Class of 1932, 1932 **The Yale Alumni Weekly**, 1926 **The American Synthetic Organic Chemicals Industry** Kathryn Steen, 2014-08-03 Prior to 1914 Germany dominated the worldwide production of synthetic organic dyes and pharmaceuticals like aspirin When World War I disrupted the supply of German chemicals to the United States American entrepreneurs responded to the shortages and high prices by trying to manufacture chemicals domestically Learning the complex science and industry however posed a serious challenge This book explains how the United States built a synthetic organic chemicals industry in World War I and the 1920s Kathryn Steen argues that Americans intense anti German sentiment in World War I helped to forge a concentrated effort among firms the federal government and universities to make the United States independent of foreign chemicals Besides mobilization efforts to make high explosives and war gases federal policies included protective tariffs gathering and publishing market information and most dramatically confiscation of German owned chemical subsidiaries and patents Meanwhile firms and universities worked hard to develop scientific and manufacturing expertise Against a backdrop of hostilities and intrigue Steen shows how chemicals were deeply entwined with national and international politics and policy during the war and subsequent isolationism of the turbulent early twentieth century **The National Union Catalog, Pre-1956 Imprints**, 1975 *A Bibliography of British History, 1914-1989* Keith Robbins, American Historical Association, Royal Historical Society (Great Britain), 1996 Containing over 25 000 entries this unique volume will be absolutely indispensable for all those with an interest in Britain in the twentieth century Accessibly arranged by theme with helpful introductions to each chapter a huge range of topics is covered There is a comprehensive index **Delta Empire** Jeannie Wayne, 2011-12-05 In Delta Empire Lee Wilson and the Transformation of Agriculture in the New South Jeannie Wayne employs the fascinating history of a powerful plantation owner in the Arkansas delta to recount the evolution of southern agriculture from the late nineteenth century through World War II After his father's death in 1870 Robert E Lee Wilson inherited 400 acres of land in Mississippi County Arkansas Over his lifetime he transformed that inheritance into a 50 000 acre lumber operation and cotton plantation Early on Wilson saw an opportunity in the swampy local terrain which sold for as little as fifty cents an acre to satisfy an expanding national market for Arkansas forest reserves He also led the fundamental transformation of the landscape involving the drainage of tens of thousands of acres of land in order to create the vast agricultural empire he envisioned A consummate manager Wilson employed the tenancy and sharecropping system to his advantage while earning a reputation for fair treatment of laborers a reputation

Wayne suggests not entirely deserved He cultivated a cadre of relatives and employees from whom he expected absolute devotion Leveraging every asset during his life and often deeply in debt Wilson saved his company from bankruptcy several times leaving it to the next generation to successfully steer the business through the challenges of the 1930s and World War II Delta Empire traces the transition from the labor intensive sharecropping and tenancy system to the capital intensive neo plantations of the post World War II era to the portfolio plantation model Through Wilson s story Wayne provides a compelling case study of strategic innovation and the changing economy of the South in the late nineteenth century
