identifying the qi lin divine giraffe animal and wrapping up the masterpiece *The Spring Autumn Annals* two years prior to death *Illustrated Catalogue of Books, Standard and Holiday* McClurg, Firm, Booksellers, Chicago, 1904 China Goes to Sea Andrew S. Erickson, Lyle J. Goldstein, Carnes Lord, 2009-07-01 In modern history China has been primarily a land power dominating smaller states along its massive continental flanks. But China's turn toward the sea is now very much a reality as evident in its stunning rise in global shipbuilding markets, its vast and expanding merchant marine, the wide offshore reach of its energy and minerals exploration companies, its growing fishing fleet, and indeed its increasingly modern navy. Yet for all these achievements, there is still profound skepticism regarding China's potential as a genuine maritime power. Beijing must still import the most vital subcomponents for its shipyards; maritime governance remains severely bureaucratically challenged, and the navy evinces at best a little enthusiasm for significant blue water power projection capabilities. This volume provides a truly comprehensive assessment of prospects for China's maritime development by situating these important geostrategic phenomena within a larger world historical context. China is hardly the only land power in history to attempt transformation by fostering sea power. Many continental powers have elected or been impelled to transform themselves into significant maritime powers in order to safeguard their strategic position or advance their interests. We examine cases of attempted transformation from the Persian Empire to the Soviet Union and determine the reasons for their success or failure. Too many works on China view the nation in isolation. Of course, China's history and culture are to some extent exceptional, but building intellectual fences actually hinders the effort to understand China's current development trajectory. Without underestimating the enduring pull of China's past as it relates to threats to the country's internal stability and its landward borders, this comparative study provides reason to believe that China has turned the corner on a genuine maritime transformation. If that proves indeed to be the case, it would be a remarkable, if not singular, event in the history of the last two millennia. *A World History of Chinese Literature* Yingjin Zhang, 2023-07-25 Providing a broad introduction to the area, *A World History of Chinese Literature* maps the field of Chinese literature across its various worlds, looking both within at the world of Chinese literature, its history, linguistic, cultural, local, and regional specificities, and without at the way Chinese literature has circulated throughout the world. The thematic focus allows for a broad number of key categories, such as authors, genres, genders, regions, as well as innovative explorations of new topics and issues, such as inter arts, performativity, and transmediation. The sections cover the circulation and reception of China in world literature, as well as the worlds of Chinese literature across the globe: Borders, oceans, and rainforests; Comparative literary genres; Translingual writers and scholars; Gender configurations; Translation and transmediation. With a focus on the twentieth and twenty-first century, this collection intervenes in current debates on global Chinese literature, Sinophone and Sinoscript studies, and the production and reception of literary works by ethnic Chinese in non-Sinitic languages, as well as Anglophone literature inspired by Chinese literary tradition. It will be of interest to anyone working on or studying Chinese literature, language, and

culture as well as world literatures in relation to China The Oxford History of Modern China Jeffrey N.
