and their contents robbed for sale on an international antiquities market Objects are excavated without record smuggled across borders and sold for exorbitant prices in the salesrooms of Europe and North America In some countries this looting has now reached such a scale as to threaten the very survival of their archaeological and cultural heritage This volume highlights the deleterious effects of the trade on cultural heritage but in particular it focuses upon questions of legal and local responses How can people become involved in the preservation of their past and what in economic terms are the costs and benefits Are international conventions or export restrictions effective in diminishing the volume of the trade and the scale of its associated destruction

The Law of Wreck Nicholas Gaskell, Craig Forrest, 2019-11-05 This book covers wreck law as an integrated whole going beyond the question of removal to include issues such as the ownership of wreck and how the law deals with the many commercial law problems arising after ships have been wrecked during the maritime commercial adventure The book offers authoritative guidance on the genesis and meaning of the Nairobi Wreck Removal Convention 2007 and the interpretation of its often complex provisions as they apply both to States trying to use its powers and to shipowners and liability insurers faced by its obligations The authors explain the increasingly complex inter

relationship between linked areas of maritime law including salvage intervention and the overlapping international regimes which deal with pollution from oil bunkers or hazardous and noxious substances The book examines how a salvage operation transitions to wreck removal and links the liability provisions with the standard form international commercial contracts actually used by the industry to remove wrecks eg BIMCO s Wreckstage 2010 Wreckhire 2010 and Wreckfixed 2010 It also covers the complex requirements concerning the disposal of wrecks including the latest recycling regulations applicable in 2019 The Law of Wreck will be of value to shipping industry professionals insurers and legal practitioners as well as academics and students of maritime law Submerged Cultural Resource Management James D. Underwater Cultural Heritage investigates cases of underwater cultural heritage exploring ethical issues that have never been studied before A vast cultural heritage lies beneath the sea including the archaeological remains of more than three million vessels as well as historic monuments and whole cities In addition climate change population growth and current events around the world mean that new underwater cultural heritage is being created faster than ever before It is therefore essential that the ethical issues related to the management of such heritage are considered now especially as decisions made now will bestow the

heritage with a value and will establish legal frameworks that could be used either to protect or harm underwater heritage in the future Considering a range of challenges related to underwater cultural heritage including preservation management use sustainability valuation politics identity human rights and intangible heritage the book presents case studies that both illustrate the key ethical issues and also offer possible solutions to help navigate such challenges The book will also explore the various legislative instruments protecting underwater cultural heritage and emphasise the importance of revising and updating legal frameworks whilst also taking into account ethical concerns that may expose cultural heritage to more serious menaces Underwater Cultural Heritage draws on case studies from around the globe and as such should be of great interest to academics researchers and students working in heritage studies archaeology history politics and sustainability It should also be appealing to heritage practitioners and policymakers who want to learn more about the issues surrounding not only management of underwater cultural heritage but management of cultural heritage in general **Preserving**

Majewski, David Gaimster, 2009-06-07 In studying the past archaeologists have focused on the material remains of our ancestors Prehistorians generally have only artifacts to study and rely on the diverse material record for their understanding of past societies and their behavior Those involved in studying historically documented cultures not only have extensive material remains but also contemporary texts images and a range of investigative technologies to enable them to build a broader and more reflexive picture of how past societies communities and individuals operated and behaved Increasingly historical archaeology refers not to a particular period place or a method but rather an approach that interrogates the tensions between artifacts and texts irrespective of context In short historical archaeology provides direct evidence for how humans have shaped the world we live in today Historical archaeology is a branch of global archaeology that has grown in the last 40 years from its North American base into an increasingly global community of archaeologists each studying their area of the world in a historical context Where historical archaeology started as part of the study of the post Columbian societies of the United States and Canada it has now expanded to interface with the post medieval archaeologies of Europe and the diverse post imperial experiences of Africa Latin America and Australasia The 36 essays in the International Handbook of Historical Archaeology have been specially commissioned from the leading researchers in their fields creating a wide ranging digest of the increasingly global field of historical archaeology The volume is divided into two sections the first reviewing the key themes issues and approaches of historical archaeology today and the second containing a series of case studies charting the development and current state of historical archaeological practice around the world This key reference work captures the energy and diversity of this global discipline today

Transports of Delight Peter Hancock, 2017-05-11 This inspiring book shows how the spiritual side of life with its thoughts feelings and aspirations is intimately bound up with our material technologies From the wonder of Gothic Cathedrals to the quiet majesty of lighter than air flight to the ultimate in luxury of the north Atlantic steamers Peter Hancock explores how these sequential heights of technology have enabled our dreams of being transported to new and uncharted realms to become reality Sometimes literally sometimes figuratively technology has always been there to make material the visions of our imagination This book shows how this has essentially been true for all technologies from Stonehenge to space station But technology is far from perfect Indeed the author argues here that some of the most public and tragic of its failures still remain instructive emblematic and even inspiring He reports on examples such as a Cathedral of the Earth Beauvais a Cathedral of the Seas Titanic and a Cathedral of the Air Hindenburg and tells their stories from the viewpoint of material transcendence By interweaving their stories he reveals how technologies can succeed in elevating human beings and in taking them to whole new realms of being

he explores and explains why these experiences are Transports of Delight Preserving Archaeological Remains in Situ?
