**History of Germany** Ernest Henderson,2018-03-15 GERMANY stands in the centre of Europe and on her soil all the great international struggles have been fought the Thirty Years War the early campaigns of the Spanish Succession War the Seven Years War the gigantic wars against Napoleon It is the custom for modern educators to recommend the study of the history of France as a guiding thread through the intricacies of general European history but is this choice justifiable The two great omnipresent factors of the whole medi val period are the Papacy and the Empire the Empire was German from the ninth to the nineteenth century from the days of Charlemagne until the days of Francis II and the Empire interfered in the affairs of the Papacy and of Italy far more than did France When we come to the period of the Reformation surely Luther and his kind were more prominent than the French reformers and the Emperor Charles V had more to do with the affairs of Europe than any of the French kings In the Thirty Years War larger interests were at stake than in the Huguenot struggles and the German Peace of Westphalia necessitated a recasting of the whole map of Europe Louis XIV it is true gave the tone to the high society of his age and French was almost universally spoken and written at the German courts but this influence was neither very deep nor very beneficial Nor can it be denied that the French Revolution produced great results for Europe Yet its effects as far as Germany was concerned have been overrated the liberation of the serfs would probably have been accomplished without it while constitutional government popular representation and trial by jury had still to wait for half a century
